Luftwaffe Emergency Fighters Robert Forsyth,2017-06-29 In late 1944, the German Air Ministry organised what it called an 'Emergency Fighter Competition' intended to produce designs for quick-to-build yet technically and tactically effective jet fighter aircraft capable of tackling the anticipated arrival of the B-29 Superfortress over Europe, as well as the British Mosquito and US P-38 Lightning which were appearing in ever greater numbers. Thus was born a cutting-edge, highly sophisticated series of aircraft including the futuristic and elegant Focke-Wulf Ta 183; the extraordinary Blohm und Voss P.212, and the state-of-the-art Messerschmitt P.1101 series. Armed with heavy cannon and the latest air-to-air rockets and missiles, these were designed to inflict carnage on American bomber formations at high speed. Using stunning three-view illustrations of each prototype along with full colour artwork, aviation expert Robert Forsyth traces the history of the extraordinary aircraft of the 'Emergency Fighter Competition', Hitler's last throw of the dice in the air war against the Allies.

Shadow Country Peter Matthiessen, 2008-08-19 NATIONAL BOOK AWARD WINNER •
“Altogether gripping, shocking, and brilliantly told, not just a tour de force in its stylistic range, but a great American novel, as powerful a reading experience as nearly any in our literature.”—Michael Dirda, *The New York Review of Books* *Killing Mister Watson*, *Lost Man’s River*, and *Bone* by Bone—Peter Matthiessen’s great American epic about Everglades sugar planter and notorious outlaw E. J. Watson on the wild Florida frontier at the turn of the twentieth century—were originally conceived as one vast, mysterious novel. Now, in this bold new rendering, Matthiessen has marvelously distilled a monumental work while deepening the insights and motivations of his characters with brilliant rewriting throughout. Praise for *Shadow Country* “Magnificent . . . breathtaking . . . Finally now we have [this three-part saga] welded like a bell, and with Watson’s song the last sound, all the elements fuse and resonate.”—*Los Angeles Times* “Peter Matthiessen has done great things with the Watson trilogy. It’s the story of our continent, both land and people, and his writing does every justice to the blood fury of his themes.”—Don DeLillo “The fiction of Peter Matthiessen is the reason a lot of people in my generation decided to be writers. No doubt about it. *Shadow Country* lives up to anyone’s highest expectations for great writing.”—Richard Ford “*Shadow Country*, Matthiessen’s distillation of the earlier Watson saga, represents his original vision. It is the quintessence of his lifelong concerns, and a great legacy.”—W. S. Merwin “[An] epic masterpiece .

. . a great American novel.”—The Miami Herald

The Alternate Luftwaffe John Baxter, 2005

Three Battles Charles Brown MacDonald, Sidney T. Mathews, 1952

Sidewinder Ron Westrum, 2013-08-15 In the mid-1950s a small group of overworked, underpaid scientists and engineers on a remote base in the Mojave Desert developed a weapon no one had asked for but everyone in the weapons industry desired. This is the story of how that unorthodox team, led by visionary Bill McLean, overcame U.S. Navy bureaucracy and other more heavily funded projects to develop the world's best air-to-air missile. Author Ron Westrum examines that special time and place—when the old American work ethic and “can do” spirit were a vital part of U.S. weapons development—to discover how this dedicated team was able to create a simple and inexpensive missile. Today, many decades after its invention, the Sidewinder missile is still considered one of the best that America has to offer. In a time of billion-dollar weapons development contracts, astronomical cost overruns, and defense acquisitions scandals, this revealing, highly readable tale about one of the most successful weapons in history should be of interest to anyone concerned with national security.=

Conservation Biology for All Navjot S. Sodhi, Paul R. Ehrlich, 2010-01-08
Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of

scientists in developing countries, so that they are in a better position to protect their natural resources.

