*The Innovator's DNA* Jeff Dyer, Hal Gregersen, Clayton M. Christensen, 2011-07-12 A new classic, cited by leaders and media around the globe as a highly recommended read for anyone interested in innovation. In *The Innovator's DNA*, authors Jeffrey Dyer, Hal Gregersen, and bestselling author Clayton Christensen (*The Innovator's Dilemma*, *The Innovator's Solution*, *How Will You Measure Your Life?*) build on what we know about disruptive innovation to show how individuals can develop the skills necessary to move progressively from idea to impact. By identifying behaviors of the world's best innovators—from leaders at Amazon and Apple to those at Google, Skype, and Virgin Group—the authors outline five discovery skills that distinguish innovative entrepreneurs and executives from ordinary managers: Associating, Questioning, Observing, Networking, and Experimenting. Once you master these competencies (the authors provide a self-assessment for rating your own innovator's DNA), the authors explain how to generate ideas, collaborate to implement them, and build innovation skills throughout the organization to result in a competitive edge. This innovation advantage will translate into a premium in your company's stock price—an innovation premium—which is possible only by building the code for innovation right into your organization's people, processes, and guiding philosophies. Practical and provocative, *The Innovator's DNA* is an essential resource for individuals and teams who want to strengthen their innovative prowess.

Is Our Food Killing Us? Joy Manning, 2021-07-13 This thought-provoking volume from noted food writer Joy Manning dissects how the production and consumption of food have become harmful to our personal, societal, and environmental health—and assesses the possible remedies. In the developed world, small-scale family farms have largely been replaced by factory farms, shared meals have given way to eating on the go, and our favorite mass-produced foods can be purchased around the globe. These might seem like indicators of progress in a globalized world that supports a population of 7.7 billion; however, with chronic obesity on the rise, our food laced with additives and chemicals, and the environment devastated by industrial farming, pesticides, fertilizers, and monoculture, it is time to reevaluate what we eat and how we eat it. In *Is Our Food Killing Us?*, food writer Joy Manning explores the ways in which our food systems have failed us and how we can build a better, more sustainable future. Manning investigates how human bodies and brains respond to different flavors and food groups, and the ways in which corporations have exploited this to create hyperpalatable food products without nutritional value. She then critically addresses how companies market their products to maximize profit at the expense of public health, explaining how fast food came to rule. Zooming out and looking at the large-scale effects of diet, Manning examines the disastrous impact of modern agribusiness on climate change and biodiversity loss. Finally, Manning carefully considers solutions and how we can regain a healthier relationship with food, from eating organic produce to reintroducing family meals, and from changing how we buy food to adopting a plant-based diet.

**The Mushroom at the End of the World** Anna Lowenhaupt Tsing, 2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps

forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

**BEVERLY PARK: the Kiddieland That Inspired Walt Disney** Jay Jennings, 2018-11-13 Before Walt Disney built Disneyland, he frequently visited Beverly Park to learn the ins and outs of the amusement park industry. Located in Los Angeles, California, on the corner of Beverly Boulevard and La Cienega (where the Beverly Center now stands), Beverly Park operated from 1943-74 and during that time it was known as an iconic, kiddieland amusement park that was famous for its innovative rides, birthday parties, movie star sightings and where divorced dads brought their children on the weekends. A few yards away from Beverly Park was Ponyland, where boys and girls were whisked around a track by their favorite pony. This book documents the history of Beverly Park, its founder, ride designer Dave Bradley and the park's connection to Walt Disney, including 175 black-and-white photographs that have never been published.

*Encyclopedia of Junk Food and Fast Food* Andrew F. Smith, 2006-08-30 Eating junk food and fast food is a great all-American passion. American kids and grownups love their candy bars, Big Macs and supersized fries, Doritos, Twinkies, and Good Humor ice cream bars. The disastrous health effects from the enormous appetite for these processed fat- and sugar-loaded foods are well publicized now. This was particularly dramatically evidenced by *Super Size Me* (2004), filmmaker Morgan Spurlock's 30-day all-McDonald's diet in which his liver suffered the same poisoning as if he had been on an extended alcohol binge. Through increased globalization, American popular food culture is being increasingly emulated elsewhere in the world, such as China, with the potential for similar disastrous consequences. This A-to-Z reference is the first to focus on the junk food and fast food phenomena from a multitude of angles in addition to health and diet concerns. More than 250 essay entries objectively explore the scope of the topics to illuminate the American way through products, corporations and entrepreneurs, social history, popular culture, organizations, issues, politics, commercialism and consumerism, and much more. Interest in these topics is high. This informative and fascinating work, with entries on current controversies such as mad cow disease and factory farming, the food pyramid, movie tie-ins, and marketing to children, will be highly useful for reports, research, and browsing. It takes readers behind the scenes, examining the significance of such things as uniforms, training, packaging, and franchising. Readers of every age will also enjoy the nostalgia factor, learning about the background of iconic drive-ins, the story behind the mascots, facts about their favorite candy bar, and collectables. Each entry ends with suggested reading. Besides an introduction, a timeline, glossary, bibliography, resource guide, and photos enhance the text. Sample entries: A&W Root Beer; Advertising; Automobiles; Ben & Jerry's; Burger King; Carhops; Center for Science in the Public Interest; Christmas; Cola Wars; Employment; Fair Food; Fast Food Nation; Hershey, Milton; Hollywood; Injury; Krispy Kreme; Lobbying; Nabisco; Obesity; PepsiCo; Salt; Soda Fountain; Teen Hangouts; Vegetarianism; White Castle; Yum! Brands, Inc.

