Jaws Peter Benchley, 2017-09-07 A special edition of Jaws by Peter Benchley reissued with a bright retro design to celebrate Pan's 70th anniversary. It was just another day in the life of a small Atlantic resort until the terror from the deep came to prey on unwary holiday makers. The first sign of trouble - a warning of what was to come - took the form of a young woman's body, or what was left of it, washed up on the long, white stretch of beach . . . A summer of terror had begun. Peter Benchley's Jaws first appeared in 1974. It has sold over twenty million copies around the world, creating a legend that refuses to die - it's never safe to go back in the water . . .

Act of War Jack Cheevers, 2014-12-02 WINNER OF THE SAMUEL ELIOT MORISON AWARD FOR NAVAL LITERATURE "I devoured *Act of War* the way I did *Flyboys*, *Flags of Our Fathers* and *Lost in Shangri-la*."—Michael Connelly, #1 New York Times Bestselling Author In 1968, the small, dilapidated American spy ship *USS Pueblo* set out to pinpoint military radar stations along the coast of North Korea. Though packed with advanced electronic-surveillance equipment and classified intelligence documents, its crew, led by ex-submarine officer

Pete Bucher, was made up mostly of untested young sailors. On a frigid January morning, the Pueblo was challenged by a North Korean gunboat. When Bucher tried to escape, his ship was quickly surrounded by more boats, shelled and machine-gunned, forced to surrender, and taken prisoner. Less than forty-eight hours before the Pueblo's capture, North Korean commandos had nearly succeeded in assassinating South Korea's president. The two explosive incidents pushed Cold War tensions toward a flashpoint. Based on extensive interviews and numerous government documents released through the Freedom of Information Act, *Act of War* tells the riveting saga of Bucher and his men as they struggled to survive merciless torture and horrendous living conditions set against the backdrop of an international powder keg.

Google Earth Engine Applications Lalit Kumar, Onesimo Mutanga, 2019-04-23 In a rapidly changing world, there is an ever-increasing need to monitor the Earth's resources and manage it sustainably for future generations. Earth observation from satellites is critical to provide information required for informed and timely decision making in this regard. Satellite-based earth observation has advanced rapidly over the last 50 years, and there is a plethora of satellite sensors imaging the Earth at finer spatial and spectral resolutions as well as high temporal resolutions. The amount of data available for any single location on the Earth is now at the petabyte-scale. An ever-increasing capacity and computing power is needed to handle such large datasets. The Google Earth Engine (GEE) is a cloud-based computing platform that was established by Google to support such data

processing. This facility allows for the storage, processing and analysis of spatial data using centralized high-power computing resources, allowing scientists, researchers, hobbyists and anyone else interested in such fields to mine this data and understand the changes occurring on the Earth's surface. This book presents research that applies the Google Earth Engine in mining, storing, retrieving and processing spatial data for a variety of applications that include vegetation monitoring, cropland mapping, ecosystem assessment, and gross primary productivity, among others. Datasets used range from coarse spatial resolution data, such as MODIS, to medium resolution datasets (Worldview -2), and the studies cover the entire globe at varying spatial and temporal scales.

Soviet-Russian AWACS Aircraft Yefim Gordon, Dmitriy Komissarov, 2010 The need to ensure effective protection of the Soviet airspace in areas lacking adequate cover by ground radars led the nation's aircraft designers to start working on airborne early warning systems. The Tupolev OKB was the first among the nation's aircraft design bureaus to create an 'eye in the sky', evolving the Tu-126 AEW aircraft from the Tu-114 long-haul turboprop airliner. The aircraft entered service in 1961, filling an important role with the Soviet Air Force until replaced in the early 1980s by the

Ilyushin/ Beriyev A-50 AWACS based on the IL-76MD transport. In addition to these two types, the book describes the highly unorthodox Antonov An-71 with its tail-mounted rotodome (intended for operations from a large aircraft carrier which eventually never materialized) and the Kamov Ka-31 shipboard AEW helicopter. Due mention is also made of projects that never got off the drawing board the Tu-156, IL-150 and Yakovlev Yak-44.

intersect at a point called the incenter that is equidistant from the sides of the triangle example is the angle bisector of $m\angle P$ find x if $m\angle 1 = 5$, $m\angle 8 = 28$, $m\angle 16 = 2$ is the angle bisector of $m\angle P$ so $m\angle 1 = m\angle 2$, $5x = 8$, $8x = 16$, $24 = 3x$, $8 = x$
