Jack London

Moon-face and Other Stories Jack London,1906

JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Duty and Desire Book Club Edition Anju

Gattani,2021-01-27 To uphold family honor and tradition, Sheetal Prasad is forced to forsake the man she loves and marry playboy millionaire Rakesh Dhanraj while the

citizens of Raigun, India, watch in envy. On her wedding night, however, Sheetal quickly learns that the stranger she married is as cold as the marble floors of the Dhanraj mansion. Forced to smile at family members and cameras and pretend there's nothing wrong with her marriage, Sheetal begins to discover that the family she married into harbors secrets, lies and deceptions powerful enough to tear apart her world. With no one to rely on and no escape, Sheetal must ally with her husband in an attempt to protect her infant son from the tyranny of his family.sion.

The General Grant's Gold Madelene Fergusson Allen, Ken Scadden, 2009-04 The wreck in 1866 of the General Grant in the desolate sub-Antarctic Auckland Islands is one of the world's great nautical mysteries, a story that still tantalises and thrills. When the ship was crushed in a cave beneath a sheer cliff face, a few crew members and a handful of passengers managed to escape in a lifeboat. For more than two years they lived a hand-to-mouth existence on a nearby island before they were rescued. This story is extraordinary in itself, but soon compelling legends spread that the ship had sunk with a fabulous hoard of gold from the Victorian goldfields. For 140 years, expeditions and bounty hunters have searched for the ship and her elusive cargo. In the relentless seas of the Auckland Islands, it has been a soul-destroying endeavour. Locating the vessel has been difficult enough; finding the gold has proved impossible – unless one of those early expeditions really did find it ... In this book Madelene Ferguson Allen and Ken Scadden tell the full story of the voyage from Melbourne, the shipwreck, the plight of the castaways and the search for the gold. At this distance in time, separating the facts from the legends is difficult, but they have scrupulously researched the events of the shipwreck and examined every subsequent search

for the gold. The story is more remarkable than fiction, a tale of heroes and cads, heartbreak and loss, hope and despair, hunger and greed. As it has bewitched so many in the past, so it will haunt readers long after the last page is turned.

Antarctic Ecosystems Alex D. Rogers,Nadine M.

Johnston,Eugene J. Murphy,Andrew Clarke,2012-03-12

Since its discovery Antarctica has held a deep fascination for biologists. Extreme environmental conditions, seasonality and isolation have lead to some of the most striking examples of natural selection and adaptation on Earth. Paradoxically, some of these adaptations may pose constraints on the ability of the Antarctic biota to respond to climate change. Parts of Antarctica are showing some of the largest changes in temperature and other environmental conditions in the world. In this volume, published in association with the Royal Society, leading polar scientists present a synthesis of the latest research on the biological systems in Antarctica, covering organisms from microbes to vertebrate higher predators. This book comes at a time when new technologies and approaches allow the implications of climate change and other direct human impacts on Antarctica to be viewed at a range of scales; across entire regions, whole ecosystems and down to the level of species and variation within their genomes. Chapters address both Antarctic terrestrial and marine ecosystems, and the scientific and management challenges of the future are explored.

Business Rules Management and Service Oriented Architecture Ian Graham,2007-02-06 Business rules management system (BRMS) is a software tools that work alongside enterprise IT applications. It enables enterprises

to automate decision-making processes typically consisting of separate business rules authoring and rules execution applications. This proposed title brings together the following key ideas in modern enterprise system development best practice. The need for service-oriented architecture (SOA). How the former depends on component-based development (CBD). Database-centred approaches to business rules (inc. GUIDES). Knowledge-based approaches to business rules. Using patterns to design and develop business rules management systems

Ian Graham is an industry consultant with over 20 years. He is recognized internationally as an authority on business modelling, object-oriented software development methods and expert systems. He has a significant public presence, being associated with both UK and international professional organizations, and is frequently quoted in the IT and financial press.

