Overcoming School Refusal Joanne Garfi,2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Are You In The House Alone? Amanda Reyes, 2017-04-05 Beginning in the 1960s through its heyday in the 1970s and beyond, the telefilm remains an important cultural artefact masquerading as disposable entertainment. Made specifically for the small screen, within the tight constraints of broadcasting standards, what these humble movies lacked in budget and star appeal, they made up for in other ways. Often they served as an introduction to genre films, particularly horror, mirroring their theatrical counterparts with a focus on sinister cults, women in prison, haunted houses and even animals in revolt. They were also a place to address serious contemporary issues—drugs, prostitution, sexual violence and justice—albeit in a cosy domestic environment. Production of telefilms continues to this day, but their significance within the history of mass media remains under-discussed. *Are You in the House Alone?* seeks to address this imbalance in a series of reviews and essays by fans and critics alike. It looks at many of the films, the networks and names behind them, and also specific genres—everything from Stephen King adaptations to superheroes to true-life dramas. So, kickback and crack open the TV guide once more for the event that is the Movie of the Week!

How Writing Came About Denise Schmandt-Besserat, 2010-01-01 An “utterly lucid, thoughtfully illustrated, and thoroughly convincing” book on the origins of the world’s oldest known system of writing (American Journal of Archaeology). One of American Scientist’s Top 100 Books on Science, 2001 In 1992, the University of Texas Press published *Before Writing*, Volume I: From Counting to Cuneiform and *Before Writing*, Volume II: A Catalog of Near Eastern Tokens. In these two volumes, Denise Schmandt-Besserat set forth her groundbreaking theory that the cuneiform script invented in the

Near East in the late fourth millennium B.C.—the world's oldest known system of writing—derived from an archaic counting device. How Writing Came About draws material from both volumes of this scholarly work to present Schmandt-Besserat's theory in an abridged version for a wide public and classroom audience. Based on the analysis and interpretation of a selection of 8,000 tokens or counters from 116 sites in Iran, Iraq, the Levant, and Turkey, it documents the immediate precursor of the cuneiform script./DIV

Alaska's Hidden Wars Otis Hays, 2004 On the eve of World War II, the national interests of Japan, the United States, and the Soviet Union collided in the North Pacific. *Alaska's Hidden Wars* tells the story of the war in the North Pacific—a story of savage weather, isolation, and sacrifice. Two island chains—the Aleutians and the Kuriles—became the focus of a series of major campaigns that pitted the Americans against the Japanese. *Alaska's Hidden Wars* chronicles the role of Japanese-American intelligence specialists and details a Japanese eyewitness account of the defense of Attu. Two virtually unknown aspects of the North Pacific war are also exposed: the brutal North Pacific weather and the internment of American airmen in Kamchatka. *Alaska's Hidden Wars* is a fast-moving history that brings declassified archival sources to light and draws the reader into the lonely, bitter war fought in the North Pacific.

Transtopia in the Sinophone Pacific Howard Chiang, 2021-04-06 As a broad category of identity, “transgender” has given life to a vibrant field of academic research since the 1990s. Yet the Western origins of the field have tended to limit its cross-cultural scope. Howard Chiang proposes a new paradigm for doing transgender history in which geopolitics assumes central importance. Defined as the antidote to transphobia, transtopia challenges a minoritarian view of transgender experience and makes room for the variability of transness on a historical continuum. Against the backdrop of the Sinophone Pacific, Chiang argues that the concept of transgender identity must be rethought beyond a purely Western frame. At the same time, he

challenges China-centrism in the study of East Asian gender and sexual configurations. Chiang brings Sinophone studies to bear on trans theory to deconstruct the ways in which sexual normativity and Chinese imperialism have been produced through one another. Grounded in an eclectic range of sources—from the archives of sexology to press reports of intersexuality, films about castration, and records of social activism—this book reorients anti-transphobic inquiry at the crossroads of area studies, medical humanities, and queer theory. Timely and provocative, *Transtopia in the Sinophone Pacific* highlights the urgency of interdisciplinary knowledge in debates over the promise and future of human diversity.

Terms and Conditions R. Sikoryak, 2017-03-07 Master satirist tackles the contract everyone agrees to but no one reads “Mischievous, pastiche-heavy artist Robert Sikoryak...upped the difficulty level for his long-term conceptual project: Instead of abridging a book, he lifted the complete text of Apple’s mind-numbing corporate boilerplate, which users must agree to before accessing iTunes, and mashed it up with art invoking more than a century of comics.”—New York Times For his newest project, R. Sikoryak tackles the monstrously and infamously dense legal document, iTunes Terms and Conditions, the contract everyone agrees to but no one reads. In a word for word 94-page adaptation, Sikoryak hilariously turns the agreement on its head—each page features an avatar of Apple cofounder and legendary visionary Steve Jobs juxtaposed with a different classic strip such as Mort Walker’s Beetle Bailey, or a contemporary graphic novel such as Craig Thompson’s *Blankets* or Marjane Satrapi’s *Persepolis*. Adapting the legalese of the iTunes Terms and Conditions into another medium seems like an unfathomable undertaking, yet Sikoryak creates a surprisingly readable document, far different from its original, purely textual incarnation and thus proving the accessibility and flexibility of comics. When Sikoryak parodies Kate Beaton’s

Hark A Vagrant peasant comics with Steve Jobs discussing objectionable material or Homer Simpson as Steve Jobs warning of the penalties of copyright infringement, Terms and Conditions serves as a surreal record of our modern digital age where technology competes with enduringly ironclad mediums.
