The Alignment Problem: Machine Learning and Human Values Brian Christian, 2020-10-06 A jaw-dropping exploration of everything that goes wrong when we build AI systems and the movement to fix them. Today's "machine-learning" systems, trained by data, are so effective that we've invited them to see and hear for us—and to make decisions on our behalf. But alarm bells are ringing. Recent years have seen an eruption of concern as the field of machine learning advances. When the systems we attempt to teach will not, in the end, do what we want or what we expect, ethical and potentially existential risks emerge. Researchers call this the alignment problem. Systems cull résumés until, years later, we discover that they have inherent gender biases. Algorithms decide bail and parole—and appear to assess Black and White defendants differently. We can no longer assume that our mortgage application, or even our medical tests, will be seen by human eyes. And as autonomous vehicles share our streets, we are increasingly putting our lives in their hands. The mathematical and computational models driving these changes range in complexity from something that can fit on a spreadsheet to a complex system that might credibly be called "artificial intelligence." They are steadily replacing both human judgment and explicitly programmed software. In best-selling author Brian Christian's riveting account, we meet the alignment problem's "first-responders," and learn their ambitious plan to solve it before our hands are completely off the wheel. In a masterful blend

of history and on-the ground reporting, Christian traces the explosive growth in the field of machine learning and surveys its current, sprawling frontier. Readers encounter a discipline finding its legs amid exhilarating and sometimes terrifying progress. Whether they—and we—succeed or fail in solving the alignment problem will be a defining human story. The Alignment Problem offers an unflinching reckoning with humanity's biases and blind spots, our own unstated assumptions and often contradictory goals. A dazzlingly interdisciplinary work, it takes a hard look not only at our technology but at our culture—and finds a story by turns harrowing and hopeful.

Reality's Edge Joseph McGuire, 2019-08-22 Hyper-reality. The area between the thriving mass of humanity known as the Sprawl and the digital refuge of Cyberspace. This is your playground. As a Showrunner, you can see and manipulate the flow of digital data through the real world – for you, reality is limitless. Welcome to Reality's Edge, a skirmish wargame set in a dystopian cyberpunk future, where players take on the roles of Showrunners – mercenary hackers who lead small teams of trusted operatives and disposable freelancers. Funded by shadow backers, the Showrunners accept jobs from faceless clients for profit, glory, and better chrome... always better chrome. Battles take place in the concrete jungle known as the Sprawl, but Showrunners must remain wary of the threat posed by Cyberspace. Hacking is pivotal to the game, with data nodes, robots, machines, and even enemy chrome presenting potential targets for a cunning Console Cowboy. In an ongoing campaign, each skirmish offers you the opportunity to earn experience and equipment, from advanced weaponry and synthetics to cyber-implants, biological enhancements, clones, and much more. This is a world obsessed with whether something can be done, not whether it should.

The Mechanical Smile Caroline Evans, 2013 A superlative study of the roots of the modern fashion show In the early 20th century, the desire to see clothing in motion flourished on both sides of the Atlantic: models tangoed, slithered, swaggered, and undulated before customers in couture houses and

department stores. The Mechanical Smile traces the history of the earliest fashion shows in France and the United States from their origins in the 1880s to 1929, situating them in the context of modernism and the rationalization of the body. Fashion shows came into being concurrently with film, and this book explores the connections between fashion and early cinema, which arguably functioned as what Walter Benjamin called new velocities--forces that altered the rhythms of modern life. Using significant new archival evidence, The Mechanical Smile shows how so-called mannequin parades employed the visual language of modernism to translate business and management methods into visual seduction. Caroline Evans, a leading fashion historian, argues for an expanded definition of modernism as both gestural and performative, drawing on literary and performance theory rather than relying on art and design history. The fashion show, Evans posits, is a singular nodal point where the disparate histories of commerce, modernism, gender, and the body converge.

Surfing Uncertainty Andy Clark, 2016 This title brings together work on embodiment, action, and the predictive mind. At the core is the vision of human minds as prediction machines - devices that constantly try to stay one step ahead of the breaking waves of sensory stimulation, by actively predicting the incoming flow. In every situation we encounter, that complex prediction machinery is already buzzing, proactively trying to anticipate the sensory barrage. The book shows in detail how this strange but potent

strategy of self-anticipation ushers perception, understanding, and imagination simultaneously onto the cognitive stage.

