Advice for participating in competitions is also provided, as well as the most appropriate ways for conserving figures and avoiding their deterioration with the passage of time and elements as damaging as dust. The final section is dedicated to the works of world renowned confirmed artists, in an attractive gallery of award-winning works with the most outstanding works at an international level in recent years. Here, the enthusiast can source ideas for creating his/her own works, or simply enjoy the works of the great masters. 7" *Kara* Becca Hillburn, 2014 Beneath an old porch. Up in a forgotten attic. In a dusty corner of a basement. Lilliputians are tiny people who occupy the in-between spaces of our world. Sometimes, if you're careful, you can catch a glimpse of one.⁷ *Kara* is a suburban fantasy comic aimed at young girls. Inspired by books such as *The Borrowers*, *The Littles*, and *Gulliver's Travels*, *7 Kara* follows the adventures of the 11 year old Lilliputian Kara. Kara lives with her parents in an old doll house that's been hidden away in the back of a neglected shed. Isolated her entire life, she has few Lilliputian friends her own age, and even less experience with the outside world. Everything she knows has been learned first hand or has been taught to her by her parents. Her life changes drastically when a human family moves

into the house her family lives near. Will Kara make a new friend? Or is there something darker, possibly more dangerous in store for her? Kara is an ongoing watercolor children's comic written and illustrated by Becca Hillburn. Collected in this first volume are the first four chapters of the main comic, a bonus story featuring Kara, and a selection of concept art. Full color, 112 pages of content, 71 pages of comic.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 *Drawing Futures* brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in

our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Red Rising Pierce Brown, 2014-01-28 NEW YORK TIMES BESTSELLER • Pierce Brown's relentlessly entertaining debut channels the excitement of The Hunger Games by Suzanne Collins and Ender's Game by Orson Scott Card. "Red Rising ascends above a crowded dystopian field."—USA Today ONE OF THE BEST BOOKS OF THE YEAR—Entertainment Weekly, BuzzFeed, Shelf Awareness "I live for the dream that my children will be born free," she says. "That they will be what they like. That they will own the land their father gave them." "I live for you," I say sadly. Eo kisses my cheek. "Then

you must live for more.” Darrow is a Red, a member of the lowest caste in the color-coded society of the future. Like his fellow Reds, he works all day, believing that he and his people are making the surface of Mars livable for future generations. Yet he toils willingly, trusting that his blood and sweat will one day result in a better world for his children. But Darrow and his kind have been betrayed. Soon he discovers that humanity reached the surface generations ago. Vast cities and lush wilds spread across the planet. Darrow—and Reds like him—are nothing more than slaves to a decadent ruling class. Inspired by a longing for justice, and driven by the memory of lost love, Darrow sacrifices everything to infiltrate the legendary Institute, a proving ground for the dominant Gold caste, where the next generation of humanity’s overlords struggle for power. He will be forced to compete for his life and the very future of civilization against the best and most brutal of Society’s ruling class. There, he will stop at nothing to bring down his enemies . . . even if it means he has to become one of them to do so. Praise for Red Rising “[A] spectacular adventure . . . one heart-pounding ride . . . Pierce Brown’s dizzyingly good debut novel evokes The Hunger Games, Lord of the Flies, and Ender’s Game. . . . [Red Rising] has everything it needs to become meteoric.”—Entertainment Weekly “Ender, Katniss, and now Darrow.”—Scott Sigler “Red Rising is a sophisticated vision. . . . Swarms of visitors come to Tokyo each year on a personal quest to soak in all the otaku-related sights and enjoy Japanese manga, anime, gaming and idol culture at its very source. This is the go-to resource for those planning a trip, or simply dreaming of visiting one day!

The Dragon and the Dazzle Marco Pellitteri, Jean-Marie Bouissou, Gianluca Di Fratta, Cristiano Martorella, Bounthavy Suvilay, 2010 In the worldwide circulation of the products of cultural industries, an important role is played by Japanese popular culture in European contexts. Marco Pellitteri shows that the contact between Japanese pop culture and European youth publics occurred during two phases. By use of metaphor, the author calls them the Dragon and the Dazzle. The first took place between 1975 and 1995,

the second from 1996 to today. They can be distinguished by the modalities of circulation and consumption/re-elaboration of Japanese themes and products in the most receptive countries: Italy, France, Spain, Germany and, across the ocean, the United States. During these two phases, several themes have been perceived, in Europe, as rising from Japan's social and mediatic systems. Among them, this book examines the most apparent from a European point of view: the author names them machine, infant, and mutation, visible mostly through manga, anime, videogames, and toys. Together with France, Italy is the European country that in this respect has had the most central role. There, Japanese imagination has been acknowledged not only by young people, but also by politicians, television programmers, the general public, educators, comics and cartoons authors. The growing influence of Japanese pop culture, connected to the appreciation of its manga, anime, toys, and videogames, also urges political and mediologic questions linked to the identity/ies of Japan as they are understood--wrongly or rightly--in Europe and the West, and to the increasingly important role of Japan in international relations.--Back cover

Colonies in Space T. A. Heppenheimer, 2017-09-15 Is there life in space? Within the solar system, which we can reach and are now beginning to explore, the answer may be: Nothing but spores and bacteria. Perhaps the answer is: Nothing. Beyond our region of space the answer may yet be: Civilizations and cultures of greatness and magnificence untold. But we have not yet learned to detect them or to communicate with them. As this has become apparent there has been a reaction against many of the more utopian hopes associated with space flight. Less than fifteen years ago John Kennedy could commit the nation to explore this new ocean, with widespread hope that we were entering a new Age of Discovery. Today it is fashionable to believe that our problems can find solution only on earth and there is nothing in space which can aid us in any way. This is not so. If we cannot find planets fit for us to live on, or if Mars is

not up to our fondest hopes - very well. We can take our own life into space. We can build colonies in space, as pleasant as we want and productive enough to markedly improve humanity's future prospects. And, we can begin to do this anytime we please.
