The Things They Carried Tim O'Brien, 2009-10-13 Look for O'Brien's new book, *American Fantastica*, on sale October 24th A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

What Video Games Have to Teach Us About Learning and Literacy. Second Edition James Paul Gee, 2014-12-02 James Paul Gee begins his classic book with I want to talk about video games--yes, even violent video games--and say some positive things about them. With this simple but explosive statement, one of America's most well-respected educators looks seriously at the good that can come from playing video games. In this revised edition of What Video Games Have to Teach Us About Learning and Literacy, new games like World of WarCraft and Half Life 2 are evaluated and theories of cognitive development are expanded. Gee looks at major cognitive activities including how individuals develop a sense of identity, how we grasp meaning, how we evaluate and follow a command, pick a role model, and perceive the world.

Scenes from an Unfinished War Daniel P. Bolger, Combat Studies Institute, 2011-01-01 Low-intensity conflict (LIC) often has been viewed as the wrong kind of warfare for the American military, dating back to the war in Vietnam and extending to the present conflicts in Iraq and Afghanistan. From

the American perspective, LIC occurs when the U.S. military must seek limited aims with a relatively modest number of available regular forces, as opposed to the larger commitments that bring into play the full panoply of advanced technology and massive commitments of troops. Yet despite the conventional view, U.S. forces have achieved success in LIC, albeit under the radar and with credit largely assigned to allied forces, in a number of counterinsurgency wars in the 1960s. Scenes from an Unfinished War: Low-Intensity Conflict in Korea, 1966-1969 focuses on what the author calls the Second Korean conflict, which flared up in November 1966 and sputtered to an ill-defined halt more than three years later. During that time, North Korean special operations teams had challenged the U.S. and its South Korean allies in every category of low-intensity conflict - small-scale skirmishes along the Demilitarized Zone between the two Koreas, spectacular terrorist strikes, attempts to foment a viable insurgency in the South, and even the seizure of the USS Pueblo - and failed. This book offers a case study in how an operational-level commander, General Charles H. Bonesteel III, met the challenge of LIC. He and his Korean subordinates crafted a series of shrewd, pragmatic measures that

defanged North Korea's aggressive campaign. According to the convincing argument made by Scenes from an Unfinished War, because the U.S. successfully fought the wrong kind of war, it likely blocked another kind of wrong war - a land war in Asia. The Second Korean Conflict serves as a corrective to assumptions about the American military's abilities to formulate and execute a winning counterinsurgency strategy. The Sense of an Ending Julian Barnes, 2011-10-05 BOOKER PRIZE WINNER • NATIONAL BESTSELLER • A novel that follows a middle-aged man as he contends with a past he never much thought about—until his closest childhood friends return with a vengeance: one of them from the grave, another maddeningly present. A novel so compelling that it begs to be read in a single sitting, *The Sense of an Ending* has the psychological and emotional depth and sophistication of Henry James at his best, and is a stunning achievement in Julian Barnes's oeuvre. Tony Webster thought he left his past behind as he built a life for himself, and his career has provided him with a secure retirement and an amicable relationship with his ex-wife and daughter, who now has a family of her own. But when he

is presented with a mysterious legacy, he is forced to revise his estimation of his own nature and place in the world.

The Cognitive-Theoretic Model of the Universe: A New Kind of Reality Theory Christopher Michael Langan, 2002-06-01 Paperback version of the 2002 paper published in the journal *Progress in Information, Complexity, and Design (PCID)*. **ABSTRACT** Inasmuch as science is observational or perceptual in nature, the goal of providing a scientific model and mechanism for the evolution of complex systems ultimately requires a supporting theory of reality of which perception itself is the model (or theory-to-universe mapping). Where information is the abstract currency of perception, such a theory must incorporate the theory of information while extending the information concept to incorporate reflexive self-processing in order to achieve an intrinsic (self-contained) description of reality. This extension is associated with a limiting formulation of model theory identifying mental and physical reality, resulting in a reflexively self-generating, self-modeling theory of reality identical to its universe on the syntactic level. By the nature of its derivation, this theory, the Cognitive Theoretic

