Japanese Animation Masao Yokota, Tze-yue G. Hu, 2013-08-01 Japanese Animation: East Asian Perspectives makes available for the first time to English readership a selection of viewpoints from media practitioners, designers, educators, and scholars working in the East Asian Pacific. This collection not only engages a multidisciplinary approach in understanding the subject of Japanese animation but also shows ways to research, teach, and more fully explore this multidimensional world. Presented in six sections, the translated essays cross-reference each other. The collection adopts a wide range of critical, historical, practical, and experimental approaches. This variety provides a creative and fascinating edge for both specialist and nonspecialist readers. Contributors' works share a common relevance, interest, and involvement despite their regional considerations and the different modes of analysis demonstrated. They form a composite of teaching and research ideas on Japanese animation.

The Dragon and the Dazzle Marco Pellitteri, Jean-Marie Bouissou, Gianluca Di Fratta, Cristiano Martorella, Bounthavy Suvilay, 2010 In the worldwide circulation of the products of cultural industries, an important role is played by Japanese popular culture in European contexts. Marco Pellitteri shows that the contact between Japanese pop culture and European youth publics occurred during two phases. By use of metaphor, the author calls them the Dragon and the Dazzle. The first took place between 1975 and 1995, the second from 1996 to today. They can be distinguished by the modalities of circulation and consumption/re-elaboration of Japanese themes and products in the most receptive countries: Italy, France, Spain, Germany and, across the ocean, the United States. During these two phases, several themes have been perceived, in Europe, as rising from Japan's social and mediatic systems. Among them, this book examines the most apparent from a European point of view: the author names them machine, infant, and mutation, visible mostly through manga, anime, videogames, and toys. Together with France, Italy is the European country that in this respect has had the most central role. There, Japanese imagination has been acknowledged not only by young people, but also by politicians, television programmers, the general public, educators, comics and cartoons authors. The growing influence of Japanese pop

culture, connected to the appreciation of its manga, anime, toys, and videogames, also urges political and mediologic questions linked to the identity/ies of Japan as they are understood--wrongly or rightly--in Europe and the West, and to the increasingly important role of Japan in international relations.--Back cover

Le Corbusier's Maison Curutchet Alejandro Lapunzina,1997 One of his very few built projects in the Americas, Maison Curutchet is a fascinating representation of Le Corbusier's stylistic transitional period, bridging his late 1920s purism and the maturity of his later work in India. Like Casa Malaparte, this book offers an in-depth analysis of a single building through original documents, drawings, and photographs.

The Pleasure in Drawing Jean-Luc Nancy,2013-07-16 Originally written for an exhibition Jean-Luc Nancy curated at the Museum of Fine Arts in Lyon in 2007, this book addresses the medium of drawing in light of the question of form--of

form in its formation, as a formative force, as a birth to form. In this sense, drawing opens less toward its achievement, intention, and accomplishment than toward a finality without end and the infinite renewal of ends, toward lines of sense marked by tracings, suspensions, and permanent interruptions. Recalling that drawing and design were once used interchangeably, Nancy notes that drawing designates a design that remains without project, plan, or intention. His argument offers a way of rethinking a number of historical terms (sketch, draft, outline, plan, mark, notation), which includes rethinking drawing in its graphic, filmic, choreographic, poetic, melodic, and rhythmic senses. If drawing is not reducible to any form of closure, it never resolves a tension specific to itself. Rather, drawing allows the pleasure in and of drawing, the gesture of a desire that remains in excess of all knowledge, to come to appearance. Situating drawing in these terms, Nancy engages a number of texts in which Freud addresses the force of desire in the rapport between aesthetic and sexual pleasure, texts that also turn around questions concerning form in its formation, form as a formative force. Between the sections of the text, Nancy has placed a series of "sketchbooks" on drawing, composed of a broad range of quotations on art from different writers, artists, or philosophers.

Eyes as Big as Plates Karoline Hjorth, Riitta Ikonen, 2017 Eyes as Big as Plates is an ongoing collaborative photography and sculpture project by Norwegian-Finnish artist duo Karoline Hjorth and Riitta Ikonen (both born 1980). Initially a play on characters from Nordic folklore, the series has evolved into a search for the human connection to nature. Hjorth & Ikonen work together throughout the process with their complementary skills (Karoline is the photographer in the duo, while Riitta works mainly with the creation of the wearable sculptures). Since 2011 the duo has collaborated with retired farmers, fishermen, zoologists, plumbers, opera singers, housewives, artists and academics. Each character inhabits the landscape in a wearable sculpture made from natural materials. The book features portraits, field notes, essays and behind-the-scenes stories from many of the project's 60 shoots. With international press coverage in the Huffington Post, the BBC, TIME LightBox, Life and elsewhere, plus a highly successful Kickstarter campaign attracting a large American audience, the series has developed into a project with universal appeal.

