Colossal Paper Machines Phil Conigliaro,2015-04-21 What a big idea! And what big fun: A whopping oversize book of interactive paper models to appeal to every kid who loves big machines—which pretty much covers all of them. These are the coolest big machines that kids love—each re-created in an oversize paper model that, once built, really moves. The book has everything the reader needs to pop out, fold, and create a full-color model of ten big machines: a dump truck, space shuttle, excavator, ladder truck, front loader, concrete mixer, steam locomotive, steamboat, dirigible, Chinook helicopter. Created by Phil Conigliaro, a gifted paper engineer and artist, the models are printed on sturdy card stock; perforated to pop out and fold; require only gluing (no tape or pins); and come with complete, easy-to-follow step-by-step instructions. And, worth repeating, each one moves: Wheels roll and the mixer turns, helicopter blades spin, and the excavator's boom and bucket raises and lowers. Additionally there's the story of each machine—how it works, who invented it, what it's used for. Kids will learn the history of the steam shovel—the smoking, hissing monster that dug the Panama Canal, the largest engineering feat of the 20th century; how astronauts in a space shuttle could withstand the 3,000 degrees of heat created when it returned to Earth; how the world's largest dump truck can haul a million pounds. It's big stuff!

The Complete Story of Sadako Sasaki Masahiro Sasaki,Sue DiCicco,2020-04-07 **Independent Publisher Book Award (IPPY) Winner** **Middle School Book of the Year--Northern Lights Book Awards** **Skipping Stones Honor Award Winner** For the first time, middle readers can learn the complete story of the courageous girl whose life, which ended through the effects of war, inspired a worldwide call for peace. In this book, author Sue DiCicco and Sadako's older brother Masahiro tell her complete story in English for the first time--how Sadako's courage throughout her illness inspired family and friends, and how she became a symbol of all people, especially children, who suffer from the impact of war. Her life and her death carry a message: we must have a wholehearted desire for peace and be willing to work together to achieve it. Sadako Sasaki was two years old when the atomic bomb was dropped on her city of Hiroshima at the end of World War II. Ten years later, just as life was starting to feel almost normal again, this athletic and enthusiastic girl was fighting a war of a different kind. One of many children affected by the bomb, she had contracted leukemia. Patient and determined, Sadako set herself the task of folding 1000 paper cranes in the hope that her wish to be made well again would be granted. Illustrations and personal family photos give a glimpse into Sadako's life and the horrors of war. Proceeds from this book are shared equally between The Sadako Legacy NPO and The Peace Crane Project.

My Dad Is the Best Playground Luciana Navarro Powell,2012-05-08 This joyful story celebrates dad as the most fun in the world and the best playground ever! He's the highest swing and a great climbing wall, he's a bouncing trampoline and merry as a merry-go-round. And then, when playtime is over, dad is the best for reading and snuggling with before bed. Luciana Navarro Powell's spirited text is perfectly paired with her colorful, energetic and very humorous artwork. Dads and their kids will love reading and re-reading this glorious celebration of fathers.

Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee to Assess Fuel Economy Technologies for Medium- and Heavy-Duty Vehicles,2010-08-30 Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.
