## **Neurohistology and Imaging Techniques**

Radek Pelc, Wolfgang Walz, Ronald Doucette, 2020-06-25 This volume explores major light microscopic imaging modalities that can be used to view nervous tissue, and discusses the steps needed to use each of them, and ways to interpret the data. The chapters in this book cover topics such as atlasing of insect brain; neuroanatomical tracing through fluorochrome expression; fluorescent probes for amyloids; or optical clearing for ultramicroscopy of GFP-expressing tissues. In the Neuromethods series style, chapters include the kind of detail and key advice from the specialists needed to get successful results in your laboratory. Authoritative and cutting-edge,

Neurohistology and Imaging Techniques is a valuable resource for both expert and novice users of major light microscopic imaging techniques, and those interested in exploring alternate imaging tools.

From Mine to Microscope Ian Freestone, Thilo Rehren, 2009-04-09 These twenty papers dedicated to Mike Tite focus upon the interpretation of ancient artefacts and technologies, particularly through the application of materials analysis. Instruments from the human eye to mass spectrometry provide insights into a range of technologies ranging from classical alum extraction to Bronze Age wall painting, and cover materials as diverse as niello, flint, bronze, glass and ceramic. Ranging chronologically from the Neolithic through to the medieval period, and geographically from Britain to China, these case studies provide a rare overview which will be of value to students, teachers and researchers with an interest in early material culture.

**The Early Neolithic in Greece** Catherine Perlès, 2001-10-04 Farmers made a sudden and dramatic appearance in Greece around 7000 BC, bringing with them new ceramics and crafts, and establishing settled villages. Their settlements provide the link between the first agricultural Near Eastern communities and the subsequent spread of the new technologies to the Balkans and Western Europe. Drawing on evidence from a wide range of archaeological sources, including often neglected small finds, the author introduces daring new perspectives on funerary rituals and the distribution of figurines, and constructs a

complex and subtle picture of early Neolithic societies.

Ambient Air Quality in the Czech Republic Iva H°unov á, 2021-10-25 Ambient air quality in the present-day Czech Republic (CR), one of the two succession countries of Czechoslovakia post-1993, was perceived as a major problem with severe human health and environmental consequences, particularly between the 1970s and 1990s. Since that time, the ambient air quality in the CR has improved substantially, due to newly introduced stringent legislation and technical countermeasures. Nevertheless, there are still activities which represent significant emission sources, such as local heating and increased vehicle travel through communities. After a substantial decrease in emissions in both the CR and its neighbouring countries, the levels of some ambient air pollutants from the 2000s are still not satisfactory. In this respect, aerosol, groundlevel ozone, and benzo[a]pyrene remain major problems, as they do elsewhere in Europe. The book provides a valuable update both on time trends and spatial changes in ambient air quality, and highlights the recent activities in both monitoring and modelling of principle ambient air pollutants in the CR.

**Rules of Thumb for Maintenance and Reliability Engineers** Ricky Smith, R. Keith Mobley, 2011-03-31 Rules of Thumb for Maintenance and Reliability Engineers will give the engineer the “have to have” information. It will help instill knowledge on a daily basis, to do his or her job and to maintain and assure reliable equipment to help

reduce costs. This book will be an easy reference for engineers and managers needing immediate solutions to everyday problems. Most civil, mechanical, and electrical engineers will face issues relating to maintenance and reliability, at some point in their jobs. This will become their "go to" book. Not an oversized handbook or a theoretical treatise, but a handy collection of graphs, charts, calculations, tables, curves, and explanations, basic "rules of thumb" that any engineer working with equipment will need for basic maintenance and reliability of that equipment. • Access to quick information which will help in day to day and long term engineering solutions in reliability and maintenance • Listing of short articles to help assist engineers in resolving problems they face • Written by two of the top experts in the country

*Pattern of the Past* David L. Clarke, Ian Hodder, Glynn Isaac, Norman Hammond, 1981-01-29 The book will be of importance for archaeologists and of interest to anthropologists.

