The White Darkness David Grann,2018-10-30 From the #1 New York Times bestselling author of Killers of the Flower Moon and The Wager, a thrilling and powerful true story of adventure and obsession in the Antarctic, lavishly illustrated with color photographs. [Grann is] one of the preeminent adventure and true-crime writers working today.—New York Magazine Henry Worsley was a devoted husband and father and a decorated British special forces officer who believed in honor and sacrifice. He was also a man obsessed. He spent his life idolizing Ernest Shackleton, the nineteenth-century polar explorer, who tried to become the first person to reach the South Pole, and later sought to cross Antarctica on foot. Shackleton never completed his journeys, but he repeatedly rescued his men from certain death, and emerged as one of the greatest leaders in history. Worsley felt an overpowering connection to those expeditions. He was related to one of Shackleton's men, Frank Worsley, and spent a fortune collecting artifacts from their epic treks across the continent. He modeled his military command on Shackleton's legendary skills and was determined to measure his own powers of endurance against them. He would succeed where Shackleton had failed, in the most brutal landscape in the world. In 2008, Worsley set out across Antarctica with two other descendants of Shackleton's crew, battling the freezing, desolate landscape, life-threatening physical exhaustion, and hidden crevasses. Yet when he returned home he felt compelled to go back. On November 13, 2015, at age 55, Worsley bid farewell to his family and embarked on his most perilous quest: to walk across Antarctica alone. David Grann tells Worsley's remarkable story with the intensity and power that have led him to be called simply the best narrative nonfiction writer working today. Illustrated with more than fifty stunning photographs from Worsley's and Shackleton's journeys, The White Darkness is both a gorgeous keepsake volume and a spellbinding story of courage, love, and a man pushing himself to the extremes of human capacity. Look for David Grann’s latest bestselling book, The Wager!

Atom Probe Tomography Michael K. Miller,2012-12-06 The microanalytical technique of atom probe tomography (APT) permits the spatial coordinates and elemental identities of the individual atoms within a small volume to be determined with near atomic resolution. Therefore, atom probe tomography provides a technique for acquiring atomic resolution three dimensional images of the solute distribution within the microstructures of materials. This monograph is designed to provide researchers and students the necessary information to plan and experimentally conduct an atom probe tomography experiment. The techniques required to visualize and to analyze the resulting three-dimensional data are also described. The monograph is organized into chapters each

covering a specific aspect of the technique. The development of this powerful microanalytical technique from the origins of field ion microscopy in 1951, through the first three-dimensional atom probe prototype built in 1986 to today's commercial state-of-the-art three dimensional atom probe is documented in chapter 1. A general introduction to atom probe tomography is also presented in chapter 1. The various methods to fabricate suitable needle-shaped specimens are presented in chapter 2. The procedure to form field ion images of the needle-shaped specimen is described in chapter 3. In addition, the appearance of microstructural features and the information that may be estimated from field ion microscopy are summarized. A brief account of the theoretical basis for processes of field ionization and field evaporation is also included.

Area 51 Annie Jacobsen, 2011-05-17 This compellingly hard-hitting bestseller from a Pulitzer Prize finalist gives readers the complete untold story of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government — but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In Area 51, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, Area 51 weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Maybe... Chris Haughton, 2021-11-30 A trio of misbehaving, mango-loving monkeys have a close call as the creator of Don't Worry, Little Crab gives readers a taste of vicarious mischief. Three little monkeys and their big monkey are sitting high on a branch in the forest canopy. "OK, monkeys! I'm off, says the big monkey. "Remember . . . Whatever you do, do NOT go down to the mango tree. There are tigers down there." Mmm . . . mangoes! think the little monkeys. They LOVE mangoes. Hmm . . . Maybe . . . maybe they could just look at the mangoes. That would be OK, right? With vivid colors, bold shapes, and his trademark visual humor, Chris Haughton is back with a deliciously suspenseful cautionary tale about pushing boundaries—and indulging your more impish side (when nobody is looking).

If the Tabloids Are True What Are You? Matthea Harvey, 2014-08-19 A brilliant combination of poetry and visual artwork by Matthea Harvey, whose vision is nothing short of blazingly original (Time Out New York) She didn't even know she had a name until

one day she heard the human explaining to another one, Oh that's just the backyard mermaid. Backyard Mermaid, she murmured, as if in prayer. On days when there's no sprinkler to comb through her curls, no rain pouring in glorious torrents from the gutters, no dew in the grass for her to nuzzle with her nose, not even a mud puddle in the kiddie pool, she wonders how much longer she can bear this life. The front yard thud of the newspaper every morning. Singing songs to the unresponsive push mower in the garage. Wriggling under fence after fence to reach the house four down which has an aquarium in the back window. She wants to get lost in that sad glowing square of blue. Don't you? —from The Backyard Mermaid

Prose poems introduce deeply untraditional mermaids alongside mer-tool silhouettes. A text by Ray Bradbury is erased into a melancholy meeting with a Martian. The Michelin Man is possessed by William Shakespeare. Antonio Meucci's invention of the telephone is chronicled next to embroidered images of his real and imagined patents. If the Tabloids Are True What Are You? combines Matthea Harvey's award-winning poetry with her fascinating visual artwork into a true hybrid book, an amazing and beautiful work by one of our most ingenious creative artists.

Transatlantic Airships John Christopher,2010 In Transatlantic Airships, John Christopher recounts the fascinating story of the lighter-than-air 'pond hoppers' from the earliest schemes and bold pioneering flights, including the triumphant double-crossing by the R34. It is a story of fantastic visionaries, incredible flying machines, great moments of triumph and, ultimately, of spectacular disaster. AUTHOR John Christopher started flying balloons in the 1980s and has flown almost every size from tiny one-man cloudhoppers to huge people-carriers. He is also a journalist and author specializing in all aspects of aviation. For twelve years he edited Aerostat, the journal of British Balloon & Airship Club. ILLUSTRATIONS 250 colour photos *
