Where I'm from Steven Borsman,Brittany Buchanan,Crystal Collett,Keri N. Collins,Danny Dyar,Katie Frensley,Yvonne Godfrey,Ethan Hamblin,Silas House,Megan Rebecckiah Jones,Liz Kilburn,George Ella Lyon,Zoe Minton,Kia L. Missamore,Desirae Negron,Marcus Plumlee,Emily Grace Sarver-Wolf,Lesley Sneed,Cassie Walters,Lucy Weakley,2011 In the Fall of 2010 I gave an assignment in my Appalachian Literature class at Berea College, telling my students to write their own version of Where I'm From poem based on the writing prompt and poem by George Ella Lyon, one of the preeminent Appalachian poets. I was so impressed by the results of the assignment that I felt the poems needed to be preserved in a bound document. Thus, this little book. These students completely captured the complexities of this region and their poems contain all the joys and sorrows of living in Appalachia. I am proud that they were my students and I am very proud that together we produced this record of contemporary Appalachian Life -- Silas House

Trap Kitchen Malachi Jenkins,Roberto Smith,Marisa Mendez,2017-12-12 Jenkins and Smith, who once belonged to rival L.A. gangs, became friends and started a catering business marketed solely on Instagram. Media outlets took notice, as did Snoop Dogg and Martha Stewart, paving the way for their debut cookbook – Publishers Weekly When two former members of Los Angeles' most nefarious rival gangs decided to unite under one oven, they had no idea that they would be creating an empire. Trap Kitchen is more than just a cookbook. It's a glimpse into the meals that have now become famous in the LA streets thanks to the series of pop-up restaurants that continue to bloom throughout the area. Celebrities and residents alike flock to the locations for soulful meals, but it's more than that. Having lost friends and family to violence, we learn how the masterminds behind Trap Kitchen sought to change the paths they were on, using cooking as their driving force. While other cookbooks may boast a level of urban-skewed appeal in their realness, this cookbook also delves into the stories of why they became involved in cooking in the first place. It's both a heartfelt and stomach-filling experience to learn how two men changed their stars by seeking out peace and good food for themselves and their community.

With 400 gorgeously photographed cut flowers organized to span the full spectrum of shades, Flower Colour Guide is the essential tool for flower selection and arrangement, and a primer to understanding and appreciating flowers and colour. Brief Light Sally Thomas,2012-11 Brief Light is a collection of short poems meditating on human experience, largely but not exclusively through traditional poetic forms. Their bent is simultaneously lyric and narrative, as if novels had been compressed into fourteen lines and peopled by quiet, inward-looking characters. A reader writes, Sally Thomas is one of the best American poets writing. Her direct language, skillful use of irony, mastery of form, and quietly compassionate voice combine to give her work a humane ethos absent from much contemporary poetry and sorely needed in our world today.

Image - Action - Space Luisa Feiersinger,Kathrin Friedrich,Moritz Queisner,2018-10-08 Screen-based media, such as touch-screens, navigation systems and virtual reality applications merge images and operations. They turn viewing first and foremost into using and reflect the turn towards an active role of the image in guiding a user's action and perception. From professional environments to everyday life multiple configurations of screens organise working routines, structure interaction, and situate users in space both within and beyond the boundaries of the screen. This volume examines the linking of screen, space, and operation in fields such as remote navigation, architecture, medicine, interface design, and film production asking how the interaction with and through screens structures their users' action and perception.

Surveillance Valley Yasha Levine,2018-02-06 The internet is the most effective weapon the government has ever built. In this fascinating book, investigative reporter Yasha Levine uncovers the secret origins of the internet, tracing it back to a Pentagon counterinsurgency surveillance project. A visionary intelligence officer, William Godel, realized that the key to winning the war in Vietnam was not outgunning the enemy, but using new information technology to understand their motives and anticipate their movements. This idea -- using computers to spy on people and groups perceived as a threat, both at home and abroad -- drove ARPA to develop the internet in the 1960s, and continues to be at the heart of the modern internet we all know and use today. As Levine shows, surveillance wasn't something that suddenly appeared on the internet; it was woven into the fabric of the technology. But this isn't just a story about the NSA or other domestic programs run by the government. As the book spins forward in time, Levine examines the private surveillance business that powers tech-industry giants like Google, Facebook, and Amazon, revealing how these companies spy on their users for profit, all while doing double duty as military and intelligence contractors. Levine shows that the military and Silicon Valley are effectively inseparable: a military-digital complex that permeates everything connected to the internet, even coopting and weaponizing the antigovernment privacy movement that sprang up in the wake of Edward Snowden. With deep research, skilled storytelling, and provocative arguments, Surveillance Valley will change the way you think about the news -- and the device on which you read it.

