Kings of Battle US Self-Propelled Howitzers, 1981-2022

David Grummitt, 2023-12-30 It is for good reason that artillery is known as the 'king of battle'. In World War II the United States made good use of self-propelled howitzers, including those based on the chassis of the M4 Sherman tank. After 1945 the US developed both light and medium self-propelled howitzers, based on the M24 Chaffee, M41 Walker Bulldog and Sherman chassis. The first designs were plagued with problems and self-propelled artillery played only a minor role in the Korean War. By the mid 1960s, however, the M107 175mm, M109 155mm and M110 203mms self-propelled howitzers had entered service, and they proved their effectiveness during the Vietnam War. The M107 was relatively short-lived in US service, being retired in the late 1970s, but it played an important role with the Israel defense Forces. The M109 served with the US Army, as well as in many NATO armies and elsewhere, and saw action in the Middle East, in the Balkans, during the liberation of Kuwait, and in the invasion of Iraq. The M109 has now been in service for some sixty years and remains, in the guise of the M109A7, the current self-propelled howitzer of the US Army. The larger M110 203mm self-propelled howitzer similarly saw widespread service before it was retired in the early 1990s. Despite the emergence of rocket artillery, such as the Multiple Launch Rocket System, the self-propelled howitzer will remain one of the principal weapons systems of US military in the decades to come. The M107, M109 and M110 have proved popular subjects among modellers with a variety of kits available from the major manufacturers. As well as describing in detail the technical development and operational history of these guns, this book gives a full account of the wide range of modelling kits and accessories available in all the popular scales. Included is a modelling gallery which covers a range of variants and a section of large-scale color profiles which provide both information and inspiration for modellers and military enthusiasts alike.

Self-propelled Howitzers Simon Dunstan,1985

Assessment of Crusader John Matsumura,Randall

Steeb,John Gordon,1998 The research explores the utility of the Crusader system, a next-generation self-propelled howitzer and resupply vehicle, to the future of the U.S. Army, including both the near-term Army XXI and the farther-term Army After Next. Specific questions were asked about Crusader's ability to provide firepower on the future battlefield and to serve as a major technology carrier into the Army After Next era. The report answers these questions and addresses other issues that may surface in considering the relative need for a state-of-the-art, self-propelled howitzer in light of other Army interests.

European Buildings Florian Richter,Peter Dennis,2018-08-15

This is the perfect add-on supplement not just for Helion's famous 'Paper Boys' book series but for other wargames periods and systems too. In this book you will find all the building you need for a 18th and 19th rural or city landscaped terrain. Here will be some 22 pages of artwork intended to be cut straight out of the book pages. Subjects to include village buildings, a church, farmhouse, windmill etc. The models are scaled to 28mm, but through deft use of a photocopier can be rescaled for other popular sizes of figures.

Fire for Effect John J. McGrath,2010

Napoleonic Artillery Paul L. Dawson,Anthony L.

Dawson,Stephen Summerfield,2008-05-15 The Napoleonic Wars gripped Europe, and beyond, for over ten years at the beginning of the Nineteenth century. Hundreds of battles were fought between the armies of France (and its allies) and all those powers that wished to see Napoleon Bonaparte stopped in his tracks and an end to the French Empire. The battles and sieges of the Napoleonic Wars, which cost the lives of between 3 and 6 million men, made unprecedented use of large guns, and every participating army possessed a range of artillery. With the wars covering such a long period of time, and with so many armies

involved, the subject of Napoleonic artillery is a complicated one, and no work has attempted to examine all the weapons involved in a single, detailed volume. Until now. The product of years of research, this book presents most of what is known about the artillery pieces of the Napoleonic Wars. Including numerous drawings, contemporary illustrations and modern photographs of surviving guns, it will be an invaluable addition to the library of historians, modellers, wargamers and re-enactors.

German Military Vehicles of World War II Jean-Denis G.G.

Lepage,2014-11-18 This volume presents a cross-section of the most common transport vehicles produced and used by the German army. Tanks plus auxiliary vehicles such as cars, motorcycles, vans, ambulances, trucks and tractors made it possible for the troops to keep moving. These lightly armored or unarmored vehicles--aka soft skins--operated behind the front lines, maintaining supply lines, connecting armies with their home bases, and ultimately determining the outcome of battle. Beginning with the development of military vehicles in the early 1930s, this volume discusses the ways in which this new technology influenced and, to some extent, facilitated Hitler's program of rearmament. Nomenclature, standard equipment, camouflage and the combat roles of the various vehicles are thoroughly examined. Individual vehicle types are arranged and discussed by the following classifications: cars and motorcycles; trucks and tractors; half-tracks and wheeled combat vehicles. Accompanied by well-researched, detailed line drawings, each section deals with a number of individual vehicles, describing their design, manufacture and specific use.

