**Endangered Giant Pandas** Carl R. Green,Jane Katirgis,2015-07-15 The giant panda is the national symbol of China and one of the most beloved animals in the world. So who would want to hurt this creature? How does it survive in the wild? Why are populations shrinking? Learn about giant pandas and what is being done to help save them.

Giant Pandas Rachel Grack,2022-01-01 Giant pandas are known for their love of bamboo. But bamboo forests are often cut down by humans, causing giant pandas to lose their habitats. In this title, leveled text and crisp images introduce the threats that giant pandas face and how humans can help. Special features show off the pandas' range and conservation status, introduce cause and effect, and highlight giant pandas' impact on the environment.

*The Giant Panda* Judith Janda Presnall,1998 Discusses the forces pushing the giant panda toward extinction and the efforts being made to counter those forces.

Endangered Pandas John Crossingham,Bobbie Kalman,2005 Describes the physical characteristics of the panda and the conservation efforts being carried out to keep it from becoming extinct.

Threat to the Giant Panda John A. Torres,2020-02-04 As humans take up more of the wilderness where the giant panda lives, the number of these wild bears has decreased. Efforts have been in place for years to save the cuddly-looking creatures, but they are still endangered. Read about the habits and lifestyle of these precious animals, and learn what you can do to help save them.

**The Conscious Planet** Neil M. Pine,2013-07-16 The writing of this book was both a spiritual and intellectual journey.It took more than ten years to complete while having to be revised andupdated constantly. Th is is no-holds-barred literature where the authorsays what he means and means what he says! He does not mintz his words.Th e Conscious Planet thinks outside the box and breaks all the rules oftraditional thinking. Sometimes this information can be brutally honest orpainfully real. Th is author is not trying to win any popularity contest. Hetells it like it really is and doesn't care what anyone thinks!Th e Conscious Planet is what the government and big corporations whocontrol it don't want you to know! It is the truth about the truth andnothing but the truth, so help me !In the modern world, people only know what multinational corporationswant them to know, not what they should know! And it is this taintedknowledge which is creating a society of pathetic drones, who like poordoomed sheep, are too busy just trying to survive to see that the wool is beingpulled over their eyes while being led to

slaughter! Because these corporate imperatives are being paid for at the expense of the future of mankind! Before you patronize any product, be conscious about what it's doing to your health, to the earth, and how it will affect future generations. Skeptics have warned the author that this book will receive nominal success, that it represents a small niche market, and not everyone would be interested in such literature. And in retort to this assertion, it should be acknowledged that yes, it is sadly true that not everyone would be interested in this book because the information herein may not pertain directly to their life or general well being. So in understanding, who would be interested in this book, let's narrow it down by eliminating the types of individual who would not directly benefit: 1. People who are immortal: Yes, these people might not care about this book: heck, if you were immortal, you might eat Twinkies and cheese-burgers all day long. 2. People who have another planet to live on: This is true: why would they care if the world goes to hell in a handbasket? See Ya! Well, lucky them: however, for the other seven billion people who inhabit the planet earth who are not immortal, and who don't have another planet to live on -- then this book is absolutely the most important book they may ever read! **Panda** Heather Angel, 2008-02-13 A photographic tribute to the panda, featuring details on their home, feeding behavior, mating habits, and survival in the face of human encroachment. With its large, friendly face and eyes exaggerated by black eye patches, China's national treasure, the giant panda, is instantly recognizable. Giant pandas spend most of their time trying to eat enough bamboo to survive. The rest is spent conserving energy, and solitary pandas can be seen strolling along, stopping to recline on riverside rocks or amongst ferns. The lower body-weight and physical size of panda cubs mean that they have more energy to spend, and are seen climbing trees, play-fighting, doing somersaults and playing with bamboo. Panda is a unique and intimate portrait of one of the world's best-loved animals. The extraordinary lives of the giant panda and the enchanting red panda are captured throughout the seasons in their remote mountain habitat. This selection of over two hundred remarkable pictures shows pandas feeding, resting, playing, climbing trees and even sliding down snowy slopes, as well as showcasing the misty peaks and snow-clad forests of the beautiful Sichuan Province of China. Panda is a heart-warming and illuminating tribute to an endangered species that is loved the world over.

The following are the ten facts about pandas: A panda's hand has six digits as five fingers as well as an opposable thumb There are less than 10 million pandas in the world. Pandas are found mostly in mountain ranges in central Shaanxi, China's Sichuan, and Gansu provinces. Pandas inhabit mostly mountain forests, which are dense with conifers and bamboo. Due to their ineffective intestinal system, the giant pandas have to feed for approximately 15 hours each day, with bamboo making 99 % of their diet. Giant pandas are among the few bear species that do not hibernate. This is because it cannot store adequate fat from its diet. Pandas live at high altitudes of about 1,500 to 3,000M. Their thick and oily fur aids keep them warm. Male pandas are called as boars while females are sows. Pandas are solitary creatures At birth time an infant panda is about 1/900th its mother's body size.
