New Vision 2050 Hiroshi Komiyama, Koichi Yamada, 2018-05-04 This book presents the New Vision 2050, which adds the concept of the “platinum society” to the “Vision 2050”. The 20th century was a century in which energy led the development of material civilization, resulting in depletion of resources, global warming and climate change. What form should sustainable material and energy take to protect the Earth? The Vision 2050 was established 20 years ago as a model that we should pursue for the next half century. Fortunately, the world is on course for the Vision 2050. The 21st century will be a century in which we seek qualitative richness, with the Vision 2050 as the material basis. That is, a “platinum society” that has resource self-sufficiency and resource symbiosis, and where people remain active throughout their lives and have a wide range of choices and opportunities for free participation. Since the author presented the concept of Vision 2050 in 1999, the idea has been introduced in two books entitled Vision 2050: Roadmap for a Sustainable Earth (2008) and Beyond the Limits to Growth: New Ideas for Sustainability from Japan (2014). The latter includes a chapter that sheds light on the concept of a “platinum society”. In this publication, the author presents the New Vision 2050 in more detail.

Beyond the Limits to Growth Hiroshi Komiyama, 2014-02-18 At a time when contemporary challenges seem to many to be insurmountable, this book offers an optimistic view of the future and provides a road map for societies to get there. Drawing upon extensive research and many years as a thought leader in environmental and sustainability issues in Japan and internationally, Hiroshi Komiyama analyzes the most pressing challenges to the attainment of sustainability of economically advanced nations and argues forcefully for Japan to lead them out of the present dilemma through active promotion of creative consumer and societal demand. He shows how an active industry–government–academic partnership can provide the environment needed to promote such new creative demand and illustrates its potential through presentation of a Platinum Society Network that was launched on a regional basis in Japan in 2010 to facilitate the solution of common issues through the exchange of information and ideas. What is perhaps most surprising about the text is its unwavering optimism supported by hard evidence, history, and insightful observation. Problems arising from new paradigms of the 21st century (what the author refers to as “exploding knowledge, limited Earth resources, and aging societies”) thwart sustainable development in advanced and developing countries alike. All countries will struggle with issues that evolve from these paradigms including diminishing resources, expanding budget deficits, and growing global environmental problems. This window on potential practical pathways and solutions should be

of interest to all those engaged in seeking ways to meet these contemporary challenges.

Winter of Fire Sherryl Jordan,2019-07-01 In a gloomy, smoke-filled world where the sun has vanished, all light and warmth comes from the firestones mined underground by the Quelled – a people branded by the race known as Chosen. On her sixteenth birthday, the rebellious Quelled girl Elsha is selected as handmaid to the Firelord – the most powerful of the Chosen. Suddenly Elsha is swept into a world of privilege, but also of prejudice and hatred and inequality. And her pursuit of her vision of a world of warmth, as sung about in the ancient myths, leads her on a dangerous path...

Vision 2050 Hiroshi Komiyama, Steven Kraines, 2008-08-07 Hiroshi Komiyama's Vision 2050 is a plan for paving a road to global sustainability. It lays out a path to a sustainable future for humanity that could realistically be achieved by 2050 through the application of science and technology. A prominent Japanese academic and leader in global sustainability, Komiyama draws upon realistic assumptions and solid scientific concepts to create a vision that makes the living standards enjoyed by developed countries today possible for all people by 2050. Vision 2050 is built upon three fundamental principles – increased energy efficiency, recycling, and development of renewable energy sources – and the book argues for the technological potential of all three. Specifically, Komiyama envisions a three-fold increase in overall energy efficiency and a doubling of renewable energy resources by 2050. Vision 2050: Roadmap for a Sustainable Earth is written to address the concerned citizen as well as to inspire an exchange of ideas among experts, policy makers, industrial leaders, and the general public.

Subduction Alexander I. Shemenda, 1994-09-30 This book is devoted to the quantitative physical modeling of subduction and subduction-related processes. It presents a coherent description of the modeling method (including similarity criteria, and a novel applied experimental technique), results from model experiments, theoretical analysis of results on the basis of continuum mechanics, and their geodynamic interpretation. Subduction is

modeled in general as well as applied to particular regions using both 2-D and 3-D approaches, with both slab-push and slab-pull driving forces. The modeling covers all stages from subduction initiation to 'death', different regimes of subduction producing back arc extension and compression, blocking of subduction and jumps of subduction zone, arc-continent collision and continental subduction. This work is for geologists and geophysicists interested in geodynamics of the convergent plate boundaries and in mechanics of the lithosphere.

Emotion, Reason, and Action in Kant Maria Borges, 2019-04-18 This book is open access and available on www.bloomsburycollections.com. It is funded by Knowledge Unlatched. Though Kant never used the word 'emotion' in his writings, it is of vital significance to understanding his philosophy. This book offers a captivating argument for reading Kant considering the importance of emotion, taking into account its many manifestations in his work including affect and passion. *Emotion, Reason, and Action in Kant* explores how, in Kant's world view, our actions are informed, contextualized and dependent on the tension between emotion and reason. On the one hand, there are positive moral emotions that can and should be cultivated. On the other hand, affects and passions are considered illnesses of the mind, in that they lead to the weakness of the will, in the case of affects, and evil, in the case of passions. Seeing the role of these emotions enriches our understanding of Kant's moral theory. Exploring the full range of negative and positive emotions in Kant's work, including anger, compassion and sympathy, as well as moral feeling, Borges shows how Kant's theory of emotion includes both physiological and cognitive aspects. This is an important new contribution to Kant Studies, suitable for students of Kant, ethics, and moral psychology.

Magika Swordsman and Summoner Vol. 3 MonRin, Mitsuki Mihara, 2016-02-02 Kazuki Hayashizaki, the only boy in the all-girls' Magika, is starting to accept his fate as a summoner rather than a swordsman. But after a decisive victory in the dueling arena, the teachers believe that Kazuki's rightful place is at the Kengika, the school for training swordsmen. No one feels this more strongly than Kazuki's adoptive sister, Kanae, who challenges him to a duel that would pit her sword skills against his summoning magic. If Kazuki wins, it will prove once and for all that he has what it takes to become a summoner and should remain at the Magika. There's only one hitch--Kazuki's spells are mysteriously running dry, and time is running out!