Model of the Universe or CTMU, can be regarded as a supertautological reality-theoretic extension of logic. Uniting the theory of reality with an advanced form of computational language theory, the CTMU describes reality as a Self Configuring Self-Processing Language or SCSPL, a reflexive intrinsic language characterized not only by self-reference and recursive self-definition, but full self-configuration and self-execution (reflexive read-write functionality). SCSPL reality embodies a dual-aspect monism consisting of infocognition, self-transducing information residing in self-recognizing SCSPL elements called syntactic operators. The CTMU identifies itself with the structure of these operators and thus with the distributive syntax of its self-modeling SCSPL universe, including the reflexive grammar by which the universe refines itself from unbound teleosis or UBT, a primordial realm of infocognitive potential free of informational constraint. Under the guidance of a limiting (intrinsic) form of anthropic principle called the Telic Principle, SCSPL evolves by telic recursion, jointly configuring syntax and state while maximizing a generalized self-selection parameter and adjusting on the fly to freely-changing internal conditions. SCSPL relates space, time and object by means of

conspansive duality and conspansion, an SCSPL-grammatical process featuring an alternation between dual phases of existence associated with design and actualization and related to the familiar wave-particle duality of quantum mechanics. By distributing the design phase of reality over the actualization phase, conspansive spacetime also provides a distributed mechanism for Intelligent Design, adjoining to the restrictive principle of natural selection a basic means of generating information and complexity. Addressing physical evolution on not only the biological but cosmic level, the CTMU addresses the most evident deficiencies and paradoxes associated with conventional discrete and continuum models of reality, including temporal directionality and accelerating cosmic expansion, while preserving virtually all of the major benefits of current scientific and mathematical paradigms.

The Secret Horsepower Race: Western Front Fighter Engine Development – Special Edition Merlin

Calum E. Douglas, 2021-04-25 The piston engines that powered Second World War fighters, the men who designed them, and the secret intelligence work carried out by both Britain and Germany would determine the outcome of the first global air war. Advanced jet engines may have been in development but every militarily significant air battle was fought by piston-engined fighters. Whoever designed the most powerful piston engines would win air superiority and with it the ability to dictate the course of the war as a whole. This is the never before told story of a high-tech race, hidden behind the closed doors of design offices and intelligence agencies, to create the war's best fighter engine. Using the fruits of extensive research in archives around the world together with the previously unpublished memoirs of fighter engine designers, author Calum E. Douglas tells the story of a desperate contest between the

world's best engineers - the Secret Horsepower Race.

Earth - Last Sanctuary Christian Kallias,2015-09-16 I absolutely loved this book! The author has a writing style that kept me hooked from the first word until the last. -Van Warren When the evil Obsidian Empire delivers a deathblow against the Star Alliance, fighter pilot Lieutenant Chase Athanatos leads a band of scattered survivors to the farthest reaches of the known universe, to a little planet called Earth. But Earth is in trouble. The Obsidian Empire is hot on their trail, and unless they find a way to stop them, what's left of the Alliance and the entire planet are doomed to extinction. With the help of the beautiful Commander Sarah Kepler and under the guidance of the goddess of love Aphroditis, Chase races against time to find a way to save the planet from total annihilation. Unbeknownst to him, something dormant is coursing through Chase's blood. But does it hold the key to changing their destiny ?

Deep Maneuver Jack D Kern Editor,Jack Kern,2018-10-12 Volume 5, Deep Maneuver: Historical

Case Studies of Maneuver in Large-Scale Combat Operations, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.

When My Name Was Keoko Linda Sue Park, 2013-04 A heartwarming tale of courage, resilience and hope from master storyteller and winner of the prestigious Newbery Medal, Linda Sue Park. When her name was Keoko, Japan owned Korea, and Japanese soldiers ordered people around, telling them what they could do or say, even what sort of flowers they could grow. When her name was Keoko, World War II came to Korea, and her friends and relatives had to work and fight for Japan. When her name was Keoko, she never forgot her name was actually Kim Sun-hee. And no matter what she was

called, she was Korean. Not Japanese. Inspired by true-life events, this amazing story reveals what happens when your culture, country and identity are threatened.

