*Formula One: The Pursuit of Speed* Maurice Hamilton, 2016-11-01 The adrenaline-fueled, high-octane world of Formula One has created some of the greatest moments in sporting history. From the intense rivalries between teams and drivers, such as Alain Prost and Ayrton Senna and 2015's Rosberg and Hamilton, to the infamous tracks that have created moments of tragedy and triumph -- F1's greatest moments read like a film script. The Cahier Archive has captured the drama from the 1950's to the present day including Lewis Hamilton's 2015 winning season. It is filled with stunning behind-the-scenes shots, from pit stops to personal moments, beautiful portraits of the drivers and atmospheric shots of the racing in action. Structured around three sections: Drivers and Rivalries, Teams and Cars, and Tragedy and Triumph of the Circuits, *Formula 1: The Pursuit of Speed* captures the intensity and beauty of the sport. Each section is introduced with vivid essays by F1 correspondent Maurice Hamilton, and filled with the Cahier's beautiful and resonating photographs, many unpublished giving a behind-the-scenes look at the world of F1.

Colossal Paper Machines Phil Conigliaro, 2015-04-21 What a big idea! And what big fun: A whopping oversize book of interactive paper models to appeal to every kid who loves big machines—which pretty much covers all of them. These are the coolest big machines that kids love—each re-created in an oversize paper model that, once built, really moves. The book has everything the reader needs to pop out, fold, and create a full-color model of ten big machines: a dump truck, space shuttle, excavator, ladder truck, front loader, concrete mixer, steam locomotive, steamboat, dirigible, Chinook helicopter. Created by Phil Conigliaro, a gifted paper engineer and artist, the models are printed on sturdy card stock; perforated to pop out and fold; require only gluing (no tape or pins); and come with complete, easy-to-follow step-by-step instructions. And, worth repeating, each one moves: Wheels roll and the mixer turns, helicopter blades spin, and the excavator's boom and bucket raises and lowers. Additionally there's the story of each machine—how it works, who invented it, what it's used for. Kids will learn the history of the steam shovel—the smoking, hissing monster that dug the Panama Canal, the largest engineering feat of the 20th century; how astronauts in a space shuttle could withstand the 3,000 degrees of heat created when it returned to Earth; how the world's largest dump truck can haul a million pounds. It's big stuff!

**Paper Dandy's Horrorgami** Marc Hagan-Guirey,2015-09-01 Paper Dandy's Horrorgami features 20 kirigami (cut-and-fold) designs based around haunted houses and scenes from horror films by the creator of the successful Horrorgami blog and exhibition. Each project features step-by-step instructions and a template that you remove from the book. You then follow the lines on the template, cutting and folding to make your own kirigami model. All you need is a scalpel, a cutting mat and a ruler. Clear cutting tips help you with the tricky stages and give you an order in which to complete your work, while photos of the finished model show you the final design. Suitable for folding experts and beginners alike, Paper Dandy's Horrorgami makes the perfect Halloween activity.

**The Japanese House** Pippo Ciorra,Florence Ostende,2017 Published on the occasion of the exhibition 'The Japanese House: architecture & life after 1945,' this catalogue contains a vast selection of photographs, drawings, projects and analyses offering a comprehensive overview of Japanese residential architecture from the post-war period to the present day. 13 thematic sections present different aspects of the research, documenting the work of archistars such as Toyo Ito, Kazuyo Sejima and Kenso Tange, the contributions of architects less well known outside Japan and the experimentation of the younger generations. In parallel, essays by the curators and by Hiuroyasu Fujiola and Kenjiro Hosaka, along with biographies of all the architects, painstakingly map the country's domestic architecture--

**An Anthology of Decorated Papers** P. J. M. Marks,2018-02-06 This remarkable and beautiful book brings together a collection of decorated papers dating from the 16th to the 20th century. They were produced for a wide variety of uses: as wrappers and endpapers for books, as the backing for playing cards, and even as linings for chests and cases. Some decorated papers were used as humble pictures for display in churches and the home; some were sold as souvenirs to pilgrims; and others were used merely as wrappings for foodstuffs such as gingerbread and chocolate. What unites all the papers in the book is the richness of their ornamentation and the thin, flexible characteristics of the original sheets. They are all further united by having been collected by Olga Hirsch (1889-1968), a trained bookbinder who left her collection of some 3,500 papers to the British Library, where they remain one of the largest and most diverse collections of decorated papers in the world. This

anthology brings together some of the most exquisite examples. It will delight and inspire designers, bibliophiles and anyone with a love of pattern and decoration.

Formula One: The Champions Maurice Hamilton, 2020-03-03 Since the Grand Prix's start in 1950 just 33 men have achieved the accolade of F1 World Champion. For the first time, legendary F1 commentator Maurice Hamilton and award-winning photographers Bernard and Paul-Henri Cahier bring the heroes of this iconic sport together, in a stunning photographic portrayal of the poise, skill and winning mindset that separates the fast from the furious, the elite from the talented. With exclusive quotes from icons such as Lewis Hamilton and Nico Rosberg, and including Maurice's historic interviews with the sport's lost heroes – including James Hunt and Ayrton Senna – *F1: The Champions* is a beautiful tribute to the most ferocious of sports and the incredible sportsmen who drive at the edge in pursuit of greatness.

*The Science of Formula 1 Design* David Tremayne, 2009 Leading F1 journalist David Tremayne unravels the mysteries of modern Grand Prix car design. The authoritative, extensively illustrated text explains just how an F1 car works, and this revised and updated third edition includes new material about the rules changes introduced for the 2009 season. The philosophy and technology behind the chassis, engine, transmission, electronics, steering, suspension, brakes, tires and aerodynamics are analyzed, and the important question of how these parts and systems interact is explored. This is an absorbing insight into the secretive and technology-driven world of racing car design at its highest level.

*Mr. Gumpy's Outing* John Burningham, 2001-05 Mr. Gumpy accepts more and more riders on his boat until the inevitable occurs.