The Things They Carried Tim O'Brien,2009-10-13 Look for

O'Brien's new book, *American Fantastica*, on sale October 24th A classic work of American literature that has not stopped changing minds and lives since it burst onto the literary scene, *The Things They Carried* is a ground-breaking meditation on war, memory, imagination, and the redemptive power of storytelling. *The Things They Carried* depicts the men of Alpha Company: Jimmy Cross, Henry Dobbins, Rat Kiley, Mitchell Sanders, Norman Bowker, Kiowa, and the character Tim O'Brien, who has survived his tour in Vietnam to become a father and writer at the age of forty-three. Taught everywhere—from high school classrooms to graduate seminars in creative writing—it has become required reading for any American and continues to challenge readers in their perceptions of fact and fiction, war and peace, courage and fear and longing. *The Things They Carried* won France's prestigious Prix du Meilleur Livre Etranger and the Chicago Tribune Heartland Prize; it was also a finalist for the Pulitzer Prize and the National Book Critics Circle Award.

Oldest Allies René Chartrand, 2012-09-18 During the war for Spanish independence from Napoleonic France, Portuguese and British troops launched a daring raid into southern Spain, siezing the ancient city of Alcantara. Napoleon had left his brother Joseph as King of Spain with some 300,000 French troops to put down the

Spaniards, nearly all of whom had revolted against French rule. At the beginning of 1809, British forces held most of Portugal, while Marshal Soult attacked the north. Porto and most of the upper Douro River basin were taken by the French, but they met with stiff resistance from semi-regular and guerrilla-like Portuguese troops led by General Silveira in the northeast. Taking the fight to the French, part of the British-led Loyal Lusitanian Legion, along with various Portuguese troops, raided deep into Spain. Both British and Portuguese leaders (including the warrior-like Bishop of Porto!) initiated raids into Spain. Even as Soult occupied Porto in January 1809, Sir Robert Wilson was further east with part of his green-uniformed Loyal Lusitanian Legion at the fortress of Almeida, having led just a few hundred men into Spain, to be joined by thousands of patriots, and eventually reaching the outskirts of Salamanca. Meanwhile, in Lisbon, command of the British army passed to Wellington. In May 1809, he marched north to liberate Porto while Silveira's levies pressed the French in the northeast. While Wellington and Silveira attacked Porto and northern Portugal, it was important to keep the French occupied elsewhere in Spain, to prevent their huge armies in Spain converging on northern Portugal and assisting Soult. To this end, Marshal Beresford, commanding the reorganized Portuguese Army, detached a large part of his most reliable troops - the British-led Loyal Lusitanian Legion - to raid the Spanish province of Estramadura, far to the south. 1,800 men of the Loyal Lusitanian Legion, along with other Portuguese troops, under the command of Lieutenant Colonel Mayne crossed the mountains into Estarmadura and raided the French border posts. The French soon fled, and the raiders quickly occupied Alcantara (the seat of the Medieval knightly order that bears its name). From here, some raiding parties went further east into Spain to cause as much trouble as possible to attract the attention of the French. This new Raid title will detail all aspects of this compelling clash of forces.

Computer Aided Engineering Eugeniusz Rusiński, Damian Pietrusiak, 2019-03-09 This book presents the proceedings of the 14th International Conference on Computer Aided Engineering, collecting the best papers from the event, which was held in Wrocław, Poland in June 2018. It includes contributions from researchers in computer engineering addressing the applied science and development of the industry and offering up-to-date information on the development of the key technologies in technology transfer. It is divided into the following thematic sections: • parametric and concurrent design, • advanced numerical simulations of physical systems, • integration of CAD/CAE systems for machine design, • presentation of professional CAD and CAE systems, • presentation of the modern methods of machine testing, • presentation of practical CAD/CAM/CAE applications: – designing and manufacturing of machines and technical systems, – durability prediction, repairs and retrofitting of power equipment, – strength and thermodynamic analyses of power equipment, – design and calculation of various types of load-carrying structures, – numerical methods of dimensioning materials handling and long-distance transport equipment (cranes, gantries, automotive, rail, air, space and other special vehicles and earth-moving machinery), • CAE integration problems. The conference and its proceedings offer a major interdisciplinary forum for researchers and engineers in innovative studies and advances in this dynamic field.

Lethal and Non-Lethal Fires Army University Press, Thomas G. Bradbeer, 2018-09 Lethal and Non-Lethal Fires: Historical Case Studies of Converging Cross-Domain Fires in Large Scale Combat Operations, provides a collection of ten historical case studies from World War I through Desert Storm. The case studies detail the use of lethal and non-lethal fires conducted by US, British,

Canadian, and Israeli forces against peer or near-peer threats. The case studies span the major wars of the twentieth-century and present the doctrine the various organizations used, together with the challenges the leaders encountered with the doctrine and the operational environment, as well as the leaders' actions and decisions during the conduct of operations. Most importantly, each chapter highlights the lessons learned from those large scale combat operations, how they were applied or ignored and how they remain relevant today and in the future.

I Love Jesus, But I Want to Die Sarah J.

Robinson, 2021-05-11 A compassionate, shame-free guide for your darkest days “A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized.”—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn’t cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to “choose joy” and “pray more.” So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you’re left wondering if God has abandoned you. You just want a way out. But there’s hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn’t look like what you expect.
