The Ohio State University in the Sixties William J. Shkurti,2016 At 5:30 p.m. on May 6, 1970, an embattled Ohio State University President Novice G. Fawcett took the unprecedented step of closing down the university. Despite the presence of more than 1,500 armed highway patrol officers, Ohio National Guardsmen, deputy sheriffs, and Columbus city police, university and state officials feared they could not maintain order in the face of growing student protests. Students, faculty, and staff were ordered to leave; administrative offices, classrooms, and laboratories were closed. The campus was sealed off. Never in the first one hundred years of the university's existence had such a drastic step been necessary. Just a year earlier the campus seemed immune to such disruptions. President Nixon considered it safe enough to plan an address at commencement. Yet a year later the campus erupted into a spasm of violent protest exceeding even that of traditional hot spots like Berkeley and Wisconsin. How could conditions have changed so dramatically in just a few short months? Using contemporary news stories, long overlooked archival materials, and first-person interviews, The Ohio State University in the Sixties explores how these tensions built up over years, why they converged when they did and how they forever changed the university.

Genesis Force John Vornholt,2012-10-16 The full extent of the devastation caused by the Genesis Wave is only now being recognised. An entire sector of space has been reduced to the most primitive levels, and more than one high-tech interstellar civilisation lies in ruins. Helping rebuild them from the ground up is the Genesis Force, a covert Federation group of humans and aliens with extra abilities greater than those of the average humanoid. Their mission: to remake the devastated worlds so that new life can flourish, and to protect the people of the newly named Genesis Sector from those who would seek to conquer and exploit them.

The Mindset Lists of American History Tom McBride,Ron Nief,2011-05-25 Snapshots of the U.S.'s last nine generations—from the creators of the Mindset List media sensation Just as high school graduates in 1957 couldn't imagine life without zippers, those of 2009 can't imagine having to enter phone booths and deposit coins in order to call someone from the street corner. Every August, the Mindset List highlights the cultural touchstones that have shaped the lives of that year's incoming college class. Now this fascinating book extends the Mindset List approach to dramatize what it was like to grow up for every American generation since 1880, showcasing the remarkable changes in what Americans have considered normal about the world around them. Expands Tom McBride and Ron Nief's popular annual Mindset Lists to explore the mindset of nine generations of Americans, from 1880 to the future high school graduates of 2030 Offers a novel and absorbing way to understand the frame of reference of Americans through history, whether it's the high school grads of 1918, who viewed riding an elevator as a thrill second only to roller coasters, or those of 2009, who have always thought of

friend as an active verb Puts a human face on the evolution of historical changes related to technology, the struggle for rights and equality, the calamities of war and depression, and other areas The annual Mindset List garners extensive media attention, including on Today, The Early Show, the NBC Nightly News, CNN, and Fox as well as in the Wall Street Journal, the New York Times, USA Today, the Los Angeles Times, Time magazine, and hundreds of international publications Whatever your own generational mindset, this book will give you an entertaining and important new tool for understanding the unique perspective and experience of Americans over more than a hundred and fifty years.

The Sovereign Individual James Dale Davidson, Lord William Rees-Mogg, 2020-02-04 From the authors of *The Great Reckoning*: “A sweeping analysis of the implications, especially financial, of the information age.” —Library Journal In this book, two renowned investment advisors bring to light both currents of disaster and the potential for prosperity and renewal in the face of radical changes in human history in the twenty-first century. The Sovereign Individual details strategies necessary for adapting financially to the next phase of Western civilization. Few observers have had their fingers so presciently on the pulse of global political and economic realignment: Their bold prediction of disaster on Wall Street in *Blood in the Streets* was borne out by Black Tuesday. In their ensuing bestseller, *The Great Reckoning*, published just weeks before the coup attempt against Mikhail Gorbachev, they analyzed the pending collapse of the Soviet Union and foretold the civil war in Yugoslavia. In *The Sovereign Individual*, they explore the greatest economic and political transition in centuries—the shift from an industrial to an information-based society. This transition, which they have termed “the fourth stage of human society,” will liberate individuals as never before, irrevocably altering the power of government. This outstanding book will replace false hopes and fictions with new understanding and clarified values.

Becoming a Writer Dorothea Brande, 2016-02-25 A reissue of a classic work published in 1934 on writing and the creative process, *Becoming a Writer* recaptures the excitement of Dorothea Brande's creative writing classroom of the 1920s. Decades before brain research discovered the role of the right and left brain in all human endeavor, Dorothea Brande was teaching students how to see again, how to hold their minds still, and how to call forth the inner writer.

