The Pleasure in Drawing Jean-Luc Nancy,2013-07-16 Originally written for an exhibition Jean-Luc Nancy curated at the Museum of Fine Arts in Lyon in 2007, this book addresses the medium of drawing in light of the question of form--of form in its formation, as a formative force, as a birth to form. In this sense, drawing opens less toward its achievement, intention, and accomplishment than

toward a finality without end and the infinite renewal of ends, toward lines of sense marked by tracings, suspensions, and permanent interruptions. Recalling that drawing and design were once used interchangeably, Nancy notes that drawing designates a design that remains without project, plan, or intention. His argument offers a way of rethinking a number of historical terms (sketch, draft, outline, plan, mark, notation), which includes rethinking drawing in its graphic, filmic, choreographic, poetic, melodic, and rhythmic senses. If drawing is not reducible to any form of closure, it never resolves a tension specific to itself. Rather, drawing allows the pleasure in and of drawing, the gesture of a desire that remains in excess of all knowledge, to come to appearance. Situating drawing in these terms, Nancy engages a number of texts in which Freud addresses the force of desire in the rapport between aesthetic and sexual pleasure, texts that also turn around questions concerning form in its formation, form as a formative force. Between the sections of the text, Nancy has placed a series of “sketchbooks” on drawing, composed of a broad range of quotations on art from different writers, artists, or philosophers.

The Misfortune of Kyon and Koizumi Nagaru

Tanigawa,2013-02-26 Boisterous, impulsive Haruhi Suzumiya commands the spotlight wherever she goes! But the SOS Brigade chief wouldn't be any kind of chief at all without a supporting cast of club members to command as well. And there's no one she loves ordering around as much as Kyon! In this collection of short comics and illustrations by various artists, the boys of the SOS Brigade will at last have their moment to shine!

This book examines Kyoto Animation's philosophy and creative vision with close reference to its anime. Japanese Popular Culture and Contents Tourism Philip A. Seaton,Takayoshi Yamamura,2018-02-02 Contents tourism is tourism induced by the contents (narratives, characters, locations and other creative elements) of films, novels, games, manga,

anime, television dramas and other forms of popular culture.

Amidst the boom in global interest in Japanese popular culture, the utilization of popular culture to induce tourism domestically and internationally has been central to the Cool Japan strategy and, since 2005, government policy for local community revitalization.

This book presents four main case studies of contents tourism: the phenomenon of anime pilgrimage to sites appearing in animated film; the travel behaviours and pop-spiritualism of female history fans to heritage sites; the collaboration between local community, fans and copyright holders that underpinned an anime-induced tourism boom in a small town north of Tokyo; and the large-scale economic impacts of tourism induced by NHK's annual samurai period drama (Taiga Drama). It is the first major collection of articles published in English about media-induced tourism in Japan using the contents tourism approach. This book will be of particular interest to students and researchers of media and tourism studies in Asia. This book was previously published as a special issue of Japan Forum.