Alien : Diaries 7/8 H. R. Giger, 2013 HR Giger worked in the Shepperton Studios near London from February to November 1978, creating the figures and sets for the film Alien (1979) directed by Ridley Scott. The film became an international success, earning Giger an Oscar. In the transcribed Alien Diaries, published here for the first time as a facsimile, HR Giger describes his work in the studios. He writes, sketches, and takes photographs with his Polaroid SX70. With brutal honesty, sarcasm and occasional despair, Giger describes what it is like working for the film industry and how he struggles against all odds be it the stinginess of producers or the sluggishness of his staff to see his designs become reality. The Alien Diaries (in German transcription with an English translation) show a little-known personal side of the artist HR Giger and offer an unusual, detailed glimpse into the making of a movie classic through the eyes of a Swiss artist. The book contains almost completely unpublished material, including drawings, Polaroids showing the monster coming to life, and several still shots from the plentiful film material that Giger took in Shepperton.

Last Panzer Battles in Hungary Norbert Számvéber, 2024-04-30 In the last phase of the Second World War the Sixth Panzer Army was the last army available to the German military leadership which was more or less intact and was capable of launching a major offensive. After it had been withdrawn from the Western front in the aftermath of the failed Ardennes counter offensive, it was replenished with men and gears as fully as was possible in the given circumstances, and as a result it almost regained its 1944 autumn strength. It would not have been a surprise if it had been deployed on German territory against the Allied troops advancing to Rhine, or in Silesia or in the Baltics or even if it had been sent as a reinforcement to the Army Group Vistula to defend the distant approaches to Berlin against the advancing Soviet army - reinforcement and fresh troops capable of launching counter offensives were desperately needed everywhere. But it happened otherwise: the Sixth Army was deployed in Hungary and participated in the Operation Spring Awakening, launched in the western part of the country on 6th of March, 1945. This was the last German big offensive in the course of the Second World War. Several questions come to mind about the operation. What were the goals originally set to be achieved by this seemingly pointless attack? What role was assigned to the once formidable German Panzer Corps? Is it true that the Soviet command used the same defense directives as had been used during the battle of Kursk in 1943 because they had proved to be viable then? What types of tanks and armored vehicles fight in West Hungary and in what numbers? How did the American made M4A2 tanks manned by Soviet crews fare against the much heavier German Panther and Tiger B tanks on the Hungarian soil? What were the losses on both sides in tanks and armored vehicles? To what extent can be the prompt and powerful response of the Soviet side - the offensive towards Vienna - evaluated as being successful? How did the Germans, the Soviets, the Hungarians and the Bulgarians use their tanks and armored vehicles in this operation? Besides giving a detailed chronological description of the events, the book tries to find answers to these questions. The facts extracted from the operational documents of the fighting sides have been supplemented with excerpts from diaries and memoirs, and even the maps have been drawn on the basis of the original ones. The author has explored some new archival sources kept in Russian archives and also incorporated some published Russian materials into his research that was neglected up until now by other researchers, along with some newly published German memoirs - all this has made possible to create a narrative of the events related to us by the author in hitherto unprecedented detail.

The Chinatown Death Cloud Peril Paul Malmont, 2007-06-05 Set in the colorful world of the 1930s and peopled with writers H.P. Lovecraft, L. Ron Hubbard, Lester Dent, and Walter Gibson, this swashbuckling literary thriller propels the characters into a genuine pulp adventure in which they try to thwart a madman intent on creating a new global empire.

Japanese Robot Culture Yuji Sone, 2016-12-17 Japanese Robot Culture examines social robots in Japan, those in public, domestic, and artistic contexts. Unlike other studies, this book sees the robot in relation to Japanese popular culture, and argues that the Japanese 'affinity' for robots is the outcome of a complex loop of representation and social expectation in the context of Japan's continuing struggle with modernity. Considering Japanese robot culture from the critical perspectives afforded by theatre and performance studies, this book is concerned with representations of robots and their inclusion in social and cultural contexts, which science and engineering studies do not address. The robot as a performing object generates meaning in staged events and situations that make sense for its Japanese observers and participants. This book examines how specific modes of encounter with robots in carefully constructed mises en scène can trigger reflexive, culturally specific, and often ideologically-inflected responses.
