Joshua Slocum

The World of Model Ships and Boats Guy R. Williams,1971

Paper Captain Juliette Cezzar,2008 Ahoy there! Paper Captain takes the reader through a century of nautical history with facts, figures, and stunning illustrations, then lets every fantasy sailor cut out and build twenty beautiful die-cut paper models—designed to float! Devised by the author and designer of Paper Pilot, Paper Captain is a beautifully illustrated voyage into the world of model boats, from speed boats and tugs to luxury liners and naval catamarans, bringing together stunning archival photographs and colorful technical drawings with expertly designed die-cut models that readers can cut out and assemble. The book presents innovative histories of twenty feats of maritime engineering drawn from maritime museums around the world, from the legendary British HMS Victory to the USS Monitor at the Mariner's Museum in Virginia and the German U-505 at Chicago's Museum of Science and Industry. Each boat is accompanied by its naval history, facts and statistics, and photographs of the vessels in action. Included are twenty finely detailed die-cut paper models, each presented with clear instructions for assembly and helpful advice for deploying your paper fleet—whether in the ocean or the bathtub.

The Voyages of Joshua Slocum Joshua Slocum,1985 This definitive edition of all of Captain Joshua Slocum's writings is now being reissued in time for the 100th anniversary of Slocum's epic singlehanded voyage.

Strangers on the Horizon Samuel Halpern,2019-11-11 On April 22, 1912, during the

third day of the US Senate investigation into the loss of Titanic, it was learned that there had been a steamer in sight of Titanic. This steamer had failed to respond to distress rockets that were being sent aloft from the stricken Titanic as she slowly sank beneath the surface of the Atlantic following a collision with an iceberg. The following day, on April 23, 1912, a story was printed in a small New England newspaper that claimed that a small tramp steamer, the SS Californian, had seen the lights and rockets of Titanic, and had refused to come to her aid. This book takes a new look into what has since been called the Californian affair. It is significantly different from previous treatments of this highly contentious subject in that it does not try to simply interpret or reinterpret every single word that eyewitnesses said in 1912. Instead, it takes a novel approach of applying specific analytical techniques to test the many conflicting and contradictory statements that were made in 1912 in order to find the reality of what took place. It includes detailed analysis of distances, bearings, headings, speeds, drift rates, ranges of visibility and other quantifiable information that has never before been examined in any great detail. It provides answers to the question of where was Californian relative to Titanic that night, and were they in sight of each other. This book also looks into the role played by several other vessels that were in the area that memorable night, delving into some of the claims made afterward concerning rescue attempts and movements. In addition, the book also explores the moments leading up to, and immediately following, Titanic's collision with an iceberg, piecing together a detailed moment-by-moment picture of the events and actions that took place from the time the fatal iceberg was first spotted, to the time that the iceberg was last seen fading astern into the dark of night.

Ship Modeling Simplified: Tips and Techniques for Model Construction from Kits Frank Mastini, 1990-03-22 In *Ship Modeling Simplified*, master model builder Frank Mastini puts to paper the methods he's developed over 30 years at the workbench to help novices take their first steps in an exciting pastime. You don't need the deftness of a surgeon or the vocabulary of an old salt to build a model. What you need is an understanding coach. Mastini leads readers from the mysteries of choosing a kit and setting up a workshop through deciphering complicated instructions and on to painting, decorating, and displaying finished models--with patience and clarity, not condescension. He reveals dozens of shortcuts: How to plank a hull egg-shell tight; how to build and rig complicated mast assemblies without profanity; how to create sails that look like sails. . . . And along the way he points out things that beginners usually do wrong--beforehand, not after they've taken hammers to their projects. *Ship Modeling Simplified* even includes an Italian-English dictionary of nautical terms, the key to assembling the many high-quality Italian kits on the American market. Model building is fun, and not nearly as difficult as some experts would have you believe. Here is everything you'll ever need to get started in a hobby that will last a lifetime.