The Life of August Wilhelm Schlegel, Cosmopolitan of Art and Poetry Roger Paulin,2016-02-01 This is the first full-scale biography, in any language, of a towering figure in German and European Romanticism: August Wilhelm Schlegel whose life, 1767 to 1845, coincided with its inexorable rise. As poet, translator, critic and oriental scholar, Schlegel's extraordinarily diverse interests and writings left a vast intellectual legacy, making him a foundational figure in several branches of knowledge. He was one of the last thinkers in Europe able to practise as well as to theorise, and to attempt to comprehend the nature of culture without being forced to be a narrow specialist. With his brother Friedrich, for example, Schlegel edited the avant-garde Romantic periodical Athenaeum; and he produced with his wife Caroline a translation of Shakespeare, the first metrical version into any foreign language. Schlegel's Lectures on Dramatic Art and Literature were a defining force for Coleridge and for the French Romantics. But his interests extended to French, Italian, Spanish and Portuguese literature, as well to

the Greek and Latin classics, and to Sanskrit. August Wilhelm Schlegel is the first attempt to engage with this totality, to combine an account of Schlegel's life and times with a critical evaluation of his work and its influence. Through the study of one man's rich life, incorporating the most recent scholarship, theoretical approaches, and archival resources, while remaining easily accessible to all readers, Paulin has recovered the intellectual climate of Romanticism in Germany and traced its development into a still-potent international movement. The extraordinarily wide scope and variety of Schlegel's activities have hitherto acted as a barrier to literary scholars, even in Germany. In Roger Paulin, whose career has given him the knowledge and the experience to grapple with such an ambitious project, Schlegel has at last found a worthy exponent.

The Venturesome Voyages of Captain Voss John Claus Voss, 2023-01-18

Fokker Dr. 1 Mark C. Wilkins, 2020-06-28 This book presents the evolution and development of perhaps the most iconic German fighter of WWI--the Fokker Dr. 1 triplane or Dreidecker. The Dr. 1 was born from experiments in cantilever monoplanes and the excellent combat record of the Sopwith triplane, which appeared at the western front at the end of 1916. Only 320 Fokker Dr.1s were built, yet their imprint on aviation history was and is far reaching and enduring--perhaps due to those who flew them. Baron Manfred von Richthofen and his brother Lothar, as well as Werner Voss, Ernst Udet, and many others, all flew the triplane, helping burnish their image in collective

memory. This book highlights the design and construction of the legendary Dr. 1, as well as showcasing many flying replicas and where they can be found. Also included are selected museums from around the world where Dr. 1s can currently be seen.

Spitfire Pilot David Crook, 2021-07-06 Spitfire Pilot is the exhilarating and moving memoir of D. M. Crook, an airman in the legendary 609 Squadron - one of the most successful RAF units in the Battle of Britain. Beginning with his fond recollections of his halcyon days in training - acrobatics, night flying and languorous days spent playing sport and nights off visiting Piccadilly Circus - Crook goes on to recount in thrilling detail the dogfights, remarkable victories and tragic losses which formed the daily routine of Britain's heroic aerial defenders in that long summer of 1940. Often hopelessly outnumbered, the men of 609 Squadron in their state-of-the-art Spitfires committed acts of unimaginable bravery against the Messerschmitts and Junkers of Germany's formidable Luftwaffe. Many of Crook's fellow airmen did not make it back alive, and the absence they leave in the close-knit community of the squadron is described with great poignancy. Spitfire Pilot offers a unique and personal insight into one of the most critical moments of British history, when a handful of men stood up against the might of the German Air Force in defence of their country. This definitive edition, the first for more than sixty years, includes a new foreword by David Crook's daughter and Air Vice Marshal Sandy Hunter,

Honorary Air Commodore of the 609 Squadron. The book also has an introduction by Professor Richard Overy.

American Secret Projects 1 Tony Buttler, Alan Griffith (Military aircraft researcher), 2016-04-07 Featuring the obscure, the unusual, the unbuilt and

the unseen. The secret is out - Secret Projects is back. This is a new title in this highly acclaimed series, this time looking at concepts developed by the US aircraft industry in the years immediately prior to and during World War 2. This book includes and describes the major fighter and bomber proposals from the American aircraft industry which embrace various fighter and interceptor concepts, medium, heavy and intercontinental bombers, attack aircraft and anti-submarine aircraft, both for the USAF and US Navy. Particular emphasis is placed on 'Circular Proposals' - a system of submitting designs against requirements circulated around the industry by the Army Air Force in the 1930s and early 1940s. The illustrations show drawings and photographs of unbuilt designs merged with the history and photographs of real aeroplanes. Very little has been published previously about American projects from this time period and much of the material will not have been seen widely before. it will therefore be fascinating reading for all lovers of the previously highly successful 'Secret Projects' series and aviation historians.