*The Hot-Blooded Insects* Bernd Heinrich, 2013-04-09 From one man's persistent and elegant probing of the temperature biology of bees, we have been led to a deeper understanding of the whole biology of many insect taxa, and of their interactions with ecological and environmental stresses: all who work at the interfaces of physiology, ecology and behaviour have cause to be grateful, and all should certainly read this book. (Trends in Ecology & Evolution) An outstanding source of information, and can be read with profit and satisfaction by

the professional biologist and interested amateur alike. (Nature)

### **Genetics and Evolution of the Domestic Fowl**

Lewis Stevens, 1991-11-21 The science of genetics has undergone a period of very rapid and significant development in recent years, and the area of poultry genetics has been no exception. This book provides a balanced and up-to-date account of all the major areas of this subject from Mendelian to modern molecular genetics. The book begins by tracing the evolution of *Gallus domesticus* from its avian ancestors. Subsequent chapters cover important aspects of poultry genetics, including cytogenetics, transmission genetics, gene mapping, sex linkage, lethal genes, genetics of feathering and plumage, and quantitative genetics. In each chapter, a concise explanation of the genetic principles is followed by a full discussion illustrated by key examples. In the latter part of the book, recent advances in gene cloning and sequencing are examined. The impact of these exciting new developments on our understanding of gene structure and organisation, immunogenetics and the evolution of proteins is assessed. Finally, the uses of transgenic techniques and their implications are discussed. This book provides a clear and useful survey of the genetics and evolution of the domestic fowl, which will be of interest to postgraduate students and researchers in the fields of genetics, agriculture and veterinary medicine, as well as to poultry breeders (both commercial and non-commercial).

### **Islamic Glass in the Making** Nadine

Schibille, 2022-03-31 New insights into the history of Islamic glassmaking The ancient glass industry changed dramatically towards the end of the first millennium. The Roman glassmaking tradition of mineral soda glass was increasingly supplanted by the use of plant ash as the main fluxing agent at the turn of the ninth century CE. Defining primary production groups of plant ash glass has been a challenge due to the high variability of raw materials and the smaller scale of production. *Islamic Glass in the Making* advocates a large-scale archaeometric approach to the history of Islamic glassmaking to trace the developments in the production, trade and consumption of vitreous materials between the eighth and twelfth centuries and to separate the norm from the exception. It proposes compositional discriminants to distinguish regional production groups, and provides insights into the organisation of the glass industry and commerce during the early Islamic period. The interdisciplinary approach leads to a holistic understanding of the development of Islamic glass; assemblages from the early Islamic period in Mesopotamia, Central Asia, Egypt, Greater Syria and Iberia are evaluated, and placed in the larger geopolitical context. In doing so, this book fills a gap in the present literature and advances a large-scale approach to the history of Islamic glass.

The Oxford Handbook of Neolithic Europe Chris Fowler, Jan Harding, Daniela Hofmann, 2015-03-26 The Neolithic –a period in which the first sedentary agrarian communities were established across much of Europe–has been a key topic of archaeological

research for over a century. However, the variety of evidence across Europe, the range of languages in which research is carried out, and the way research traditions in different countries have developed makes it very difficult for both students and specialists to gain an overview of continent-wide trends. The Oxford Handbook of Neolithic Europe provides the first comprehensive, geographically extensive, thematic overview of the European Neolithic –from Iberia to Russia and from Norway to Malta –offering both a general introduction and a clear exploration of key issues and current debates surrounding evidence and interpretation. Chapters written by leading experts in the field examine topics such as the movement of plants, animals, ideas, and people (including recent trends in the application of genetics and isotope analyses); cultural change (from the first appearance of farming to the first metal artefacts); domestic architecture; subsistence; material culture; monuments; and burial and other treatments of the dead. In doing so, the volume also considers the history of research and sets out agendas and themes for future work in the field.

