Make: High-Power Rockets Mike Westerfield, 2017-11-03 *Make: High-Power Rockets* is for all the science geeks who look at the moon and try to figure out where Neil Armstrong walked, watch in awe as rockets lift off, and want to fly their own model rockets. See You in the Cosmos Jack Cheng, 2017-02-28 “I haven't read anything that has moved me this much since *Wonder*.” —Jennifer Niven, author of *All the Bright Places* A space-obsessed boy and his dog, Carl Sagan, take a journey toward family, love, hope, and awe in this funny and moving novel for fans of *Counting by 7s*, *Walk Two Moons*, and *The Curious Incident of the Dog in the Night-Time*. 11-year-old Alex Petroski loves space and rockets, his mom, his brother, and his dog Carl Sagan—named for his hero, the real-life astronomer. All he wants is to launch his golden iPod into space the way Carl Sagan (the man, not the dog) launched his Golden Record on the Voyager spacecraft in 1977. From Colorado to New Mexico, Las Vegas to L.A., Alex records a journey on his

iPod to show other lifeforms what life on earth, his earth, is like. But his destination keeps changing. And the funny, lost, remarkable people he meets along the way can only partially prepare him for the secrets he'll uncover—from the truth about his long-dead dad to the fact that, for a kid with a troubled mom and a mostly not-around brother, he has way more family than he ever knew. Jack Cheng's debut is full of joy, optimism, determination, and unbelievable heart. To read the first page is to fall in love with Alex and his view of our big, beautiful, complicated world. To read the last is to know he and his story will stay with you a long, long time. Stellar. —Entertainment Weekly "Life-embracing." —The Wall Street Journal Works beautifully. —The New York Times Book Review "Irresistible." —The Chicago Tribune "The best I've read in a long, long time." —Holly Goldberg Sloan, author of *Counting by 7s* "Riveting, inspiring, and sometimes hilarious." —Kirkus, starred review "A propulsive stream-of-conscious dive." —Publishers Weekly, starred review "A gift—a miracle." —Paul Griffin, author *When Friendship Followed Me Home* "Exuberant." —Booklist Full of the real kind of magic. —Ally Condie, author of *Matched* Absorbing, irresistible. —Common Sense Media "Incredible." —BookRiot Full of innocence and unwavering optimism. —SLC Inspiring. —Time for Kids "Powerfully affirms our human capacity for grace and love and understanding." —Gary D. Schmidt, author of *Okay for Now*

By Schism Rent Asunder David Weber, 2008-07-22 The sequel to the New York Times best seller *Off Armageddon Reef* The world has changed. The mercantile kingdom of Charis has prevailed over the alliance designed to exterminate it. Armed with better sailing vessels, better guns and better devices of all sorts, Charis faced the combined navies of the rest of the world at Darcos Sound and Armageddon Reef, and broke them. Despite the implacable hostility of the Church of God Awaiting, Charis still stands, still free, still tolerant, still an island of innovation in a world in which the Church

has worked for centuries to keep humanity locked at a medieval level of existence. But the powerful men who run the Church aren't going to take their defeat lying down. Charis may control the world's seas, but it barely has an army worthy of the name. And as King Cayleb knows, far too much of the kingdom's recent good fortune is due to the secret manipulations of the being that calls himself Merlin—a being that, the world must not find out too soon, is more than human. A being on whose shoulders rests the last chance for humanity's freedom. Now, as Charis and its archbishop make the rift with Mother Church explicit, the storm gathers. Schism has come to the world of Safehold. Nothing will ever be the same... in David Weber's *By Schism Rent Asunder*. Safehold Series 1. The Rocket Model Gordon J. Curphy, Robert Hogan, 2012-05-01

The Value of Drawing Instruction in the Visual Arts and Across Curricula Seymour Simmons III, 2021-03-29 By applying philosophical and historical perspectives to drawing instruction, this volume demonstrates how diverse teaching methods contribute to cognitive and holistic development applicable within and beyond the visual arts. Offering a new perspective on the art and science of drawing, this text reveals the often-unrecognized benefits that drawing can have on the human mind, and thus argues for the importance of drawing instruction despite, and even due to contemporary digitalization. Given the predominance of visual information and digital media, visual thinking in and through drawing may be an essential skill for the future. As such, the book counters recent declines in drawing instruction to propose five Paradigms for teaching drawing - as design, as seeing, as experience and experiment, as expression, and as a visual language - with exemplary curricula for pre-K12 art and general education, pre-professional programs across the visual arts,

and continuing education. With the aid of instructional examples, this volume dispels the misconception of drawing as a talent reserved for the artistically gifted and posits it as a teachable skill that can be learned by all. This text will be of primary interest to researchers, scholars, and doctoral students with interests in drawing theory and practice, cognition in the arts, positive psychology, creativity theory, as well as the philosophy and history of arts education. Aligning with contemporary trends such as Design Thinking, STEAM, and Graphicacy, the text will also have appeal to visual arts educators at all levels, and other educators involved in arts integration.