**The Other End of the Leash** Patricia McConnell, Ph.D., 2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its

individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover:

- How you can get your dog to come when called by acting less like a primate and more like a dog
- Why the advice to “get dominance” over your dog can cause problems
- Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief
- How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!”

Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

**We Are What We Eat** Donna R. Gabaccia, 2009-07-01 Ghulam Bombaywala sells bagels in Houston. Demetrios dishes up pizza in Connecticut. The Wangs serve tacos in Los Angeles. How ethnicity has influenced American eating habits—and thus, the make-up and direction of the American cultural mainstream—is the story told in *We Are What We Eat*. It is a complex tale of ethnic mingling and borrowing, of entrepreneurship and connoisseurship, of food as a social and political symbol and weapon—and a thoroughly entertaining history of our culinary tradition of multiculturalism. The story of successive generations of Americans experimenting with their new neighbors’ foods highlights the marketplace as an important arena for defining and expressing ethnic identities and relationships. *We Are What We Eat* follows the fortunes of dozens of enterprising immigrant cooks and grocers, street hawkers and restaurateurs who have cultivated and changed the tastes of native-born Americans from the seventeenth century to the present. It also tells of the mass corporate production of foods like spaghetti, bagels, corn chips, and salsa, obliterating their ethnic identities. The book draws a surprisingly peaceful picture of American ethnic relations, in which “Americanized” foods like Spaghetti-Os happily coexist with painstakingly pure ethnic dishes and creative hybrids. Donna Gabaccia invites us to consider: If we are what we eat, who are we? Americans’ multi-ethnic eating is a constant reminder of how widespread, and mutually enjoyable, ethnic interaction has sometimes been in the United States. Amid our wrangling over immigration and tribal differences, it reveals that on a basic level, in the way we sustain life and seek pleasure, we are all multicultural.

God in a Cup Michaela Weissman, 2011-06-01 Follow the ultimate coffee geeks on their worldwide hunt for the best beans. Can a cup of coffee reveal the face of God? Can it become the holy grail of modern-day knights errant who brave hardship and peril in a relentless quest for perfection? Can it change the world? These questions are not rhetorical. When highly prized coffee beans sell at auction for \$50, \$100, or \$150 a pound wholesale (and potentially twice that at retail), anything can happen. In *God in a Cup*, journalist and late-blooming adventurer Michaela Weissman treks into an exotic and paradoxical realm of specialty coffee where the successful traveler must be part passionate coffee connoisseur, part ambitious entrepreneur, part activist, and part Indiana Jones. Her guides on the journey are the nation’s most heralded coffee business hotshots: Counter Culture’s Peter Giuliano, *Intelligentsia*’s Geoff Watts, and *Stumptown*’s Duane Sorenson. With their obsessive standards and fiercely competitive baristas, these roasters are creating a new culture of coffee connoisseurship in America—a culture in which \$10 lattes are both a purist’s pleasure and a way to improve the lives of third-world farmers. If you love a good cup of coffee—or a great adventure story—you’ll love this unprecedented up-close look at the people and passions behind today’s best beans. “Weissman illustrates how the origin, flavor compounds and socioeconomic impact of a cup of coffee are relevant now more than ever. . . . Tagging along behind the main characters in today’s specialty coffee scene, [she] travels from the exotic to the expected to artfully deconstruct the connoisseur’s cup of coffee.” —Publishers Weekly

**Dreamland (YA edition)** Sam Quinones, 2019-07-16 As an adult book, Sam Quinones's Dreamland took the world by storm, winning the NBCC Award for General Nonfiction and hitting at least a dozen Best Book of the Year lists. Now, adapted for the first time for a young adult audience, this compelling reporting explains the roots of the current opiate crisis. In 1929, in the blue-collar city of Portsmouth, Ohio, a company built a swimming pool the size of a football field; named Dreamland, it became the vital center of the community. Now, addiction has devastated Portsmouth, as it has hundreds of small rural towns and suburbs across America. How that happened is the riveting story of Dreamland. Quinones explains how the rise of the prescription drug OxyContin, a miraculous and extremely addictive painkiller pushed by pharmaceutical companies, paralleled the massive influx of black tar heroin--cheap, potent, and originating from one small county on Mexico's west coast, independent of any drug cartel. Introducing a memorable cast of characters--pharmaceutical pioneers, young Mexican entrepreneurs, narcotics investigators, survivors, teens, and parents--Dreamland is a revelatory account of the massive threat facing America and its heartland.

*Management of Legionella in Water Systems* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division on Earth and Life Studies, Board on Population Health and Public Health Practice, Board on Life Sciences, Water Science and Technology Board, Committee on Management of Legionella in Water Systems, 2020-02-20 Legionnaires' disease, a pneumonia caused by the Legionella bacterium, is the leading cause of reported waterborne disease outbreaks in the United States. Legionella occur naturally in water from many different environmental sources, but grow rapidly in the warm, stagnant conditions that can be found in engineered water systems such as cooling towers, building plumbing, and hot tubs. Humans are primarily exposed to Legionella through inhalation of contaminated aerosols into the respiratory system. Legionnaires' disease can be fatal, with between 3 and 33 percent of Legionella infections leading to death, and studies show the incidence of Legionnaires' disease in the United States increased five-fold from 2000 to 2017. *Management of Legionella in Water Systems* reviews the state of science on Legionella contamination of water systems, specifically the ecology and diagnosis. This report explores the process of transmission via water systems, quantification, prevention and control, and policy and training issues that affect the incidence of Legionnaires' disease. It also analyzes existing knowledge gaps and recommends research priorities moving forward.
