Robin and Lucienne Day Lesley Jackson,2001-03 Hailed as the British counterparts to Charles and Ray Eames, Robin and Lucienne Day electrified the

British design scene in the 1950s with their startling furniture and textile designs. Indeed, their influence over the next five decades has been so profound that their early products were recently reintroduced by Conran's Habitat. Robin Day's influential furniture designs pioneered the use of materials such as plywood, steel, and plastic. His stacking polypropylene chair (right) is one of the best-selling chairs in the world. Robin and Lucienne Day, the first-ever full-length monograph on their designs, features never-before-seen archival material along with over 250 color images of the full range of their work, including furniture, ceramics, textiles, wallpaper, interiors, appliances, exhibit designs, and graphics. ADP-Ribosylating Toxins Klaus Aktories, 2012-12-06 ADP-ribosylating toxins have been the focus of intensive research for more than 30 years. Researchers from diverse fields of science have taken an interest in these bacterial toxins; they are studied, for example, by microbiologists, biochemists, cell biologists, and pharmacologists. There are two principal reasons for the broad and still growing interest in ADP ribosylating toxins. First, insights into the structure and functions of the toxins might be the key to prevention and treatment of diseases caused by the toxin-producing infectious micro organisms. Second, the ADP-

ribosylating toxins provide potent and often unique pharmacological tools for the study of the physiological functions of their target proteins. The latter is especially the case with cholera and pertussis toxins, which both modify the IX-subunits of heterotrimeric G-proteins involved in signal transduction pathways. These toxins have proved invaluable in extending our basic understanding of the regulation of hormone-controlled signal transduction. This volume provides a review and an update of recent studies on the basic properties of bacterial ADP-ribosylating toxins and/or exoenzymes. Our current knowledge of the cellular entry mechanisms of ADP-ribosylating toxins is reviewed by MADSHUS and STENMARK. WILSON and COLLIER then deal with recent insights into the enzyme mechanism and active site structure of diphtheria toxin and *Pseudomonas aeruginosa* exotoxin A, which modify elongation factor 2. Toxins which ADP-ribosylate heterotrimeric G-proteins involved in transmembrane signal transduction are the subject of the next two chapters.

Awake in the World Michael Stone,2011-06-07 How can we live a balanced life in unbalanced times? How can the practices of meditation and yoga support our relationships, our work lives, and the greater good? Author, teacher, and psychotherapist Michael Stone presents the essential insights of mindfulness and

yoga, emphasizing the teachings of simplicity and the interdependence of all life. Stone explains that the practices of yoga and meditation are not about escaping reality but about living fully in the here and now, opening to our experience, and gaining access to stillness within the flow of life. The essence of yoga and Buddhist practice is opening the heart—our own and the heart of the world.