*Deep Learning Applications* M. Arif Wani, Mehmed Kantardzic, Moamar Sayed-Mouchaweh, 2020-02-29 This book presents a compilation of selected papers from the 17th IEEE International Conference on Machine Learning and Applications (IEEE ICMLA 2018), focusing on use of deep learning technology in application like game playing, medical applications, video analytics, regression/classification, object

detection/recognition and robotic control in industrial environments. It highlights novel ways of using deep neural networks to solve real-world problems, and also offers insights into deep learning architectures and algorithms, making it an essential reference guide for academic researchers, professionals, software engineers in industry, and innovative product developers.

*Prague and Beyond* Kateřina Čapková, Hillel J. Kieval, 2021-08-06 Prague's magnificent synagogues and Old Jewish Cemetery attract millions of visitors each year, and travelers who venture beyond the capital find physical evidence of once vibrant Jewish communities in towns and villages throughout today's Czech Republic. For those seeking to learn more about the people who once lived and died at those sites, however, there has until now been no comprehensive account in English of the region's Jews. *Prague and Beyond* presents a new and accessible history of the Jews of the Bohemian Lands written by an international team of scholars. It offers a multifaceted account of the Jewish people in a region that has been, over the centuries, a part of the Holy Roman Empire and the Habsburg Monarchy, was constituted as the democratic Czechoslovakia in the years following the First World War, became the Nazi Protectorate of Bohemia and Moravia and later a postwar Communist state, and is today's Czech Republic. This ever-changing landscape provides the backdrop for a historical reinterpretation that emphasizes the rootedness of Jews in the Bohemian Lands, the intricate variety of their social, economic, and cultural relationships, their negotiations with

state power, the connections that existed among Jewish communities, and the close, if often conflictual, ties between Jews and their non-Jewish neighbors. *Prague and Beyond* is written in a narrative style with a focus on several unifying themes across the periods. These include migration and mobility; the shape of social networks; religious life and education; civic rights, citizenship, and Jewish autonomy; gender and the family; popular culture; and memory and commemorative practices. Collectively these perspectives work to revise conventional understandings of Central Europe's Jewish past and present, and more fully capture the diversity and multivalence of life in the Bohemian Lands.

*The Celts of Iron Age Europe* Olivier Buchsenschutz, Ian Ralston, 2011-04-01 Otherwise known as the world of Asterix, this fierce society existed in Europe many centuries ago. This book looks at how it came into existence, at its heroes and princes, how it expanded, resisting the force of the Roman Empire and how it eventually merged with its Mediterranean invaders. Themes such as agriculture, craftwork and industry are examined, as well as how the Celts saw themselves and the world around them, represented in their art and religion. Changes in society are discussed using evidence for feasts and ritual, tomb organisation and political and tribal territories. As fascinating societies on the threshold of the Roman Empire, the Celts are also examined in terms of how they have been seen through history and

their significance for us today.

*The Bronze Age in Europe* J. M. Coles, A. F. Harding, 2014-10-30 This book provides an account of the development of European culture and society during the Bronze Age, the time span between c. 2000 and 700 BC. It was a period of remarkable innovation, seen for instance in the development and growth of metallurgy as a major industry, the spread of trading contacts, the origins of urbanism and the beginnings of social stratification. The study is divided chronologically into two, the earlier and later Bronze Age, giving a clear picture of the nature of the radical changes which occurred in the period as a whole. The geographical area covered, from the Atlantic shores across Europe into the Soviet Union and from northern Scandinavia to the Mediterranean, is too vast to be taken as one unit, and has been broken down into five regions; each is discussed in terms of settlement form, burial practices, ritual and religious sites, material culture, economic and social background, and trading patterns. The book describes and develops common themes that link together the different areas and cultural groups, rather than taking the typographical approach often adopted by Bronze Age specialists, and uses the results of radiocarbon dating to establish an objective chronology for the period. The text is generously illustrated and fully documented with radiocarbon dating tables and extensive bibliography. Our understanding of Bronze Age Europe is still increasing, but no other book of this scope had been written before this, in 1979. It is a major

study of its time of interest to anyone looking beyond popular accounts of the day.