Future Asian Space Erwin Viray, Davisi Boontharm, Limin Hee, 2012-01-01 Rapid technological, economic, social and cultural changes are transforming the idea of Asian space. With the shift to a global economy and an urban population explosion, Asian cities have become a mainstay of progress, national pride, identity, and positioning on the global stage. The extraordinary pace and intensity of the changes have created a situation unique in the history of urban development. Despite the immense diversity of Asian countries, Asia-ness is often treated as a distinctive quality that has emerged from unique recent circumstances affecting Asian urbanizations as a whole. In *Future Asian Space*, 15 authors explore broad concepts relating to the creation and re-creation of Asian space and contemporary Asian identity, and their examination of different sites and research approaches highlights the difficulty of pinpointing what Asia-ness is, or might

become. Appropriate design and planning of cities is a critical element in building a sustainable future and coping with environmental, social and cultural problems. Future Asian Space is designed to stimulate interests and engagement in discussions of the Asian city, and its trajectories in architecture and urbanism, but the authors' conclusions will intrigue anyone interested in the future of cities and urban life in Asia.

Bioremediation of Petroleum Hydrocarbons in Cold Regions Dennis M. Filler, Ian Snape, David L.

Barnes, 2012-10-04 This guide to bioremediation in cold regions is designed to aid environmental practitioners, industry, and regulators in the remediation of petroleum spills and contaminated sites in cold regions. Remediation design and technology used in temperate climates does not necessarily work in cold climates, and cleanup takes longer due to shorter treatment seasons, sub-freezing temperatures, ground freezing and thawing, and limited bioactivity. Environmental engineers and scientists from eight countries working in the polar regions combine their experiences and expertise with petroleum contamination to write this book. It contains in-depth discussions on regulations, freezing and frozen ground, identification and adaptations of cold-tolerant bacteria, contaminant transport in cold soils and permafrost, temperature effects on biodegradation, analytical methods, treatability studies, and nutritional requirements for bioremediation. Emphasis is given to practical and effective bioremediation methods for application in cold regions. Emerging technologies are also discussed.

Leadership for a Better World NCLP (National Clearinghouse for Leadership Programs), 2016-11-14 The essential guide to the theory and application of the Social Change Model Leadership for a Better World provides an

approachable introduction to the Social Change Model of Leadership Development (SCM), giving students a real-world context through which to explore the seven C's of leadership for social change as well as approaches to socially responsible leadership. From individual, group, and community values through the mechanisms of societal change itself, this book provides fundamental coverage of this increasingly vital topic. Action items, reflection, and discussion questions throughout encourage students to think about how these concepts apply in their own lives. The Facilitator's Guide includes a wealth of activities, assignments, discussions, and supplementary resources to enrich the learning experience whether in class or in the co-curriculum. This new second edition includes student self-assessment rubrics for each element of the model and new discussion on the critical roles of leadership self-efficacy, social perspective, and social justice perspectives. Content is enriched with research on how this approach to leadership is developed, and two new chapters situate the model in a broader understanding of leadership and in applications of the model. The Social Change Model is the most widely-used leadership model for college students, and has shaped college leadership curricula at schools throughout the U.S. and other countries including a translation in Chinese and Japanese. This book provides a comprehensive exploration of the model, with a practical, relevant approach to real-world issues. Explore the many facets of social change and leadership Navigate group dynamics surrounding controversy, collaboration, and purpose Discover the meaning of citizenship and your commitment to the greater good Become an agent of change through one of the many routes to a common goal The SCM is backed by 15 years of research, and continues to be informed by ongoing investigation into the

interventions and environments that create positive leadership development outcomes. Leadership for a Better World provides a thorough, well-rounded tour of the Social Change Model, with guidance on application to real-world issues. Please note that The Social Change Model: Facilitating Leadership Development (978-1-119-24243-7) is intended to be used as a Facilitator's Guide to Leadership for a Better World, 2nd Edition in seminars, workshops, and college classrooms. You'll find that, while each book can be used on its own, the content in both is also designed for use together. A link to the home page of The Social Change Model can be found below under Related Titles.
