The Rights of Man Thomas Paine,2021-04-26T22:00:31Z Thomas Paine wrote the first part of The Rights of Man in 1791 as a response to the furious attack on the French Revolution by the British parliamentarian Edmund Burke in his pamphlet Reflections on the Revolution in France, published the previous year. Paine carefully dissects and counters Burke's arguments and provides a more accurate description of the events surrounding the revolution of 1789.

He then reproduces and comments on the “Declaration of the Rights of Man and of Citizens” promulgated by the National Assembly of France. The manuscript of The Rights of Man was placed with the publisher Joseph Johnson, but that publisher was threatened with legal action by the British Government. Paine then gave the work to another publisher, J. S. Jordan, and on the advice of William Blake, Paine went to France to be out of the way of possible arrest in Britain. The Rights of Man was published in March 1791, and was an immediate success with the British public, selling nearly a million copies. A second part of the book, subtitled “Combining Principle and Practice,” was published in February 1792. It puts forward practical proposals for the establishment of republican government in countries like Britain. The Rights of Man had a major impact, leading to the establishment of a number of reform societies. After the publication of the second part of the book, Paine and his publisher were charged with seditious libel, and Paine was eventually forced to leave Britain and flee to France. Today The Rights of Man is considered a classic of political writing and philosophy. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Falling to Earth Al Worden, Francis French, 2012-07-24 As command module pilot for the Apollo 15 mission to the moon in 1971, Al Worden flew on what is widely regarded as the greatest exploration mission that humans have ever attempted. He spent six days orbiting the moon, including three days completely alone, the most isolated human in existence. During the return

from the moon to earth he also conducted the first spacewalk in deep space, becoming the first human ever to see both the entire earth and moon simply by turning his head. The Apollo 15 flight capped an already-impressive career as an astronaut, including important work on the pioneering Apollo 9 and Apollo 12 missions, as well as the perilous flight of Apollo 13. Nine months after his return from the moon, Worden received a phone call telling him he was fired and ordering him out of his office by the end of the week. He refused to leave. What happened in those nine months, from being honored with parades and meetings with world leaders to being unceremoniously fired, has been a source of much speculation for four decades. Worden has never before told the full story around the dramatic events that shook NASA and ended his spaceflight career. Readers will learn them here for the first time, along with the exhilarating account of what it is like to journey to the moon and back. It's an unprecedentedly candid account of what it was like to be an Apollo astronaut, with all its glory but also its pitfalls.

Sia Martinez and the Moonlit Beginning of Everything Raquel Vasquez
Gilliland, 2020-08-11 "In a world where we are so often dividing ourselves into us and them, this book feels like a kind of magic, celebrating all beliefs, ethnicities, and unknowns." –The New York Times Book Review
Aristotle & Dante Discover the Secrets of the Universe meets *Roswell* by way of Laurie R. King in this astonishing, genre-bending novel about a Mexican American teen who discovers profound connections between immigration,

folklore, and alien life. It's been three years since ICE raids and phone calls from Mexico and an ill-fated walk across the Sonoran. Three years since Sia Martinez's mom disappeared. Sia wants to move on, but it's hard in her tiny Arizona town where people refer to her mom's deportation as "an unfortunate incident." Sia knows that her mom must be dead, but every new moon Sia drives into the desert and lights San Anthony and la Guadalupe candles to guide her mom home. Then one night, under a million stars, Sia's life and the world as we know it cracks wide open. Because a blue-lit spacecraft crashes in front of Sia's car...and it's carrying her mom, who's very much alive. As Sia races to save her mom from armed-quite-possibly-alien soldiers, she uncovers secrets as profound as they are dangerous in this stunning and inventive exploration of first love, family, immigration, and our vast, limitless universe.

Want Lynn Steger Strong, 2020-07-07 Named a Best Book of 2020 by Time Magazine, The Los Angeles Times, NPR, Vulture, The New Yorker, and Kirkus Grappling with motherhood, economic anxiety, rage, and the limits of language, Want is a fiercely personal novel that vibrates with anger, insight, and love. Elizabeth is tired. Years after coming to New York to try to build a life, she has found herself with two kids, a husband, two jobs, a PhD—and now they're filing for bankruptcy. As she tries to balance her dream and the impossibility of striving toward it while her work and home lives feel poised to fall apart, she wakes at ungodly hours to run miles by the icy river, struggling to quiet her thoughts. When she reaches out to Sasha, her long-lost childhood friend, it feels almost harmless—one of those innocuous ruptures that exist online, in texts. But her timing is uncanny. Sasha is facing a crisis, too, and perhaps after years apart, their shared moments of crux can bring them back into each other's lives. In Want, Lynn Steger Strong explores the subtle violences enacted on a certain type of woman when she dares to want things—and all the various violences in which she implicates herself as she tries to survive.

The Doomsday Machine Daniel Ellsberg, 2017-12-05 Shortlisted for the Andrew Carnegie Medal for Excellence in Nonfiction Finalist for The California Book Award in Nonfiction The San Francisco Chronicle's Best of the Year List Foreign Affairs Best Books of the Year In These Times "Best Books of the Year Huffington Post's Ten Excellent December Books List LitHub's "Five Books Making News This Week" From the legendary whistle-blower who revealed the Pentagon Papers, an eyewitness exposé of the dangers of America's Top Secret, seventy-year-long nuclear policy that continues to this day. Here, for the first time, former high-level defense analyst Daniel Ellsberg reveals his shocking firsthand account of America's nuclear program in the 1960s. From the remotest air bases in the Pacific Command, where he discovered that the authority to initiate use of nuclear weapons was widely delegated, to the secret plans for general nuclear war under Eisenhower, which, if executed, would cause the near-extinction of humanity, Ellsberg shows that the legacy of this most dangerous arms buildup in the history of civilization--and its proposed renewal under the Trump administration--threatens our very survival. No other insider with high-level access has written so candidly of the nuclear strategy of the late Eisenhower and early Kennedy years, and nothing has fundamentally changed since that era. Framed as a memoir--a chronicle of madness in which Ellsberg acknowledges participating--this gripping exposé reads like a thriller and offers feasible steps we can take to dismantle the existing doomsday machine and avoid nuclear catastrophe, returning Ellsberg

to his role as whistle-blower. The Doomsday Machine is thus a real-life Dr. Strangelove story and an ultimately hopeful--and powerfully important--book about not just our country, but the future of the world.