American Gypsy Oksana Marafioti, 2012-07-03 Recounts the author's early experiences as a fifteen-year-old Gypsy emigrating with her family from the Soviet Union to the United States.

Universal Economics Armen Albert Alchian, William Richard Allen, 2018
Universal Economics is a new work that bears a strong resemblance to its two predecessors, University Economics (1964, 1967, 1972) and Exchange and Production (1969, 1977, 1983). Collaborating again, Professors Alchian and Allen have written a fresh presentation of the analytical tools employed in the economic way of thinking. More than any other principles textbook, Universal Economics develops the critical importance of property rights to the existence and success of market economies. The authors explain the interconnection between goods prices and productive-asset prices and how market-determined interest rates bring about the allocation of resources toward the satisfaction of consumption demands versus saving/investment priorities. They show how the crucial role of prices in a market economy cannot be well understood without a firm grasp of the role of money in a modern world. The Alchian and Allen application of information and search-cost analysis to the subject of money, price determination, and inflation is unique in the teaching of economic principles. No one has ever done price theory better than Alchian -- that is, no one has ever excelled Alchians

ability to explain the reason, role, and nuances of prices, of competition, and of property rights. And only a precious few -- I can count them on my fingers -- have a claim for being considered to have done price theory as well as he did it. -- Donald Boudreaux, George Mason University. Armen A. Alchian (1914-2013), one of the twentieth century's great teachers of economic science, taught at UCLA from 1958 to 1984. Founder of the UCLA tradition in economics, he has become recognized as one of the most influential voices in the areas of market structure, property rights, and the theory of the firm. William R. Allen taught at Washington University prior to joining the UCLA faculty in 1952. Along with research primarily in international economics and the history of economic theory, he has concentrated on teaching economics. Universal Economics is his third textbook collaboration with Armen Alchian. Jerry L. Jordan wrote his doctoral dissertation under the direction of Armen Alchian. He was Dean of the School of Management at the University of New Mexico, a member of President Reagan's Council of Economic Advisors and of the U.S. Gold Commission, Director of Research of the Federal Reserve Bank of Saint Louis, and President and CEO of the Federal Reserve Bank of Cleveland.

Camera Lucida Roland Barthes, 1981 Examining the themes of presence and absence, the relationship between photography and theatre, history and death, these 'reflections on photography' begin as an investigation into the nature of photographs. Then, as Barthes contemplates a photograph of his mother as a child, the book becomes an exposition of his own mind.--Alibris.

Mind and Emotions Matthew McKay, Patrick Fanning, Patricia E. Zurita Ona, 2011-07-01 We all have our own ways of handling stressful situations without letting emotions get the best of us, but some ways of coping work better than others. Short-term fixes that help us avoid or numb our emotions may temporarily alleviate sadness and anger, but can also end up causing anxiety, depression, chronic anger, and even physical health problems. If you struggle with overwhelming emotions and feel trapped by unhealthy patterns, this workbook is your ticket out. Mind and Emotions is a revolutionary universal treatment program for all emotional disorders that helps you discover which of the seven problematic coping styles is keeping you trapped in a cycle of emotional pain. Instead of working on difficulties like anxiety, anger, shame, and depression one by one, you'll treat the root of all your emotional suffering at once. Drawing on evidence-based skills from cognitive behavioral therapy, acceptance and commitment therapy, and dialectical behavior therapy, this workbook offers all the techniques you need to manage unwelcome feelings in effective and productive ways. Learn and practice the most effective coping skills: Clarifying and acting on your core values Mindfulness and acceptance Detaching from negative thoughts Self-soothing and relaxation exercises Assertiveness and interpersonal skills Gradually facing your strong emotions This book has been awarded The Association for Behavioral and Cognitive Therapies Self-Help Seal of Merit – an award bestowed on outstanding self-help books that are consistent with

cognitive behavioral therapy (CBT) principles and that incorporate scientifically tested strategies for overcoming mental health difficulties.