Fundamentals of Air Pollution 2e Arthur C. Stern,1984-05-28 Fundamentals of Air Pollution, Second Edition discusses the basic chemistry, physics, and engineering of air pollution. This edition explores the processes and equipment that produce less pollution in the atmosphere. This book is comprised of six parts encompassing 28 chapters. This text starts with an overview of the predominant air pollution problems during the Industrial Revolution, including smoke and ash produced by burning oil or coal in the boiler furnaces of power plants, marine vessels, and locomotives. This edition then explores the mathematical models of atmospheric transport and diffusion and discusses the air pollution control in communities. Other chapters deal with atmospheric chemistry, control technology, and visibility through the atmosphere. This book further examines the regulatory concepts that have become more significant, such as the bubble concept, air quality, emission standards, and the trading and banking of emission rights. Air pollution scientists, atmospheric scientists, ecologists, engineers, educators, researchers, and students will find this book extremely useful.

The Chaos Scenario Bob Garfield,2009 What happens when the old mass media/mass marketing model collapses and the Brave New World is unprepared to replace it? In this fascinating, terrifying, instructive and often hilarious book, Bob Garfield of NPR and Ad Age, chronicles the disintegration of traditional media and marketing but also travels five continents to discover how business can survive--and thrive--in a digitally connected, Post-Media Age. He calls this the art and science of Listenomics. You should listen, too.

The Five Senses Michel Serres,2016-10-20 Marginalized by the scientific age the lessons of the senses have been overtaken by the dominance of language and the information revolution. With The Five Senses Serres

traces a topology of human perception, writing against the Cartesian tradition and in praise of empiricism, he demonstrates repeatedly, and lyrically, the sterility of systems of knowledge divorced from bodily experience. The fragile empirical world, long resistant to our attempts to contain and catalog it, is disappearing beneath the relentless accumulations of late capitalist society and information technology. Data has replaced sensory pleasure, we are less interested in the taste of a fine wine than in the description on the bottle's label. What are we, and what do we really know, when we have forgotten that our senses can describe a taste more accurately than language ever could? The book won the inaugural Prix Médicis Essai in 1985. The Revelations edition includes an introduction by Steven Connor.

Up and Down California in 1860-1864 William Henry Brewer,1974 The journal seems to contain information for everyone regardless of one's interest...Each page of this almost six hundred page journal is crammed with facts and descriptions. So much of interest is contained in every entry that each re-reading will reveal many interesting incidents or observations not quite grasped on the first perusal....This book will be a valuable source to all students of California or United States history and to the casual readers as well.

Soil and Culture Edward R. Landa,Christian Feller,2010-01-28 SOIL: beneath our feet / food and fiber / ashes to ashes, dust to dust / dirt!Soil has been called the final frontier of environmental research. The critical role of soil in biogeochemical processes is tied to its properties and place—porous, structured, and spatially variable, it serves as a conduit, buffer, and transformer of water, solutes and gases. Yet what is complex, life-giving, and sacred to some, is ordinary, even ugly, to others. This is the enigma that is soil. Soil and Culture explores the perception of soil in ancient, traditional, and modern societies. It looks at the visual arts (painting, textiles, sculpture, architecture, film, comics and stamps), prose & poetry, religion, philosophy, anthropology, archaeology, wine production, health & diet, and disease & warfare. Soil and Culture explores high culture and popular culture—from the paintings of Hieronymus Bosch to the films of Steve McQueen. It looks at ancient societies and contemporary artists. Contributors from a variety of disciplines delve into the mind of Carl Jung and the bellies of soil eaters, and explore Chinese paintings, African mud cloths, Mayan rituals, Japanese films, French comic strips, and Russian poetry.

The Values of Independent Hip-Hop in the Post-Golden Era Christopher Vito,2019-02-08 Utilizing a mixed-methods approach, this book uncovers the historical trajectory of U.S. independent hip-hop in the post-golden era, seeking to understand its complex relationship to mainstream hip-hop culture and U.S. culture more generally. Christopher Vito analyzes the lyrics of indie hip-hop albums from 2000-2013 to uncover the dominant ideologies of independent artists regarding race, class, gender, sexual orientation, and social change. These analyses inform interviews with members of the indie hip-hop community to explore the meanings that they associate with the culture today, how technological and media changes impact the boundaries between independent and major, and whether and how this shapes their engagement with oppositional consciousness. Ultimately, this book aims to understand the complex and contradictory cultural politics of independent hip-hop in the contemporary age.
