*Nop* Caroline Magerl,2021-03-03 A heartwarming picture book from award-winning author-illustrator Caroline Magerl about two unlikely loners who forge a forever friendship. Nop is a scruffy kind of bear. He sits on a dusty armchair in Oddmint's Dumporeum surrounded and ignored by the other heaping heaps of goods. At night, they are magically transformed by the beaders, knitters, patchers and stitchers and the next day go on to 'someplace wonderful'. Nop watches the heap tumble until, armed with a new bow tie, he has an idea that will change his life forever. A tale about finding the magic that lives inside even the scruffiest of bears.

**The Hot Air Balloon Book** Clive Catterall,2013 More than a century before the Wright brothers' first flight, humans were taking to the skies in hot air balloons. Today, with basic craft skills, you can build and safely launch your own balloons using inexpensive, readily available materials. Author and inventor Clive Catterall provides illustrated, step-by-step instructions for eight different homemade models, as well as the science and history behind them. Some, like the Solar Tetroom or the Trash Bag Sausage, are made from plastic bags and tape. Others, like the Khom Loi or the Kongming Lantern, are built using tissue paper and wire. The Hot Air Balloon Book also shows readers ways to heat the interior air that lifts these balloons, from tea candles to hair dryers, kitchen toasters to the sun's warming rays. Always keeping safety in mind, the author includes detailed guidelines on when and where open flames are appropriate and the proper weather conditions to launch these lighter-than-air craft.

Group-Centered Prevention Programs for At-Risk Students Elaine Clanton Harpine,2010-11-09 School psychologists, counselors, and educators in the K-12 setting face the daunting responsibility of finding balance between mandated testing, students' mental-health concerns, and additional academic help for at-risk students. One solution to this dilemma is to implement a school-based mental health approach that combines learning and counseling needs into a single program. Several types of successful programs are available, though week-long intensive programs have recently increased in popularity. Group-Centered Prevention Programs for At-Risk Students focuses on the development of such a week-long prevention program, and provides professionals with step-by-step directions to create their own program. It also focuses on the use of group-centered interventions as an opportunity to prevent at-risk behaviors as a means of correcting or changing dysfunctional behavior. This highly readable volume addresses such challenging issues as: Using self-reflection to teach writing skills. Increasing interpersonal interaction while honing etiquette. Enhancing group acceptance and reading comprehension. Rebuilding self-efficacy by increasing word recognition and decoding skills. With its solid research foundation combined with clear, practical program descriptions, this volume is an essential addition to the libraries of researchers and practitioners alike in the disciplines of school psychology, education, social work, psychotherapy and counseling, and clinical child psychology.
