Cut and Fold Techniques for Pop-Up Designs Paul Jackson,2014-02-17 Introducing techniques for

making pop-ups from one sheet of card, the third title in this series on paper engineering takes folding techniques into the third dimension. Each chapter introduces a new technical idea and shows how that technique can be adapted in many different ways, or combined with techniques from earlier chapters. These 3-D techniques can be incorporated into any design where typography and/or illustration are used, including mail-shots, personal publicity, invitations, business cards and greetings cards. With their emphasis on surface design over complex cutting, the pop-ups have an instant appeal for designers. Following the elegant, easy-to-follow style of Paul Jackson's other titles for Laurence King, *Cut and Fold Techniques for Pop-Up Designs* is an essential resource for marketing professionals and design students.

With the help of their thorough instructions and simple illustrations, you'll be on your way to becoming a pro paper crafter in no time at all – Sew magazine A wonderful insight into the work of a truly skilled artist – PaperCrafter

The renowned and influential book artist Hedi Kyle shows you step-by-step how to create her unique designs using folding techniques in *The Art of the Fold*. Bookbinding and paper craft projects include flag books, blizzard books, the fishbone fold, and nesting boxes. Written by the doyenne of artists' books, Hedi Kyle, *The Art of the Fold* is a wonderful insight into the work of a truly skilled artist. Hedi will show you how to bind a book and fold paper to create over 35 of her cut-fold book designs. The book is beautifully illustrated with Hedi's finished works of art. An excerpt from the book: 'I can still remember the thrill I experienced when my first folded book structure emerged from my fingers – how eager I was to explore its possibilities and to share it with whoever was interested. The Flag Book, as I now call it, is a simple accordion and has interlocking pages oriented in opposite directions. Little did I know that this simple structure would have legs and be the catalyst for the next forty-plus years of thinking about and making books. The common perception of the book today is fairly straightforward: a series of pages organized around a spine and protected on either side by two covers. This format allows for easy access, storage and retrieval of information. Yet what happens when the book is

stripped away of centuries of preconceptions and is allowed to reveal something else: playfulness, utility, invention? Expanding the notion of the book is what the structures in the following chapters of *The Art of the Fold* attempt to do. Exploring its tactile, sculptural form, primarily through folding methods, the book as a structural object is celebrated while content is considered in a new and unconventional way. My range in this medium has always been broad. In part this is due to my introduction to the world of bookbinding and some chance encounters. In the 1970s in New York City, the art and craft of hand bookbinding and papermaking were experiencing an unprecedented revival. I was fortunate to arrive in the city at just this moment. With an art-school background and an impulse to make things, I was naturally drawn to pursue this new opportunity. The Center for Book Arts, the famous forerunner of so many centers yet to come, was located in a small storefront just down the street from where I lived on the Lower East Side of Manhattan. Under the direction of founder Richard Minsky, it had a radical mission: to push concept, materials, printing and making of artist books in a new direction. When Richard dared me to teach at the Center one evening a week, I was hooked. My

career as a book conservator and a book artist has now spanned over 45 years. As head conservator at the American Philosophical Society in Philadelphia, I've had the opportunity to handle some of the rarest volumes and manuscripts in the world. I have also dealt with decrepit books, torn maps and countless curiosities discovered in stacks and archives. All were endless sources for ideas and provided a springboard for a departure from tradition. Leading book-arts workshops around the world and a 25 year tenure teaching in the graduate program for Book Arts and Printmaking at the University of the Arts in Philadelphia have shown me, in retrospect, that the more I taught, t

Spooky Halloween Silhouettes Jeffery Rudell, 2011 In this creative, creepy, large-format book of black pages, crafters will find jack-o'-lanterns, black cats, ravens, skulls, and more. Just put these 25 punch-out apparitions (no cutting, no folding, no mess) in the window, and they'll turn any home into a haunted house ready to welcome trick-or-treaters. Patterns on the inside back cover allow users to create life-size photocopied silhouettes of Frankenstein's monster, a mummy, zombies, a witch, and other ghosties, ghoulies, and things that go bump in the night.

Quirky Berkeley Tom Dalzell, 2011-11 Following the success of *Quirky Berkeley*, arbiter of the eccentric (The New York Times) Tom Dalzell returns to take readers on a tour of even more artwork that peppers the proudly idiosyncratic Northern California city. Stroll along iconic Telegraph Avenue for views of painted-metal portrait sculptures of figures ranging from Rasputin to Mario Savio--even Heyday's founder, Malcolm Margolin--at the Mad Monk Center for Anachronistic Media. Hike up Marin for views of the steel skeleton forever riffing on a tenor saxophone. Dalzell points out murals honoring the Sandinistas and bas-relief sculptures of legendary Oakland Athletics on the home of a member of the Great Tortilla Conspiracy. And just where can you find the quirkiest garden ever? Included in every write-up are profiles of the residents, whom Dalzell is careful to portray not as stereotypical Berzerkeleyites but as individuals who have found their true north of exuberant self-expression.