Invisible Sun Charles Stross, 2021-09-28 The alternate timelines of Charles Stross' Empire Games trilogy have never been so entangled than in *Invisible Sun*—the techno-thriller follow up to *Dark State*—as stakes escalate in a conflict that could spell extermination for humanity across all known timelines. An inter-timeline coup d'état gone awry. A renegade British monarch on the run through the streets of Berlin. And robotic alien invaders from a distant timeline flood through a wormhole, wreaking havoc in the USA. Can disgraced worldwalker Rita and her intertemporal extraordinary agent of a mother neutralize the livewire contention before it's too late? The Delirium Brief Charles Stross, 2017-07-11 *2018 LOCUS AWARD FINALIST FOR BEST FANTASY NOVEL CATEGORY* “Smart, literate, funny.” —Lev Grossman, author of *The Magicians* Someone is dead set to air the spy agency's dirty laundry in *The Delirium Brief*, the next installment to Charles Stross' Hugo Award-winning comedic dark fantasy Laundry Files series! Bob Howard's career in the Laundry, the secret British government agency dedicated to protecting the world from unspeakable horrors from beyond spacetime, has entailed high combat, brilliant hacking, ancient magic, and combat with indescribably repellent creatures of pure evil. It has also involved a wearying amount of paperwork and office politics, and his expense reports are still a mess. Now, following the invasion of Yorkshire by the Host of Air and Darkness, the Laundry's existence has become public, and Bob is being trotted out on TV to answer pointed questions about elven asylum seekers. What neither Bob nor his managers have foreseen is that their organization has earned the attention of a horror far more terrifying than any demon: a British government looking for public services to privatize. Inch by inch, Bob Howard and his managers are forced to consider the truly unthinkable: a coup against the British government itself. Laundry Files 1. The Atrocity Archives 2. The Jennifer Morgue 3. The Fuller Memorandum 4. The Apocalypse Codex 5. The Rhesus Chart 6. The Annihilation Score 7. Big Farms Make Big Flu Rob Wallace, 2016-06-30 The first collection to explore infectious disease, agriculture, economics, and the nature of science together Thanks to breakthroughs in production and food science, agribusiness has been able to devise new ways to grow more food and get it more places more quickly. There is no shortage of news items on hundreds of thousands of hybrid poultry—each animal genetically identical to the next—packed together in megabarns, grown out in a matter of months, then slaughtered, processed and shipped to the other side of the globe. Less well known are the deadly pathogens mutating in, and emerging out of, these specialized agro-environments. In fact, many of the most dangerous new diseases in humans can be traced back to such food systems, among them *Campylobacter*, Nipah virus, Q fever, hepatitis E, and a variety of novel influenza variants. Agribusiness has known for decades that packing thousands of birds or livestock together results in a monoculture that selects for such disease. But market economics doesn't punish the companies for growing Big Flu—it punishes animals, the environment, consumers, and contract farmers. Alongside growing profits, diseases are permitted to emerge, evolve, and spread with little check. “That is,” writes evolutionary biologist Rob Wallace, “it pays to produce a pathogen that could kill a billion people.” In *Big Farms Make Big Flu*, a collection of dispatches by turns harrowing and thought-provoking, Wallace tracks the ways influenza and other pathogens emerge from an agriculture controlled by multinational corporations. Wallace details, with a precise and radical wit, the latest in the science of agricultural epidemiology, while at the same time juxtaposing ghastly phenomena such as attempts at producing featherless chickens, microbial time travel, and neoliberal Ebola. Wallace also offers sensible alternatives to lethal agribusiness. Some, such as farming cooperatives, integrated pathogen management, and mixed crop-livestock systems, are already in practice off the agribusiness grid. While many books cover facets of food or outbreaks, Wallace's collection appears the first to explore infectious disease, agriculture, economics and the nature of science together. *Big Farms Make Big Flu* integrates the political economies of disease and science to derive a new understanding of the evolution of infections. Highly capitalized agriculture may be farming pathogens as much as chickens or corn.

Numenera Discovery and Destiny Slipcase Set Monte Cook, Monte Cook Games, Sean Reynolds, Bruce Cordell, 2018-07-31 They say there have been eight worlds before ours. Eight times the people of this Earth, over vast millennia, built their civilizations. They reached heights we cannot even imagine now: they spoke to the stars, reshaped the creatures of the world, and mastered form and essence. They built cities and machines that have since crumbled to dust, leaving only their vast outlines and barest remnants. This is the Ninth World. The people of the prior worlds are gonescattered, disappeared, or transcended. But their works remain, in the places and devices that still contain some germ of function. The ignorant call these magic, but the wise know that these are our legacy. They are our future. They are the... Two 416-page corebooks, two poster maps, a handsome and sturdy slipcase, a metal medallion, and additional play aids all for the price of the corebooks alone. All existing Numenera supplements remain compatible with these corebooks.