Aces High Bill Yenne, 2009-02-03 Capturing the hearts of a beleaguered nation, the fighter pilots of World War II engaged in a kind of battle that became the stuff of legend. They cut through the sky in their P-38s to go one-on-one against the enemy—and those who survived the deadly showdowns with enough courage and skill earned the right to be called aces. But two men in particular rose to become something more. They became icons of aerial combat, in a heroic rivalry that inspired a weary nation to fight on. Richard “Dick” Bong was the bashful, pink-faced farm boy from the Midwest. Thomas “Tommy” McGuire was the wise-cracking, fast-talking kid from New Jersey. What they shared was an unparalleled gallantry under fire which won them both the Medal of Honor—and remains the subject of hushed and reverent conversation wherever aerial warfare is admired. What they had between them was a closely watched rivalry to see who would emerge as the top-scoring American ace of the war. What they left behind is a legacy of pride we will never forget, and a record of aerial

victories that has yet to be surpassed anywhere in the world.

Beyond the Black Door A.M. Strickland, 2019-10-29 *Beyond the Black Door* is a young adult dark fantasy about unlocking the mysteries around and within us—no matter the cost... Everyone has a soul. Some are beautiful gardens, others are frightening dungeons. Soulwalkers—like Kamai and her mother—can journey into other people's souls while they sleep. But no matter where Kamai visits, she sees the black door. It follows her into every soul, and her mother has told her to never, ever open it. When Kamai touches the door, it is warm and beating, like it has a pulse. When she puts her ear to it, she hears her own name whispered from the other side. And when tragedy strikes, Kamai does the unthinkable: she opens the door. A.M. Strickland's imaginative dark fantasy features court intrigue and romance, a main character coming to terms with her asexuality, and twists and turns as a seductive mystery unfolds that endangers not just Kamai's own soul, but the entire kingdom ... An Imprint Book "I couldn't put down this deliciously dark dream of a fantasy." —New York Times bestselling author Lisa Maxwell "A dark delight, gorgeously written and as twisty and enigmatic as a labyrinth at twilight. I

wanted to stay lost in its pages forever, wandering ever deeper into the maze of Strickland's beguiling, intricately imagined world.” —Margaret Rogerson, New York Times bestselling author of *An Enchantment of Ravens*

Race of Aces John R Bruning, 2020-01-14 The astonishing untold story of the WWII airmen who risked it all in the deadly race to become the greatest American fighter pilot. In 1942, America's deadliest fighter pilot, or ace of aces -- the legendary Eddie Rickenbacker -- offered a bottle of bourbon to the first U.S. fighter pilot to break his record of twenty-six enemy planes shot down. Seizing on the challenge to motivate his men, General George Kenney promoted what they would come to call the race of aces as a way of boosting the spirits of his war-weary command. What developed was a wild three-year sprint for fame and glory, and the chance to be called America's greatest fighter pilot. The story has never been told until now. Based on new research and full of revelations, John Bruning's brilliant, original book tells the story of how five American pilots contended for personal glory in the Pacific while leading Kenney's resurgent air force against the most formidable enemy America

ever faced. The pilots -- Richard Bong, Tommy McGuire, Neel Kearby, Charles MacDonald and Gerald Johnson -- riveted the nation as they contended for Rickenbacker's crown. As their scores mounted, they transformed themselves from farm boys and aspiring dentists into artists of the modern dogfight. But as the race reached its climax, some of the pilots began to see how the spotlight warped their sense of duty. They emerged as leaders, beloved by their men as they chose selfless devotion over national accolades. Teeming with action all across the vast Pacific theater, *Race of Aces* is a fascinating exploration of the boundary between honorable duty, personal glory, and the complex landscape of the human heart. Realising REDD+ Arild Angelsen, 2009-01-01 REDD+ must be transformational. REDD+ requires

broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Di

erent country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.
