**The General Grant's Gold** Madelene Fergusson  
Allen, Ken Scadden, 2009-04 The wreck in 1866 of the General Grant in the desolate sub-Antarctic Auckland Islands is one of the world's great nautical mysteries, a story that still tantalises and thrills. When the ship was crushed in a cave beneath a sheer cliff face, a few crew members and a handful of passengers managed to escape in a lifeboat. For more than two years they lived a hand-to-mouth existence on a nearby island before they were rescued. This story is extraordinary in itself, but soon compelling legends spread that the ship had sunk with a fabulous hoard of gold from the Victorian goldfields. For 140 years, expeditions and bounty hunters have searched for the ship and her elusive cargo. In the relentless seas of the Auckland Islands, it has been a soul-destroying endeavour. Locating the vessel has been difficult enough; finding the gold has proved impossible – unless one of those early expeditions really did find it ... In this book Madelene Fergusson Allen and Ken Scadden tell the full story of the voyage from Melbourne, the shipwreck, the plight of the castaways and the search for the gold. At this distance in time, separating the facts from the legends is difficult, but they have scrupulously researched the events of the shipwreck and examined every subsequent search for the gold. The story is more remarkable than fiction, a tale of heroes and cads, heartbreak and loss, hope and despair, hunger and greed. As it

has bewitched so many in the past, so it will haunt readers long after the last page is turned.

**Antarctic Ecosystems** Alex D. Rogers, Nadine M. Johnston, Eugene J. Murphy, Andrew Clarke, 2012-03-12  
Since its discovery Antarctica has held a deep fascination for biologists. Extreme environmental conditions, seasonality and isolation have led to some of the most striking examples of natural selection and adaptation on Earth. Paradoxically, some of these adaptations may pose constraints on the ability of the Antarctic biota to respond to climate change. Parts of Antarctica are showing some of the largest changes in temperature and other environmental conditions in the world. In this volume, published in association with the Royal Society, leading polar scientists present a synthesis of the latest research on the biological systems in Antarctica, covering organisms from microbes to vertebrate higher predators. This book comes at a time when new technologies and approaches allow the implications of climate change and other direct human impacts on Antarctica to be viewed at a range of scales; across entire regions, whole ecosystems and down to the level of species and variation within their genomes. Chapters address both Antarctic terrestrial and marine ecosystems, and the scientific and management challenges of the future are explored.

Moon-face and Other Stories Jack London, 1906  
JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up

in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Gattani, 2021-01-27 To uphold family honor and tradition, Sheetal Prasad is forced to forsake the man she loves and marry playboy millionaire Rakesh Dhanraj while the citizens of Raigun, India, watch in envy. On her wedding night, however, Sheetal quickly learns that the stranger she married is as cold as the marble floors of the Dhanraj mansion. Forced to smile at family members and cameras and pretend there's nothing wrong with her marriage, Sheetal begins to discover that the family she married into harbors secrets, lies and deceptions powerful enough to tear apart her world. With no

one to rely on and no escape, Sheetal must ally with her husband in an attempt to protect her infant son from the tyranny of his family.sion.

**Bioremediation of Petroleum Hydrocarbons in Cold Regions** Dennis M. Filler,Ian Snape,David L.

Barnes,2012-10-04 This guide to bioremediation in cold regions is designed to aid environmental practitioners, industry, and regulators in the remediation of petroleum spills and contaminated sites in cold regions. Remediation design and technology used in temperate climates does not necessarily work in cold climates, and cleanup takes longer due to shorter treatment seasons, sub-freezing temperatures, ground freezing and thawing, and limited bioactivity. Environmental engineers and scientists from eight countries working in the polar regions combine their experiences and expertise with petroleum contamination to write this book. It contains in-depth discussions on regulations, freezing and frozen ground, identification and adaptations of cold-tolerant bacteria, contaminant transport in cold soils and permafrost, temperature effects on biodegradation, analytical methods, treatability studies, and nutritional requirements for bioremediation. Emphasis is given to practical and effective bioremediation methods for application in cold regions. Emerging technologies are also discussed.

*Extremes* Keith Rodney Benson, Helen M. Rozwadowski, 2007 The long-standing Western fascination with the polar regions resonates anew with the growing concerns over global climate change. Scientists exploring the role of the extremem latitudes now recognize the importance of polar oceans and sea ice for our climate. While the exploits of polar explorer's efforts to comprehend the polar oceans are for the first time chronicled in this volume.

*Polar Microbiology* Asim K. Bej, Jackie Aislabie, Ronald M. Atlas, 2009-12-23 Pollution has accompanied polar exploration since Captain John Davis' arrival on the Antarctic continent in 1821 and has become an unavoidable consequence of oil spills in our polar regions. Fortunately, many of the organisms indigenous to Polar ecosystems have the ability to degrade pollutants. It is this metabolic capacity that forms the basis for bioremediation as a potential treatment for the hydrocarbons that contaminate the pristine polar environments. The only book to cover the breadth of microbial ecology and diversity in polar regions with an emphasis on bioremediation, *Polar Microbiology: The Ecology, Biodiversity, and Bioremediation Potential of Microorganisms in Extremely Cold Environments* examines the diversity of polar microorganisms and their ability to degrade petroleum hydrocarbon contaminants in polar terrestrial and aquatic environments. Providing a unique perspective of these microorganisms in extremely cold temperatures, the

