Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units

James F. Gebhardt, 2005 *Eyes Behind the Lines: US Army Long-Range Reconnaissance and Surveillance Units* is the 10th study in the Combat Studies Institute (CSI) Global War on Terrorism (GWOT) Occasional Paper series. This work is an outgrowth of concerns identified by the authors of *On Point: The United States Army in Operation IRAQI FREEDOM*. Specifically, these authors called into question the use of long-range surveillance (LRS) assets by commanders during that campaign and suggested an assessment ought to be made about their continuing utility and means of employment. This revision contains some important additional information the author received after this book was originally published. Major (Retired) James Gebhardt, of CSI, researched and wrote this Occasional Paper with that end in view. In this study, Gebhardt surveys the US Army's historical experience with LRRP and LRS units from the 1960s Cold War and Vietnam War, through their resurgence in the 1980s and use in Operations JUST CAUSE and DESERT STORM, to the advent of the GWOT. The paper's analytical framework examines each era of LRS units in terms of doctrine, organization, training, materiel, leadership, and personnel. In doing so, the author makes a strong case for continuing the LRS capability in the Army's force structure. The variety of environments and enemies likely to be faced by the military in the GWOT continues to demand the unique human intelligence abilities of trained and organized LRS units. As the Army leads the Armed Forces of the United States in combating terrorists where they live, the lessons found in this survey remain timely and relevant.

Stirling Engine Design Manual William Martini, 2013-01-25 For Stirling engines to enjoy widespread application and acceptance, not only must the fundamental operation of such engines be widely understood, but the requisite analytic tools for the stimulation, design, evaluation and optimization of

Stirling engine hardware must be readily available. The purpose of this design manual is to provide an introduction to Stirling cycle heat engines, to organize and identify the available Stirling engine literature, and to identify, organize, evaluate and, in so far as possible, compare non-proprietary Stirling engine design methodologies. This report was originally prepared for the National Aeronautics and Space Administration and the U. S. Department of Energy.

Mummy Portraits of Roman Egypt Marie Svoboda, Caroline Cartwright, 2020-08-25 This publication presents fascinating new findings on ancient Romano-Egyptian funerary portraits preserved in international collections. Once interred with mummified remains, nearly a thousand funerary portraits from Roman Egypt survive today in museums around the world, bringing viewers face-to-face with people who lived two thousand years ago. Until recently, few of these paintings had undergone in-depth study to determine by whom they were made and how. An international collaboration known as APPEAR (Ancient Panel Paintings: Examination, Analysis, and Research) was launched in 2013 to promote the study of these objects and to gather scientific and historical findings into a shared database. The first phase of the project was marked with a two-day conference at the Getty Villa. Conservators, scientists, and curators presented new research on topics such as provenance and collecting, comparisons of works across institutions, and scientific studies of pigments, binders, and supports. The papers and posters from the conference are collected in this publication, which offers the most up-to-date information available about these fascinating remnants of the ancient world. The free online edition of this open-access publication is available at www.getty.edu/publications/mummyportraits/ and includes zoomable illustrations and graphs. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book.

Uncommon Type Tom Hanks, 2017-10-17 A collection of seventeen wonderful short stories showing that the legendary Tom Hanks is as talented a writer as he is an actor. "Reading Tom Hanks's Uncommon Type is like finding out that Alice Munro is also the greatest actress of our time." —Ann Patchett, bestselling, Pulitzer Prize-winning author of *The Dutch House* A gentle Eastern European immigrant arrives in New York City after his family and his life have been torn apart by his country's civil war. A man who loves to bowl rolls a perfect game--and then another and then another and then many more in a row until he winds up ESPN's newest celebrity, and he must decide if the combination of perfection and celebrity has ruined the thing he loves. An eccentric billionaire and his faithful executive assistant venture into America looking for acquisitions and discover a down and out motel, romance, and a bit of real life. These are just some of the tales Tom Hanks tells in this first collection of his short stories. They are surprising, intelligent, heartwarming, and, for the millions and millions of Tom Hanks fans, an absolute must-have!

Assessing the People's Liberation Army in the Hu Jintao Era Roy Kamphausen, David Lai, Travis Tanner, 2014-06-14 It is my pleasure to introduce this 2013 publication by the Strategic Studies Institute (SSI) of the U.S. Army War College, the National Bureau of Asian Research (NBR), and the United States Pacific Command, focusing on A Retrospective of the People's Liberation Army in

the Hu Jintao Era (2002-12). The papers in this book provide a valuable and insightful review of the People's Liberation Army's (PLA) many impressive advances over the past decade. Solid scholarship on changes taking place in the PLA helps us understand how the Chinese view the employment of military power to support broader policy aims. A historical review of patterns and developments in training, operations, acquisitions, and political military relations can greatly assist that understanding. The outstanding work in this jointly sponsored study is an important contribution toward this end. This volume provides unique insights into the PLA's achievements over the span of Hu Jintao's tenure...

New Individualist Review Milton Friedman, 1981-05 Over its life the Review printed seminal writing on free market and conservative topics by remarkably mature students and by Russell Kirk, Ludwig von Mises, George Stigler, Benjamin Rogge, and other already established men. What characterized the Review writers was their rigor of thought and concern for principles, features that coexist naturally. —Chronicles Initially sponsored by the University of Chicago Chapter of the Intercollegiate Society of Individualists, the New Individualist Review was more than the usual campus magazine. It declared itself founded in a commitment to human liberty. Between 1961 and 1968, seventeen issues were published which attracted a national audience of readers. Its contributors spanned the libertarian-conservative spectrum, from F. A. Hayek and Ludwig von Mises to Richard M. Weaver and William F. Buckley, Jr. In his introduction to this reprint edition, Milton Friedman—one of the magazine's faculty advisors—writes that the Review set an intellectual standard that has not yet, I believe, been matched by any of the more recent publications in the same philosophical tradition.
