Rig Ship for Ultra Quiet Andrew Karam, 2002-01-01

You've seen The Hunt for Red October and wondered if it was real. Now you'll know. Rig Ship for Ultra Quiet -- a book about submarines, written by a submariner. Attack from the Sea William F. Trimble, 2016-07-01 An award-winning aviation historian chronicles the Navy's efforts to develop a powerful sea-based strike force through the use of long-range attack seaplanes supported

by surface ships and submarines. William Trimble traces the concept back to the early 1930s when American strategic planners sought ways to mount an assault across the Pacific with minimum air support. But it was not until 1950, when the Navy was threatened with losing its big carriers and long-range aircraft, that the idea of a Seaplane Striking Force was resurrected. Lured by breakthroughs in seaplane performance and the promise of the turbojet-powered Convair Sea Dart fighter and the Martin Sea Master attack flying boat, the Navy believed it could challenge the Air Force in the strategic role, the author explains, but found that the technology did not live up to expectations. This book investigates the difficulties of weapon system procurement within the context of strategic realities, interservice rivalry, and constrained defense budgets. It also looks at an alternative weapon system that the Navy saw as a means of extending its conventional reach and as a complement to the carrier and land-based bomber used for nuclear deterrence. That weapon, however, proved unsuccessful in the end. The author helps the reader understand that while conceptual and operational flaws kept the Seaplane Striking Force from achieving the goals set for it, the idea of a mobile weapon system capable of long-range attacks from the sea remains valid. Other books touch briefly on the subject, but this is the first to examine the concept in depth.

Nasa Space Shuttle Crew Escape Systems

Handbook United Space Alliance, 2012-05 Prepared for NASA by contractor United Space Alliance in 2005, this Space Shuttle Crew Escape System Handbook details the equipment, systems and procedures that would have been used in the event of an emergency during launch. Designed for use by astronauts, instructors and ground personnel, the text describes and explains the crew-worn equipment

and orbiter hardware, emergency escape modes, and crew duties and responses during egress. It includes a discussion of the Advanced Crew Escape Suit (ACES), helmet, parachute and harness, and survival gear. It also details hatch opening procedures, the escape pole, slide system, Sky Genie, slidewire basket system, the Window 8 escape panel, special seat features, and more. A short supplement also provides information about Shuttle Transoceanic Aboard Landing sites. Richly illustrated with numerous diagrams and photos, this book provides fascinating insights into rarely discussed aspects of the Space Shuttle program and astronaut training.

The Threat Andrew Cockburn, 1984 Draws on interviews with emigres, samizdat, and U.S. intelligence sources for a picture of the functions and dysfunctions of today's Soviet military machine.
