Barbershops of America Rob Hammer,2020 Barbershops are synonymous with great memories, and nostalgic by the smells and feeling of a fresh cut or shave. Barbershops of America is the product of a 7-year journey by Rob Hammer, who traveled to all 50 states of the USA, documenting the disappearing old-school barbershop and the men who were staples of their community. Photographs and stories chronicle the barbershops of old, but also capture the stark contrast that is the next generation of traditional barbers. These new-school barbers may look like the polar opposite of what a traditional barber would look like, yet despite the obvious difference in the way these professionals carry themselves, their purpose is consistent: to carry on the tradition that they love.--Back cover

Daughter of the White River Denise Parkinson,2009-04-30 The tragic, true story of Helen Spence, the teenager who murdered her father's killers in the insulated lower White River area of Arkansas in 1931. The once-thriving houseboat communities along Arkansas's White River are long gone, and few remember the sensational murder story that set local darling Helen Spence on a tragic path. In 1931, Spence shocked Arkansas when she avenged her father's murder in a DeWitt courtroom. The state soon discovered that no prison could hold her. For the first time, prison records are unveiled to provide an essential portrait. Join author Denise Parkinson for an intimate look at a Depression-era tragedy. The legend of Helen Spence refuses to be forgotten—despite her unmarked grave. “Most memorably, Parkinson evokes the natural beauty of the White River itself. But more importantly, she's given Helen Spence, daughter of the river, a sympathetic hearing—something in its pulp version of events Daring Detective did not.”—Memphis Flyer “Denise details Helen's life, from the murder of her father to the horrific treatment she received at the hands of the law, including how prison officials seemed to entice her to escape a final time, with the attempt culminating in her murder.”—Only in Arkansas

Hacker, Hoaxer, Whistleblower, Spy Gabriella Coleman,2015-10-06 The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous' deepest, darkest secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside-outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

Enough Roger Thurow,2010 For more than thirty years, humankind has known how to grow enough food to end chronic hunger worldwide. Yet while the "Green Revolution" succeeded in South America and Asia, it never got to Africa. More than 9 million people every year die of hunger, malnutrition, and related diseases every year - most of them in Africa and most of them children. More die of hunger in Africa than from AIDS and malaria combined. Now, an impending global food crisis threatens to make things worse. In the west we think of famine as a natural disaster, brought about by drought; or as the legacy of brutal dictators. But in this powerful investigative narrative, Thurow & Kilman show exactly how, in the past few decades, American, British, and European policies conspired to keep Africa hungry and unable to feed itself. As a new generation of activists work to keep famine from spreading, Enough is essential reading on a humanitarian issue of utmost urgency.

Desolation Angels Jack Kerouac,1980 With the publication of On the Road in 1957, Jack Kerouac became at once the spokesman and hero of the Beat Generation. Along with such visionaries as William S. Burroughs and Allen Ginsberg, Kerouac changed the face of American literature, igniting a counterculture revolution that even now, decades later, burns brighter than ever in Desolation Angels.

Main Street Sinclair Lewis,2023-01-03 The novel written by Sinclair Lewis is set in the small town of Gopher Prairie, Minnesota, a fictionalized version of Sauk Centre, Minnesota. The novel takes place in the 1910s, with references to the start of World War I, the United States' entry into the war, and the years following the end of the war, including the start of Prohibition. Satirizing small-town life, Main Street is perhaps Sinclair Lewis's most famous book, and led in part to his eventual 1930 Nobel Prize for Literature. It relates the life and struggles of Carol Milford Kennicott as she comes into conflict with the small-town mentality of the residents of Gopher Prairie. Highly acclaimed upon publication, Main Street remains a recognized American classic.

A Revolution Down on the Farm Paul K. Conkin,2008-09-01 At a time when food is becoming increasingly scarce in many parts of the world and food prices are skyrocketing, no industry is more important than agriculture. Humans have been farming for thousands of years, and yet agriculture has undergone more fundamental changes in the past 80 years than in the previous several centuries. In 1900, 30 million American farmers tilled the soil or tended livestock; today there are fewer than 4.5 million farmers who feed a population four times larger than it was at the beginning of the century. Fifty years ago, the planet could not have sustained a population of 6.5 billion; now, commercial and industrial agriculture ensure that millions will not die from starvation. Farmers are able to feed an exponentially growing planet because the greatest industrial revolution in history has occurred in agriculture since 1929, with U.S. farmers leading the way. Productivity on American farms has increased tenfold, even as most small farmers and tenants have been forced to find other work. Today, only 300,000 farms produce approximately ninety percent of the total output, and overproduction, largely subsidized by government programs and policies, has become the hallmark of modern agriculture. *A Revolution Down on the Farm: The Transformation of American Agriculture since 1929* charts the profound changes in farming that have occurred during author Paul K. Conkin's lifetime. His personal experiences growing up on a small Tennessee farm complement compelling statistical data as he explores America's vast agricultural transformation and considers its social, political, and economic consequences. He examines the history of American agriculture, showing how New Deal innovations evolved into convoluted commodity programs following World War II. Conkin assesses the skills, new technologies, and government policies that helped transform farming in America and suggests how new legislation might affect farming in decades to come. Although the increased production and mechanization of farming has been an economic success story for Americans, the costs are becoming increasingly apparent. Small farmers are put out of business when they cannot compete with giant, non-diversified corporate farms. Caged chickens and hogs in factory-like facilities or confined dairy cattle require massive amounts of chemicals and hormones ultimately ingested by consumers. Fertilizers, new organic chemicals, manure disposal, and genetically modified seeds have introduced environmental problems that are still being discovered. *A Revolution Down on the Farm* concludes with an evaluation of farming in the twenty-first century and a distinctive meditation on alternatives to our present large scale, mechanized, subsidized, and fossil fuel and chemically dependent system.

Hollow Land Eyal Weizman,2012-08-07 From the tunnels of Gaza to the militarized airspace of the Occupied Territories, Eyal Weizman unravels Israel's mechanisms of control and its transformation of Palestinian towns, villages and roads into an artifice where all natural and built features serve military ends. Weizman traces the development of this strategy, from the influence of archaeology on urban planning, Ariel Sharon's reconceptualization of military defence during the 1973 war, through the planning and architecture of the settlements, to the contemporary Israeli discourse and practice of urban warfare and airborne targeted assassinations. *Hollow Land* lays bare the political system at the heart of this complex and terrifying project of late-modern colonial occupation.

Pandora's Garden Clinton Crockett Peters,2018-05-01 Pandora's Garden profiles invasive or unwanted species in the natural world and examines how our treatment of these creatures sometimes parallels in surprising ways how we treat each other. Part essay, part nature writing, part narrative nonfiction, the chapters in *Pandora's Garden* are like the biospheres of the globe; as the successive chapters unfold, they blend together like ecotones, creating a microcosm of the world in which we sustain nonhuman lives but also contain them. There are many reasons particular flora and fauna may be unwanted, from the physical to the psychological. Sometimes they may possess inherent qualities that when revealed help us to interrogate human perception and our relationship to an unwanted other. *Pandora's Garden* is primarily about creatures that humans don't get along with, such as rattlesnakes and sharks, but the chapters also take on a range of other subjects, including

stolen children in Australia, the treatment of illegal immigrants in Texas, and the disgust function of the human limbic system. Peters interweaves these diverse subjects into a whole that mirrors the evolving and interrelated world whose surprises and oddities he delights in revealing.
