The Fleet that Had to Die Richard Hough,2000 Richard Hough recounts the fleet's extraordinary seven-month journey from the Baltic to the Far East, which eventually became a mission of heroic futility when Port Arthur, and with it the entire Russian Pacific Fleet, fell. As Admiral Rozhdestvensky's fleet lumbered through the Straits of Tsushima towards Vladivostok on 27 May 1905, the Japanese, in one of the most crushing naval victories of all time, utterly destroyed the Russian armada. The humiliating and total defeat of Russia was confirmed, giving rise to a new and dynamic superpower in the East.--BOOK JACKET.

Rigging: Period Ships Models Lennarth Petersson,2011-03-30 A fully illustrated guide to rigging models of historic ships with confidence and accuracy, using a model of the eighteenth-century HMS Melampus. The rigging of period ship models is the ultimate challenge for any modeler. An eighteenth-century man-of-war boasted mile on mile of rigging, more than one thousand blocks, and acres of canvas. To reduce this in scale, and yet retain an accurate representation, is an awesome undertaking. In this classic work, Lennarth Peterson untangles the complexities of model rigging. Using some four hundred drawings, he shows how each separate item of rigging is fitted to the masts, yards, and sails. Each drawing deals with only one particular item so that it can be seen clearly in isolation. The lead of a particular halyard, the arrangement of a bracing line—these and every other detail are depicted with startling clarity. Based on the author's research of numerous eighteenth-century models, each one with its contemporary rigging still extant, the information is both meticulous and accurate. The remarkable visual immediacy and clarity of this work makes it truly unique and essential for any period ship modeler. In addition, the book is a “must-have” reference work for all those involved in the rigging and repair of historic ships.

German Battlecruisers of World War One Gary Staff,2014-11-29 The most comprehensive English-language study of the German Imperial Navy's WWI battlecruisers, fully illustrated with drawings, diagrams and photographs. In this in-depth study, naval historian and author of *Battle on the Seven Seas* Gary Staff presents a full analysis of Imperial Germany's battlecruisers. Known as Panzerkreuzer, the eight ships of this class were involved in several early North Sea skirmishes before their historic victory against the Royal Navy in the Battle of Jutland. Staff details the design and construction of these ships, and traces the full-service history of each one, recounting their actions, largely from first-hand German sources and official documents. Detailed line drawings and maps augment the text throughout, as do a wealth of contemporary photos that depict the vessels at sea as well as in dock, where many aspects of their design—as well as damage sustained in action—can be viewed in close up. A superb series of full-color computer graphics show full length profiles and top-down views of each ship in precise and clear detail. *German Battle Cruisers of World War One* presents a major contribution to German naval history in the English language. It is a must-have volume for Great War historians and enthusiasts, as well as battlecruiser modelers.

King George V Class Battleships Roger Chesneau,2011-05-23 The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references books, monographs, large-scale plans and relevant websites. The five battleships of the class covered by this volume were the most modern British capital ships to serve in the Second World War. They were involved in many famous actions including the sinking of both Bismarck and Scharnhorst, while Prince of Wales suffered the unfortunate distinction of being the first capital ship sunk at sea by air attack.

The History of Korea (Vol.1&2) Homer B. Hulbert,2023-12-13 The History of Korea presents a chronological account of Korea from ancient days, over 2000 B. C, to modern 20th century Korea. Hulbert said that Korea and Japan have the same two racial types, but Japan is mostly Malay and Korea is mostly Manchu-Korean. He claimed that Korea is physically mostly of the northern type, but also said that the nation, being physically mostly of the northern type, did not disprove Hulbert's claim that the Malay element developed Korea's first civilization, although not necessarily originating Korea's first civilization, and the Malay element imposed its language in its main features in the entire peninsula.

French Cruisers, 1922–1956 Jean Moulin,John Jordan,2013-03-04 A technical analysis and pictorial history of the French navy cruisers built in the early to mid-twentieth century. The French produced some of the most striking and innovative interwar cruiser designs. A large amount of new information about these ships has become available over the past twenty years in France, but this book is the first to make this accessible to an English-speaking readership. Part I explains the design philosophy behind each of the classes built after 1922, and outlines the characteristics of each type, accompanied by detailed data tables and a comprehensive set of specially-drawn plans based on official documents, as well as carefully-selected photographs. Coverage includes the De Grasse, laid down in August 1939 and completed postwar as an AA cruiser, and also the heavy cruisers of the Saint Louis class intended to follow her, about which little has been published. Part II deals with the historical side, covering not only the eventful careers of these ships, but also explaining the peacetime organization of the Marine Nationale, the complex politics of this turbulent period and their impact on the navy. Like its highly successful predecessor, *French Battleships*, this beautifully presented book subtly blends technical and historical analysis to produce what must become the standard reference work. Praise for *French Cruisers* “A clearly-written and excellently presented book which, particularly with respect to its technical descriptions, explains its chosen subject area in a convincing and comprehensive fashion. The authors are to be commended for their achievement in bringing knowledge of a previously sparsely-covered subject to an English language readership.” —Warship Annual 2014

Naval Warfare, 1815-1914 Lawrence Sondhaus,2012-10-12 This book looks at the transition of wooden sailing fleets to the modern steel navy. It details the technological breakthroughs that brought about this change - steampower, armour, artillery and torpedoes, and looks at their effect on naval strategy and tactics. Part of the ever-growing and prestigious Warfare and History series, this book is a must for enthusiasts of military history.

The German Type VIIC U-boat, scourge of Allied shipping convoys during the Second World War, was the workhorse of the German U-boat force. With some 568 Type VIIs in use between 1940 and 1945 it was a potent fighting vessel that could hunt for long periods in the far reaches of the western and southern Atlantic.
