The Locusts Jesse Lenz, 2020-11 *The Locusts* is the first monograph by photographer and publisher Jesse Lenz. His images transport the reader to rural Ohio where his children run wild in the fields, build forts in the attic, and fall asleep surrounded by lightsabers and superheroes. The microcosmic worlds of plants, insects, animals, and children create a brooding landscape where dichotomies of nature play out in front of his growing family. The backyard becomes a labyrinth of passages as the children experience the cycles of birth and death in the changing seasons. *The Locusts* depicts a world in which beautiful and terrible things will happen, but offers grace and healing within the brokenness and imperfection of life.

The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled *The Last Lecture*. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't

about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Locust Projects: The 20th Anniversary Retrospective Locust Projects, 2019-05-07 The 20th Anniversary Retrospective from Miami's Locust

Projects comprehensively documents and celebrates 20 years of ground-breaking contemporary art from the Southeast's leading alternative art space with a playful and sophisticated graphic design. Locust Projects, the Southeast's leading alternative art space, documents its first 20 years in The 20th Anniversary Retrospective. The cutting-edge art space offers contemporary visual artists the freedom to experiment with new ideas. Locust's ethos of encouraging exploration and breaking boundaries has, at times, extended to the very integrity of its physical space (think jackhammered floors). This volume includes a comprehensive visual record of over 150 exhibitions and projects, essays and commentary, a written timeline, and extensive quotes. Included are works by renowned artists such as Daniel Arsham, Hernan Bas, Nathan Carter, Francesa DiMattio, Jim Drain, Jon Pylypchuk, Retna, and Cristina Lei Rodriguez. The book includes text by director Lorie Mertes and board members Steve Lanster and Debra and Dennis Scholl. The innovative book design, like Locust Projects itself, experiments with convention. Visually referencing a calendar, the volume leads readers on a voyage of discovery through the organization's history, with each year's images visually bleeding into the next across French-fold pages. The cover's thin strips of images are details from installation photos. This book will appeal to anyone interested in contemporary art, including artists, art lovers, collectors, students, curators, gallerists, and arts administrators.

The Very Quiet Cricket Eric Carle, 2021-09-07 One day, a little cricket is born and meets a big cricket who chirps his welcome. But the little cricket cannot make a sound. The cricket meets many insects, but it isn't until he meets a beautiful female cricket that he can finally chirp hello! Excerpt: Hello! whispered a praying mantis, scraping its huge front legs together. The

little cricket wanted to answer, so he rubbed his wings together. But nothing happened. Not a sound.

The Photo Ark Joel Sartore, 2017 This book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals -- especially those that are endangered. His message: to know these animals is to save them. Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits: from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the prose of veteran wildlife writer Douglas Chadwick, this book presents an argument for saving all the species of our planet.

The Social Lives of Animals Ashley Ward, 2022-03-01 A rat will go out of its way to help a stranger in need. Lions have adopted the calves of their prey. Ants farm fungus in cooperatives. Why do we continue to believe that life in the animal kingdom is ruled by competition? In *The Social Lives of Animals*, biologist Ashley Ward takes us on a wild tour across the globe as he searches for a more accurate picture of how animals build societies. Ward drops in on a termite mating ritual (while his guides snack on the subjects), visits freelance baboon goatherds, and swims with a mixed family of whales and dolphins. Along the way, Ward shows that the social impulses we've long thought separated humans from other animals might actually be our strongest

connection to them. Insightful, engaging, and often hilarious, *The Social Lives of Animals* demonstrates that you can learn more about animals by studying how they work together than by how they compete.

Are You a Grasshopper? Judy Allen, 2004 For use in schools and libraries only. Young children will make many amazing discoveries about creatures in their own backyards in this intriguing tale of a day in the life of a grasshopper.

Origami Insects Robert J. Lang, 2012-04-24 DIVNoted origamist presents step-by-step instructions and diagrams for 20 challenging projects: treehopper, spotted ladybug, orb weaver, tarantula, butterfly, grasshopper, dragonfly, praying mantis, more. Intermediate to advanced level. /div

Grasshopper Dreaming Jeffrey A. Lockwood, 2002 *Grasshopper Dreaming* is a collection of first-person musings about the ethical and philosophical implications of the author's work as an entomologist who specializes in grasshoppers and pest control. Lockwood deftly explores the moral implications of his work and speculates on about the actual relationship between pests and humanity if we consider all living creatures to have value in and of themselves, regardless of their usefulness or inconvenience for us. The author, self-described as a hired assassin for agriculture, offers readers a rich account of the sometimes painful, often odd, occasionally funny, and invariably complex realizations that come out of balancing a religious perspective with the practices of modern science and technology. Based on fifteen years of work, the essays in this book represent the rare and compelling integration of understanding of nature with the perspective of a world-class ecologist and struggling mystic.

In this book you will meet the animal inventors who have shared their super inventing powers to make amazing things for humans.

The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases.
