A Galaxy of Sea Stars Jeanne Zulick Ferruolo,2020-02-04 A Bank Street Best Book of 2021 *A Galaxy of Sea Stars* is Jeanne Zulick Ferruolo's second middle-grade novel—a heartwarming story about family, loyalty, and the hard choices we face in the name of friendship. Sometimes, the truth isn't easy to see. Sometimes, you have to look below the surface to find it. Eleven-year-old Izzy feels as though her whole world is shifting, and she doesn't like it. She wants her dad to act like he did before he was deployed to Afghanistan. She wants her mom to live with them at the marina where they've moved instead of spending all her time on Block Island. Most of all, she wants Piper, Zelda, and herself—the Sea Stars—to stay best friends, as they start sixth grade in a new school. Everything changes when Izzy's father invites his former interpreter's family, including eleven-year-old Sitara, to move into the marina's upstairs apartment. Izzy doesn't know what to make of Sitara—with her hijab and refusal to eat cafeteria food—and her presence disrupts the Sea Stars. But in Sitara Izzy finds someone brave, someone daring, someone who isn't as afraid as Izzy is to use her voice and speak up for herself. As Izzy and Sitara grow closer, Izzy must make a choice: stay in her comfort zone and risk betraying her new friend, or speak up and lose the Sea Stars forever.

I Love Jesus, But I Want to Die Sarah J. Robinson,2021-05-11 A compassionate, shame-free guide for your darkest days “A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized.”—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn't cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to “choose joy” and “pray more.” So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.

Ford Model T Lindsay Brooke,2008-04-15 The story of Ford Motor Company's Model T is the story that launched the American automobile industry--and America's love affair with the car. When he introduced the Model T in 1908, even an eternal optimist like Henry Ford could not have predicted the far-reaching changes he was setting in motion. One hundred years later, this illustrated history looks back at the beloved Tin Lizzie. The book follows the Model T from design considerations (its ground clearance, for instance, had to allow for the abysmal state of U.S. roadways at the time) to its lasting legacy, and along the way describes the mechanical, manufacturing, and marketing innovations that the car's production entailed. Author Lindsay Brooke also relates the adventures and misadventures that were part of owning and driving a Model T. He chronicles the changes the car's unprecedented popularity wrought in the auto

industry (including Ford's introduction of the "\$5 day"), and he tracks the Model T through popular culture, from its role in early motorsports to its resurgent popularity in the 1950s and 60s as a platform for T-bucket hot rods. Illustrated throughout with period art and evocative photography, this book celebrates as never before the car that epitomized the American automobile.

Learning to Think Spatially National Research Council,Division on Earth and Life Studies,Board on Earth Sciences and Resources,Geographical Sciences Committee,Committee on Support for Thinking Spatially: The Incorporation of Geographic Information Science Across the K-12 Curriculum,2005-02-03 Learning to Think Spatially examines how spatial thinking might be incorporated into existing standards-based instruction across the school curriculum. Spatial thinking must be recognized as a fundamental part of K education and as an integrator and a facilitator for problem solving across the curriculum. With advances in computing technologies and the increasing availability of geospatial data, spatial thinking will play a significant role in the information-based economy of the twenty-first century. Using appropriately designed support systems tailored to the K context, spatial thinking can be taught formally to all students. A geographic information system (GIS) offers one example of a high-technology support system that can enable students and teachers to practice and apply spatial thinking in many areas of the curriculum.

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from

birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