Models.Behaving.Badly. Emanuel Derman, 2011-10-25 Now in paperback, “a compelling, accessible, and provocative piece of work that forces us to question many of our assumptions” (Gillian Tett, author of Fool’s Gold). Quants, physicists working on Wall Street as quantitative analysts, have been widely blamed for triggering financial crises with their complex mathematical models. Their formulas were meant to allow Wall Street to prosper without risk. But in this penetrating insider’s look at the recent economic collapse, Emanuel Derman—former head quant at Goldman Sachs—explains the collision between mathematical modeling and economics and what makes financial models so dangerous. Though such models imitate the style of physics and employ the language of mathematics, theories in physics aim for a description of reality—but in finance, models can shoot only for a very limited approximation of reality. Derman uses his firsthand experience in financial theory and practice to explain the complicated tangles that have paralyzed the economy. Models.Behaving.Badly. exposes Wall Street’s love affair with models, and shows us why nobody will ever be able to write a model that can encapsulate human behavior.

White Space Is Not Your Enemy Kim Golombisky, Rebecca Hagen, 2017-02-17 White Space Is Not Your Enemy is a practical graphic design and layout guide that introduces concepts and practices necessary for producing effective visual

communication across a variety of formats—from web to print. Sections on Gestalt theory, color theory, and WET layout are expanded to offer more in-depth content on those topics. This new edition features new covering current trends in web design—Mobile-first, UI/UX design, and web typography—and how they affect a designer’s approach to a project. The entire book will receive an update using new examples and images that show a more diverse set of graphics that go beyond print and web and focus on tablet, mobile and advertising designs.

The Powers Girls John Robert Powers, 2013-10 This is a new release of the original 1941 edition.

Showstopper! G. Pascal Zachary, 2014-04-01 This “inside account captures the energy—and the madness—of the software giant’s race to develop a critical new program. . . . Gripping” (Fortune Magazine). Showstopper is the dramatic, inside story of the creation of Windows NT, told by Wall Street Journal reporter G. Pascal Zachary. Driven by the legendary David Cutler, a picked band of software engineers sacrifices almost everything in their lives to build a new, stable, operating system aimed at giving Microsoft a platform for growth through the next decade of development in the computing business. Comparable in many ways to the Pulitzer Prize-winning book *The Soul of a New Machine* by Tracy Kidder, Showstopper gets deep inside the process of software development, the lives and motivations of coders and the pressure to succeed coupled with the drive for originality and perfection that can pull a diverse

team together to create a program consisting of many hundreds of thousands of lines of code.

Prune Gabrielle Hamilton,2014-11-04 NEW YORK TIMES BESTSELLER From Gabrielle Hamilton, bestselling author of *Blood, Bones & Butter*, comes her eagerly anticipated cookbook debut filled with signature recipes from her celebrated New York City restaurant Prune. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY PUBLISHERS WEEKLY NAMED ONE OF THE BEST BOOKS OF THE SEASON BY Time • O: The Oprah Magazine • Bon Appétit • Eater A self-trained cook turned James Beard Award-winning chef, Gabrielle Hamilton opened Prune on New York's Lower East Side fifteen years ago to great acclaim and lines down the block, both of which continue today. A deeply personal and gracious restaurant, in both menu and philosophy, Prune uses the elements of home cooking and elevates them in unexpected ways. The result is delicious food that satisfies on many levels. Highly original in concept, execution, look, and feel, the Prune cookbook is an inspired replica of the restaurant's kitchen binders. It is written to Gabrielle's cooks in her distinctive voice, with as much instruction, encouragement, information, and scolding as you would find if you actually came to work at Prune as a line cook. The recipes have been tried, tasted, and tested dozens if not hundreds of times. Intended for the home cook as well as the kitchen professional, the instructions offer a range