book focuses on their taxonomy, physiology, biochemistry, population structure, bioremediation potential, and potential for biotechnology applications. Leading investigators in the field provide complete coverage of the microbiology relevant to the study of biodiversity and biodegradation of pollutants in the Arctic and Antarctic, including: Microbial extremophiles living in cold and subzero temperature environments Genetics and physiology of cold adaptation of microorganisms Biodegradative microbial consortia in a defined closed environment Molecular characterization of biodegradative microbial populations Molecular approaches to assess biodegradation of petroleum hydrocarbons Environmental impact of hydrocarbon contamination Microbial biodiversity across Antarctic deserts By bringing together the current state of scientific knowledge and research on microbial community structures in extremely cold temperatures, this thought provoking resource is the ideal starting point for the research that must be done if we are to effectively reduce human's eco-footprint on our polar regions.

In a Crystal Land Dean Beeby, 1994 From a Victorian expedition (1899-1900) that was the first to winter on the continent, to the first multinational assault on Antarctica; from a windswept encampment named Camp Winnipeg to the 'crystalline chambers and sapphire corridors' of the Ross Ice Shelf, Dean Beeby animates a wealth of research uncovering tales of bravery and madness, heartbreak and revelry. In a Crystal Land restores these Canadians to their rightful place

in the history of Antarctic exploration.

Business Rules Management and Service Oriented Architecture Ian Graham, 2007-02-06 Business rules management system (BRMS) is a software tools that work alongside enterprise IT applications. It enables enterprises to automate decision-making processes typically consisting of separate business rules authoring and rules execution applications. This proposed title brings together the following key ideas in modern enterprise system development best practice. The need for service-oriented architecture (SOA). How the former depends on component-based development (CBD). Database-centred approaches to business rules (inc. GUIDES). Knowledge-based approaches to business rules. Using patterns to design and develop business rules management systems Ian Graham is an industry consultant with over 20 years. He is recognized internationally as an authority on business modelling, object-oriented software development methods and expert systems. He has a significant public presence, being associated with both UK and international professional organizations, and is frequently quoted in the IT and financial press.

**Future Asian Space** Erwin Viray, Davisi Boontharm, Limin Hee, 2012-01-01 Rapid technological, economic, social and cultural changes are transforming the idea of Asian space. With the shift to a global economy and an urban population explosion, Asian cities have become a mainstay of progress, national pride, identity, and positioning on the global stage. The extraordinary pace and intensity of the changes

have created a situation unique in the history of urban development. Despite the immense diversity of Asian countries, Asia-ness is often treated as a distinctive quality that has emerged from unique recent circumstances affecting Asian urbanizations as a whole. In *Future Asian Space*, 15 authors explore broad concepts relating to the creation and re-creation of Asian space and contemporary Asian identity, and their examination of different sites and research approaches highlights the difficulty of pinpointing what Asia-ness is, or might become. Appropriate design and planning of cities is a critical element in building a sustainable future and coping with environmental, social and cultural problems. *Future Asian Space* is designed to stimulate interests and engagement in discussions of the Asian city, and its trajectories in architecture and urbanism, but the authors' conclusions will intrigue anyone interested in the future of cities and urban life in Asia.

A History of Sports Highlights Ray Gamache, 2010-07-08 This book traces the development and popularity of the sportscast highlight—the dominant news frame in the crowded medium of electronic sports journalism—as the primary means of communicating about sports and athletes. It explores the intricate relationships among media producers, sports leagues and organizations, and audiences, and explains that sportscast highlights are not a recent development, given their prominent use within a news context in every medium from early news film actualities and newsreels to network and cable

television to today's new media platforms.

I Have a Dog Charlotte Lance,2014-05-01 I have a dog. An inconvenient dog. When I wake up, my dog is inconvenient. When I'm getting dressed, my dog is inconvenient. And when I'm making tunnels, my dog is SUPER inconvenient. But sometimes, an inconvenient dog can be big and warm and cuddly. Sometimes, an inconvenient dog can be the most comforting friend in the whole wide world.

*Antarctic Subglacial Aquatic Environments* Martin J. Siegert,Mahlon C. Kennicutt, II,Robert A. Bindshadler,2011-01-10 Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 192. Antarctic Subglacial Aquatic Environments is the first volume on this important and fascinating subject. With its underlying theme of bridging existing knowledge to future research, it is a benchmark in the history of subglacial lake exploration and study, containing up-to-date discussions about the history and background of subglacial aquatic environments and future exploration. The main topics addressed are identification, location, physiography, and hydrology of 387 subglacial lakes; protocols for environmental stewardship and protection of subglacial lake environments; details of three programs aiming to explore Vostok Subglacial Lake, Ellsworth Subglacial Lake, and Whillans Subglacial Lake over the next 3–5 years; assessment of technological requirements for exploration programs based on best practices for environmental stewardship and scientific success; and knowledge of subglacial lakes as habitats for

microbial life and as recorders of past climate and ice sheet change. Its uniqueness, breadth, and inclusiveness will appeal to microbiologists and those interested in life in extreme environments, paleoclimatologists and those interested in sedimentary records of past changes, glaciologists striving to understand how water beneath glaciers affects their flow, and those engaged in developing technology to undertake direct measurement and sampling of extreme environments on Earth and in the solar system.