*Birds* Dale Serjeantson, 2009-05-18 *Birds* is the first book to examine bird remains in archaeology and anthropology. Providing a thorough review of the literature on this topic, it also serves as a guide to the methods of study of bird remains from the past and covers a wide range of topics, including anatomy and osteology, taphonomy, eggs, feathers, and, bone tools. Dale Serjeantson is a Research Fellow in Archaeology in the School of Humanities, University of Southampton, UK. She is the co-author, with Alan Cohen, of *Manual for the Identification of Bird Bones from Archaeological Sites* and has contributed papers on birds and other zooarchaeological topics in journals and popular magazines. She is an Associate Editor of the *International Journal of Osteoarchaeology* and a member of the Institute of Field Archaeologists, the Society of Antiquaries of Scotland, the Association for Environmental Archaeology, and *L'homme et l'animal: Sociétés de recherche interdisciplinaire*.

Bell Beaker Settlement of Europe Alex M.

Gibson, 2019-04 European studies of the Bell Beaker phenomenon have concentrated on burial and artifacts that constitute its the most visible aspects. This volume concentrates on the domestic sphere - assemblage composition, domestic structures (how they differ, if at all, from previous types, legacies), and provides the first pan-European synthesis of its kind. It is a Europe-wide survey and analysis of Bell Beaker

settlement structures; this is particularly important as we cannot understand the Bell Beaker phenomenon by analyzing graves alone. Neither should we view Bell Beakers in isolation but must consider the effect that they had on already existing Late Neolithic cultures in the areas in which they appear. This volume is therefore intended to view the settlement aspect of Bell Beakers in context throughout Europe. It is the text book for Chalcolithic settlements and society. Contributors to the 19 papers belong to Europe-wide affiliation of experts specializing in Bell Beakers and the Chalcolithic (Archeologie et Gobelets) which addresses common pan-European issues surrounding the appearance and spread of Bell Beakers. This book summarizes that data from the UK and many of the continental European countries; an increasingly important element of Beaker studies following recent isotopic and DNA evidence showing that the phenomenon was a result of human migration and not that of cultural ideas, trade and ideology. Each chapter deals with a defined region or country and is fully illustrated, including a corpus of Beaker houses and comparing them with Late Neolithic domestic structures where they are known to exist. The following themes will be addressed: 1. Regional syntheses in the UK and in Europe 2. What native cultures existed before the arrival of Bell Beakers? 3. What domestic ceramics were being used before the arrival of Bell Beakers? 4. What stone and flint types were in use? 5. What did pre-Bell Beaker houses look like? What size were they? 6. What (if any) changes to 1-4 above resulted after

the appearance of Bell Beakers?

Communicating Archaeology John Beavis, Alan Hunt, 1999 A volume of essays on communicating archaeology by every imaginable means provides an excellent tribute to the work of Bill Putnam - always a communicator. Learning by doing (Philip Rahtz), field archaeology in the 70s and 80s (John Hinchliffe), ignore good communication at your peril (Andrew Lawson), the IFA: what it means to be a member of a professional body (Timothy Darvill), talking to ourselves (Ellen McAdam), commissioning knowledge or making archaeology for books (Peter Kemmis Betty), arcane to ARC: the York experience (Andrew Jones), the National Curriculum (Mike Corbishley), past experience: the view from teacher education (Tim Copeland), child's play: archaeology out of school (Kate Pretty), university archaeology: ivory tower or white elephant? (Kevin Andrews) , liberal adult education in the second half of the twentieth century (Trevor Rowley), the local societies (John Manley) , archaeology in museums (Roger Peers).