of signals for cooks—a head’s up on when you have gone too far, things to watch out for that could trip you up, suggestions on how to traverse certain uncomfortable parts of the journey to ultimately help get you to the final destination, an amazing dish. Complete with more than with more than 250 recipes and 250 color photographs, home cooks will find Prune’s most requested recipes—Grilled Head-on Shrimp with Anchovy Butter, Bread Heels and Pan Drippings Salad, Tongue and Octopus with Salsa Verde and Mimosa’d Egg, Roasted Capon on Garlic Crouton, Prune’s famous Bloody Mary (and all 10 variations). Plus, among other items, a chapter entitled “Garbage”—smart ways to repurpose foods that might have hit the garbage or stockpot in other restaurant kitchens but are turned into appetizing bites and notions at Prune. Featured here are the recipes, approach, philosophy, evolution, and nuances that make them distinctively Prune’s. Unconventional and honest, in both tone and content, this book is a welcome expression of the cookbook as we know it. Praise for Prune “Fresh, fascinating . . . entirely pleasurable . . . Since 1999, when the chef Gabrielle Hamilton put Triscuits and canned sardines on the first menu of her East Village bistro, Prune, she has nonchalantly broken countless rules of the food world. The rule that a successful restaurant must breed an empire. The rule that chefs who happen to be women should unconditionally support one another. The rule that great chefs don’t make great writers (with her memoir, Blood, Bones & Butter). And now, the rule that restaurant food has to be simplified and prettied up for

home cooks in order to produce a useful, irresistible cookbook. . . . [Prune] is the closest thing to the bulging loose-leaf binder, stuck in a corner of almost every restaurant kitchen, ever to be printed and bound between cloth covers. (These happen to be a beautiful deep, dark magenta.)"—The New York Times "One of the most brilliantly minimalist cookbooks in recent memory . . . at once conveys the thrill of restaurant cooking and the wisdom of the author, while making for a charged reading experience."—Publishers Weekly (starred review)

The Relive Box and Other Stories T.C. Boyle, 2017-10-03 While T.C. Boyle is known as one of our greatest American novelists, he is also an acknowledged master of the short story and is perhaps at his funniest, his most moving, and his most surprising in the short form. In *The Relive Box*, Boyle's sharp wit and rich imagination combine with a penetrating social consciousness to produce raucous, poignant, and expansive short stories defined by an inimitable voice. From the collection's title story, featuring a Halcom X1520 Relive Box that allows users to experience anew almost any moment from their past to *The Five-Pound Burrito*, the tale of a man aiming to build the biggest burrito in town, the twelve stories in this collection speak to the humor, the pathos, and the struggle that is part of being human while relishing the whimsy of wordplay and the power of a story well told. In stories that span a variety of styles and genres, Boyle addresses the enduring concerns of the human mind and heart while taking on timely social concerns. *The Relive Box*

is an exuberant, linguistically dazzling effort from a vibrant sensibility fully engaged with American society. (The New York Times)

Guzziology Version 9 Dave Richardson,2018-12-03 Guzziology has been called the bible for owning, operating, maintaining, servicing, repairing, updating, and modifying Moto Guzzi motorcycles. It has been continually updated for over a quarter of a century. Author Dave Richardson has 34 years of experience working in Moto Guzzi dealerships. Best Damn Garage in Town Henry Yunick,2003-07 Smokey Yunick, the world's most famous mechanic, accomplished more in one life than most people could in five. He flew 50 missions as a B-17 pilot during WWII. He was an integral part of the birth of stock car racing and ran open wheel cars during the glory days of the Indy 500. He spent years in the jungles of Ecuador and held 10 patents. Smokey was concerned for the future so he developed more efficient and powerful engines for passenger cars and safer crash barriers for race tracks. These are the real stories of racing and everything automotive in America - told by someone who was there every step of the way!

MiniEco Kate Lilley,2013 MiniEco is the sensational craft blog of Kate Lilley. With over 250,000 followers it has taken on cult status in the

international craft community, and that is purely down to Kates fresh, contemporary and beautifully explained and executed craft projects. With a book for children already under her belt, this publication focuses more on adults with 33 pieces including paper gems, an origami lampshade, macrame hangings, pop-up pixel cards, hama bead candle holders, and tie-dyed furoshiki cloths. The ideas range in complexity from the simple to the advanced, but each one is totally unique and has never before been published. The look of the book will reflect the immaculate, Japanese-inflected minimalism of the MiniEco website, with some high-end production finishes including a die-cut, dust-jacketed paperback binding and boldly pared-back photography. QR codes will link to animated gifs of the craft being made.
