Rebooting AI Gary Marcus, Ernest Davis, 2019-09-10 Two leaders in the field offer a compelling analysis of the current state of the art and reveal the steps we must take to achieve a truly robust artificial intelligence. Despite the hype surrounding AI, creating an intelligence that rivals or exceeds human levels is far more complicated than we have been led to believe. Professors Gary Marcus and Ernest Davis have spent their careers at the forefront of AI research and have witnessed some of the greatest milestones in the field, but they argue that a computer beating a human in Jeopardy! does not signal that we are on the doorstep of fully autonomous cars or superintelligent machines. The achievements in the field thus far have occurred in closed systems with fixed sets of rules, and these approaches are too narrow to achieve genuine intelligence. The real world, in contrast, is wildly complex and open-ended. How can we bridge this gap? What will the consequences be when we do? Taking inspiration from the human mind, Marcus and Davis explain what we need to advance AI to the next level, and suggest that if we are wise along the way, we won't need to worry about a future of machine overlords. If we focus on endowing machines with common sense and deep understanding, rather than simply focusing on statistical analysis and gathering ever larger collections of data, we will be able to create an AI we can trust—in our homes, our cars, and our doctors' offices. Rebooting AI provides a lucid, clear-eyed assessment of the current science and offers an inspiring vision of how a new generation of AI can make our lives better.

Interdisciplinary Perspectives on Consciousness and the Self Sangeetha Menon, Anindya Sinha, B. V. Sreekantan, 2013-12-12 This book brings together ancient spiritual wisdom and modern science and philosophy to address age-old questions regarding our existence, free will and the nature of conscious awareness. Stuart Hameroff MD Professor, Anesthesiology and Psychology, and Director, Center for Consciousness Studies The University of Arizona, Tucson, Arizona This book presents a rich, broad-ranging overview of contemporary research and scholarship into consciousness and the self... It is ... to their credit that the editors have assembled a highly stimulating set of scholars whose expertise cover all the relevant areas. I strongly recommend the book to anyone with an interest in understanding the directions in which contemporary thinking about the nature of consciousness is headed. B. Les Lancaster Emeritus Professor of Transpersonal Psychology Liverpool John Moores University, UK This volume is a collection of 23 essays that contribute to the emerging discipline of consciousness studies with particular focus on the concept of the self. The essays together argue that to understand consciousness is to understand the self that beholds consciousness. Two broad issues are addressed in the volume: the place of the self in the lives of humans and nonhuman primates; and the interrelations between the self and consciousness, which contribute to the understanding of cognitive functions, awareness, free will, nature of reality, and the complex experiential and behavioural attributes of consciousness. The book presents cutting-edge and original work from well-known authors and scholars of philosophy, psychiatry, behavioural sciences and physics. This is a pioneering attempt to present to the reader multiple ways of conceptualizing and thus understanding the relation between consciousness and self in a nuanced manner.

Urban Design Jon Lang, 2017-03-31 Urban Design: A Typology of Procedures and Products, 2nd Edition

provides a comprehensive and accessible introduction to urban design, defining the field and addressing the controversies and goals of urban design. Including over 50 updated international case studies, this new edition presents a three-dimensional model with which to categorize the processes and products involved: product type, paradigm type, and procedural type. The case studies not only illuminate the typology but provide information that designers can use as precedents in their own work. Uniquely, these case study projects are framed by the design paradigm employed, categorized by procedural type instead of instrumental or land use function. The categories used here are Total Urban Design, All-of-a-piece Urban Design, Plug-in Urban Design, and Piece-by-piece Urban Design. Written for both professionals and those encountering urban design in their day-to-day life, Urban Design is an essential introduction to the field and practice, considering the future direction of the field and what can be learned from the past.

My Vocabulary Did This to Me Jack Spicer,2010-10-01 Winner of the Northern California Independent Booksellers Award for Poetry (2009) Winner of the American Book Award (2009) In 1965, when the poet Jack Spicer died at the age of forty, he left behind a trunkful of papers and manuscripts and a few copies of the seven small books he had seen to press. A West Coast poet, his influence spanned the national literary scene of the 1950s and '60s, though in many ways Spicer's innovative writing ran counter to that of his contemporaries in the New York School and the West Coast Beat movement. Now, more than forty years later, Spicer's voice is more compelling, insistent, and timely than ever. During his short but prolific life, Spicer troubled the concepts of translation, voice, and the act of poetic composition itself. *My Vocabulary Did This to Me* is a landmark publication of this essential poet's life work, and includes poems that have become increasingly hard to find and many published here for the first time.

The Sirius Mystery Robert Temple,1999 The most academically credible case for alien visitation. Is the existence of civilisation on earth the result of contact from inhabitants of a planet in the system of the star Sirius prior to 3000BC? There are tribal cultures in present-day Africa whose most sacred and secret and traditions are based on this theory. Central to their cosmology is a body of knowledge concerning the system of the star Sirius that is astounding in its accuracy of detail, including specific information only recently accessible to modern science. Robert Temple traces the traditions of the Dogon and three related tribes back 5, 000 years to the ancient Mediterranean cultures of Sumer and Egypt. He shows a knowledge dependent on physics and astrophysics, which they claimed was imported to them by visitors from Sirius.

The Estate House Re-designed Anthony Sully, 2018-08-07 The book demonstrates how new houses can be designed to be more sustainable and ergonomic. Specifically, it describes a prototype building that could be constructed in the near future. Responding to some of the poor standards of mass estate housing in the UK and its out-of-date space standards, it contributes towards improving the current status quo by describing a house design, including drawings, that can compete with today's mass housing. The author examines the traditional geometrical reliance on the square in the design of houses and the planning of housing estates and promotes instead the adoption of polygonal forms. This is explained using geometric analysis, diagrams and references to existing housing. These concepts have been developed with reference to technical literature from various companies with one company interested in taking it further. Providing a novel and up-to-date design concept, this book is of value to practitioners and researchers looking to improve the standard of mass housing in the UK. It is also of interest to anyone wishing to build their own house and to manufacturers wanting to move into modern housing technology.

The Way Things Were. Aatish Taseer, 2016 When Skanda's father Toby dies, estranged from Skanda's mother and from the India he once loved, it falls to Skanda to return his body to his birthplace. This is a journey that takes him halfway around the world and deep within three generations of his family, whose fractures, frailties and toxic legacies he has always sought to elude. Both an intimate portrait of a marriage and its aftershocks, and a panoramic vision of India's half-century - in which a rapacious new energy supplants an ineffectual elite - 'The way things were' is an epic novel about the pressures of history upon

the present moment. It is also a meditation on the stories we tell and the stories we forget; their tenderness and violence in forging bonds and in breaking them apart. Set in modern Delhi and at flashpoints from the past four decades, fusing private and political, classical and contemporary to thrilling effect, this book confirms Aatish Taseer as one of the most arresting voices of his generation.
