The Patron Saint of Pregnant Girls Ursula Hegi, 2020-08-18 A joy to read. —New York Times Book Review From beloved bestselling author Ursula Hegi, a new novel about three mothers, set on the shores of the Nordsee, perfect for fans of *Water for Elephants* and *The Light Between Oceans*. In the summer of 1878, the Ludwig Zirkus arrives on Nordstrand in Germany, to the delight of the island's people. But after the show, a Hundred-Year Wave roars from the Nordsee and claims three young children. Three mothers are on the beach when it happens: Lotte, whose children are lost; Sabine, a Zirkus seamstress with her grown daughter; and Tilli, just a girl herself, who will give birth later that day at St. Margaret's Home for Pregnant Girls. After the tragedy, Lotte's husband escapes with the Zirkus, while she loses the will to care for their surviving son. Tilli steps in, bonding with him in a way she isn't allowed to with her own baby, taken away at birth. Sabine, struggling to keep her childlike daughter safe in the world, forms a complicated friendship with Lotte. But the mothers' fragile trio is threatened when Lotte and her husband hatch a dangerous plan to reunite their family, and Tilli and Sabine must try to find a way to pull them back to reality. As full of joy and beauty as it is of pain, and told with the luminous power that has made Ursula Hegi a beloved bestselling author for decades, *The Patron Saint of Pregnant Girls* is a shining testament to the ways in which women hold each other up in the most unexpected of circumstances.

Experiments, Models, Paper Tools Ursula Klein, 2003 In the early nineteenth century, chemistry emerged in Europe as a truly experimental discipline. What set this process in motion, and how did it evolve? Experimentalization in chemistry was driven by a seemingly innocuous tool: the sign system of chemical formulas invented by the Swedish chemist Jacob Berzelius. By tracing the history of this "paper tool," the author reveals how chemistry quickly lost its orientation to natural history and became a major productive force in industrial society. These formulas were not merely a convenient shorthand, but productive tools for creating order amid the chaos of early nineteenth-century organic chemistry. With these formulas, chemists could create a multifaceted world on paper, which they then correlated with experiments and the traces produced in test tubes and flasks. The author's semiotic approach to the formulas allows her to show in detail how their particular semantic and representational qualities made them especially useful as paper tools for productive application.

Changing Planes Ursula K. Le Guin, Eric Beddow, 2014-03-04 Winner of the PEN/Malamud Award for Short Story A New York Times Notable Book In these "vivid, entertaining, philosophical dispatches" (San Francisco Chronicle), literary legend Le Guin weaves together influences as wide-reaching as Borges, *The Little Prince*, and *Gulliver's Travels* to examine feminism, tyranny, mortality and immortality, art, and the meaning—and mystery—of being human. Sita Dulip has missed her flight out of Chicago. But instead of listening to garbled announcements in the airport, she's found a method of bypassing the crowds at the desks, the nasty lunch, the whimpering children and punitive parents, and the blue plastic chairs bolted to the floor: she changes planes. Changing planes—not airplanes, of course, but entire planes of existence—enables Sita to visit societies not found on Earth. As "Sita Dulip's Method" spreads, the narrator and her acquaintances encounter cultures where the babble of children fades over time into the silence of adults; where whole towns exist solely for holiday shopping; where personalities are ruled by rage; where genetic experiments produce less than desirable results. With "the eye of an anthropologist and the humor of a satirist" (USA Today), Le Guin takes readers on a truly universal tour, showing through the foreign and alien indelible truths about our own human society.

The Lathe Of Heaven Ursula K. Le Guin, 2022-07-19 With a new introduction by Kelly Link, the Locus Award-winning science fiction novel by legendary author Ursula K. Le Guin, set in a world where one man's dreams rewrite the future. During a time racked by war and environmental catastrophe, George Orr discovers his dreams alter reality. George is compelled to receive treatment from Dr. William Haber, an ambitious sleep psychiatrist who quickly grasps the immense power George holds. After becoming adept at manipulating George's dreams to reshape the world, Haber seeks the same power for himself. George—with some surprising help—must resist Haber's attempts, which threaten to destroy reality itself. A classic of the science fiction genre, *The Lathe of Heaven* is prescient in its

exploration of the moral risks when overwhelming power is coupled with techno-utopianism.

Ada Lovelace Christopher Hollings, Ursula Martin, Adrian Clifford Rice, 2018 Ada, Countess of Lovelace and daughter of Romantic poet Lord Byron, is sometimes referred to as the world's first computer programmer. But how did a young woman in the nineteenth century without a formal education become a pioneer of computer science? Drawing on previously unpublished archival material, including a remarkable correspondence course with eminent mathematician Augustus De Morgan, this book explores Ada Lovelace's development from her precocious childhood into a gifted, perceptive and knowledgeable mathematician who, alongside Mary Somerville, Michael Faraday and Charles Dickens, became part of Victorian London's social and scientific elite. Featuring images of the 'first programme' together with mathematical models and contemporary illustrations, the authors show how, despite her relatively short life and with astonishing prescience, Ada Lovelace explored key mathematical questions to understand the principles behind modern computing.--Page 4 de la couverture.

The Illumination of Ursula Flight Anna-Marie Crowhurst, 2018-03-28 On the 15th day of December in the year of our Lord 1664, a great light bloomed in the dark sky and crept slowly and silently across the blackness: a comet. Every evening afterwards, though snow lay on the ground and the air bit with frost, men across the land threw open their windows and went out of their doors in cloaks and mufflers to gaze at the heavens, necks stretched up, hands shielding eyes, crooking long fingers to trace the burning thing that flamed across the night, while dogs moaned in their kennels and wise

women chanted incantations against bright malignant spirits. Born on the night of an ill-auguring comet just before Charles II's Restoration, Ursula Flight has a difficult future written in the stars. Against the custom of the age she begins an education with her father, who fosters in her a love of reading, writing and astrology. Following a surprising meeting with an actress, Ursula's dreams turn to the theatre and thus begins her quest to become a playwright despite scoundrels, bounders, bad luck and heartbreak. A vivid, passionate and gutsy tale of a most unusual girl in a world far away.
