One child is worried that her family is just too different to explain, but listens as her classmates talk about what makes their families special. One is raised by a grandmother, and another has two dads. One has many stepsiblings, and another has a new baby in the family. As her classmates describe who they live with and who loves them — family of every shape, size and every kind of relation — the child realizes that as long as her family is full of caring people, it is special. Sun of Suns Karl Schroeder,2007-07-31 In Karl Schroeder's sci-fi thriller, Hayden Griffin has come to the city of Rush with one thing in mind: to take murderous revenge for his parents' deaths. It is the distant future. The world known as Virga is a fullerene balloon three thousand kilometers in diameter, filled with air, water, and aimlessly floating chunks of rock. The humans who live in this vast environment must build their own fusion suns and towns that are in the shape of enormous wood and rope wheels that are spun for gravity. Young, fit, bitter, and friendless, Hayden Griffin is a very dangerous man. He's come to the city of Rush in the nation of Slipstream with one thing in mind: to take murderous revenge for the deaths of his

parents six years ago. His target is Admiral Chaison Fanning, head of the fleet of Slipstream, which conquered Hayden's nation of Aerie years ago. And the fact that Hayden's spent his adolescence living with pirates doesn't bode well for Fanning's chances . . . The Day You Begin Jacqueline Woodson,2018-08-28 A #1 NEW YORK TIMES BESTSELLER! Featured in its own episode in the Netflix original show Bookmarks: Celebrating Black Voices! National Book Award winner Jacqueline Woodson and two-time Pura Belpré Illustrator Award winner Rafael López have teamed up to create a poignant, yet heartening book about finding courage to connect, even when you feel scared and alone. There will be times when you walk into a room and no one there is quite like you. There are many reasons to feel different. Maybe it's how you look or talk, or where you're from; maybe it's what you eat, or something just as random. It's not easy to take those first steps into a place where nobody really knows you yet, but somehow you do it. Jacqueline Woodson's lyrical text and Rafael López's dazzling art reminds us that we all feel like outsiders sometimes-and how brave it is that we go forth anyway. And that sometimes, when we reach out and begin to share our stories, others will be happy to meet us halfway. (This book is also available in Spanish, as *El Día En Que Descubres Quién Eres!*)

Attack of the 50 Foot Blockchain David Gerard,2017-07-24 An experimental new Internet-based form of money is created that anyone can generate at home; people build frightening firetrap computers full of video cards, putting out so much heat that one operator is hospitalised with heatstroke and brain damage. A young physics student starts a revolutionary new marketplace immune to State coercion; he ends up ordering hits on people because they might threaten his great experiment, and is jailed for life without parole. Fully automated contractual systems are proposed to make business and

the law work better; the contracts people actually write are unregulated penny stock offerings whose fine print literally states that you are buying nothing of any value. The biggest crowdfunding in history attracts \$150 million on the promise that it will embody “the steadfast iron will of unstoppable code”; upon release it is immediately hacked, and \$50 million is stolen. How did we get here? David Gerard covers the origins and history of Bitcoin to the present day, the other cryptocurrencies it spawned including Ethereum, the ICO craze and the 2017 crypto bubble, and the attempts to apply blockchains and smart contracts to business. Plus a case study on blockchains in the music industry. Bitcoin and blockchains are not a technology story, but a psychology story. Remember: if it sounds too good to be true, it almost certainly is. “A sober riposte to all the upbeat forecasts about cryptocurrency” — New York Review of Books “A very convincing takedown of the whole phenomenon” — BBC News