The Royal Yacht Caroline, 1749 Sergio Bellabarba, Giorgio Osculati, 1989

Building Plank-on-Frame Ship Models Ron McCarthy, 2004 The 'plank-on-frame' method is the pre-eminent ship modelling technique, which nearly all model shipwrights aspire to: this practical manual is the foremost guide to its intricacies. Taking as his example the two-masted sloop *Cruiser of 1752*, the author leads the reader through every stage of building a model of the vessel, from preliminary research and taking off lines to the actual

construction of the hull and fittings, and its masting and rigging. Each clear, step-by-step stage is described in the text and illustrated with explanatory line drawings and photographs. Though a single ship is employed as an example, the techniques can equally well be applied to any wooden sailing ship. Since original publication in 1994 this volume has established itself as the standard work of reference for model hull construction and is indispensable for modelmakers who pride themselves on an accurate, elegant scratch-built technique.

Beans, Bullets, and Black Oil Worrall Reed Carter, 1953

N by E Rockwell Kent, 1996-07-26 A classic tale of seafaring, shipwreck, and survival, reprinted from Wesleyan University Press's 1978 facsimile of the original. When artist, illustrator, writer, and adventurer Rockwell Kent first published *N by E* in a limited edition in 1930, his account of a voyage on a 33-foot cutter from New York Harbor to the rugged shores of Greenland quickly became a collectors' item. Little wonder, for readers are immediately drawn to Kent's vivid descriptions of the experience; we share the feeling of wind and wet and cold, of lifting seas and steep descents, of rolling over as the wind gusts hit, and the sound of wind in the shrouds, of hard spray flung on a drum-tight canvas, of rushing water at the scuppers, of the gale shearing a tormented sea. When the ship sinks in a storm-swept fjord within 50 miles of its destination, the story turns to the stranding and subsequent rescue of the three-man crew, salvage of the vessel, and life among native

Greenlanders. Magnificently illustrated by Kent's wood-block prints and narrated in his poetic and highly entertaining style, this tale of the perils of killer nor'easters, treacherous icebergs, and impenetrable fog—and the joys of sperm whales breaching or dawn unmasking a longed-for landfall—is a rare treat for old salts and landlubbers alike.

The Built-Up Ship Model Charles G. Davis, 2012-08-09 A highly detailed, superbly illustrated manual introducing serious model builders to hand-crafting ship models from the bottom up. Not for beginners. 133 illustrations.

Tidewater Triumph Geoffrey Marsh Footner, 1998 The fast, nimble pilot schooners of the Chesapeake Bay--employed not only for piloting but also for cargo carrying--began to build their legend in the eighteenth century, becoming blockade runners during the American Revolution, privateering vessels during the War of 1812, and armed dispatch and policing vessels for European navies. They were also a favored type for the activities of pirates, smugglers, and slavers. Variations of the final clipper model of the Baltimore schooner continued the vessels' reputation through the nineteenth century as both great yachts and humble pungy schooners carrying produce. Geoffrey Footner documents the family tree of this distinctive American schooner in both text and illustration, including hull lines from sources around the world.

Japanese Wooden Boatbuilding Douglas Brooks, 2021-09 This is the story of the author's apprenticeships with Japanese masters to build five unique and endangered traditional boats. It is part ethnography, part instruction, and part the personal story of a wooden boatbuilder fueled by a passion to preserve a craft tradition on the brink of extinction. Over the course of 17 trips to Japan, Douglas Brooks traveled over 30,000 miles to seek out and

interview Japan's elderly master boatbuilders; he built boats with five of them, all in their seventies and eighties, between 1996 and 2010. For most of them, Brooks was their sole and last apprentice. Part I introduces significant aspects of traditional Japanese boatbuilding: design, workshop and tools, wood and materials, joinery and fastenings, propulsion, ceremonies, and the apprenticeship system. Part II details each of his five apprenticeships, concluding with a poignant chapter on Japan's sole remaining traditional shipwright. This fascinating book fills a large and long-standing gap in the literature on Japanese crafts, and will be of interest to boatbuilders, woodworkers, and all those impressed with the marvels of Japanese design and workmanship.
