Samuel Alfred Browne Mercer

The Great Pyramid Hazel Martell,1998 Discusses the building of the pyramids of Egypt, with a focus on the Great Pyramid, the tomb of the pharaoh Khufu.

Digital Giza Peter Der Manuelian,2017 The Giza Plateau represents perhaps the most famous archaeological site in the world. With the advent of new technologies, the Necropolis is now accessible in four dimensions. Peter Der Manuelian explores technologies for cataloging and visualizing Giza and offers more general philosophical reflection on the nature of visualization in archaeology.

Ancient Egypt Transformed Adela Oppenheim,Dorothea Arnold,Dieter Arnold,Kei Yamamoto,2015-10-12 The Middle Kingdom (ca. 2030–1650 B.C.) was a transformational period in ancient Egypt, during which older artistic conventions, cultural principles, religious beliefs, and political systems were revived and reimagined. *Ancient Egypt Transformed* presents a comprehensive picture of the art of the Middle Kingdom, arguably the least known of Egypt's three kingdoms and yet one that saw the creation of powerful, compelling works rendered with great subtlety and sensitivity. The book brings together nearly 300 diverse works— including sculpture, relief decoration, stelae, jewelry, coffins, funerary objects, and personal possessions from the world's leading collections of Egyptian art. Essays on architecture, statuary, tomb and temple relief decoration, and stele explore how Middle Kingdom artists adapted forms and iconography of the Old Kingdom, using existing conventions to create strikingly original works. Twelve lavishly illustrated chapters, each with a scholarly essay and entries on related objects, begin with discussions of the distinctive art that arose in the south during the early Middle Kingdom, the artistic developments that followed the return to Egypt's traditional capital in the north, and the renewed construction of pyramid complexes. Thematic chapters devoted to the pharaoh, royal women, the court, and the vital role of family explore art created for different strata of Egyptian society, while others provide insight into Egypt's expanding relations with foreign lands and the themes of Middle Kingdom literature. The era's religious beliefs and practices, such as the pilgrimage to Abydos, are revealed through magnificent objects created for tombs, chapels, and temples. Finally, the book discusses Middle Kingdom archaeological sites, including excavations undertaken by the Metropolitan Museum over a number of decades. Written by an international team of respected Egyptologists and Middle Kingdom specialists, the text provides recent scholarship and fresh insights, making the book an authoritative resource.

Seeker of Knowledge James Rumford,2003-06-23 In 1802, Jean-Francois Champollion was eleven years old. That year, he vowed to be the first person to read Egypt's ancient hieroglyphs. Champollion's dream was to sail up the Nile in Egypt and uncover the secrets of the past, and he dedicated the next twenty years to the challenge. James Rumford introduces the remarkable man who deciphered the ancient Egyptian script and fulfilled a lifelong dream in the process. Stunning watercolors bring Champollion's adventure to life in a story that challenges the mind and touches the heart.

Hieroglyphs from A to Z Peter Der Manuelian,2010 Hieroglyphs from A to Zo is the first book published by PomegranateKids , an imprint of Pomegranate Communications, in collaboration with the Museum of Fine Arts, Boston. With bold graphics, charming, rhyming text and solid educational content, it explains the hieroglyphic code while imparting important facts about ancient Egypt. As an added bonus, a separate sheet of stencils is provided, slipped inside the back cover, so that kids can easily draw their own hieroglyphs. All told, this is the perfect book for any child who simply loves

words and pictures.

The Art of Looking Lance Esplund, 2018-11-27 A veteran art critic helps us make sense of modern and contemporary art. The landscape of contemporary art has changed dramatically during the last hundred years: from Malevich's 1915 painting of a single black square and Duchamp's 1917 signed porcelain urinal to Jackson Pollock's midcentury drip paintings; Chris Burden's *Shoot* (1971), in which the artist was voluntarily shot in the arm with a rifle; Urs Fischer's *You* (2007), a giant hole dug in the floor of a New York gallery; and the conceptual and performance art of today's Ai Weiwei and Marina Abramovic. The shifts have left the art-viewing public (understandably) perplexed. In *The Art of Looking*, renowned art critic Lance Esplund demonstrates that works of modern and contemporary art are not as indecipherable as they might seem. With patience, insight, and wit, Esplund guides us through the last century of art and empowers us to approach and appreciate it with new eyes. Eager to democratize genres that can feel inaccessible, Esplund encourages viewers to trust their own taste, guts, and common sense. *The Art of Looking* will open the eyes of viewers who think that recent art is obtuse, nonsensical, and irrelevant, as well as the eyes of those who believe that the art of the past has nothing to say to our present.

The Pyramids and Temples of Gizeh William Matthew Flinders Petrie, 1883

The Complete Pyramid Sourcebook John DeSalvo, 2003-12 This is the ultimate reader and sourcebook about the Great Pyramid of Giza and current Pyramid Research. Go on the most extensive photo tour of the Great Pyramid and read about the latest discoveries and findings. See exclusive photos of the large pyramids built in the former Soviet Union and about the research carried out in them. Learn about the New Scientific Breakthroughs in Pyramid Research and incredible Hyperspace experiments. Read about the major theories on the Great Pyramid of Giza. Read the description of the Great Pyramid from the first scientific book ever published on it by John Greaves in 1646. Included are articles and book excerpts from the world's top pyramid researchers: John Anthony West, Patrick Flanagan, Robert Bauval, Christopher Dunn, Stephen Mehler, Ian Lawton, Paul Horn, and others. Also a comprehensive Who's Who in the Great Pyramid of Giza Research Association and one of the most extensive bibliographies ever printed on the Great Pyramid.

Glittering Images Camille Paglia, 2012 Presents a chronological tour of major themes in Western art as reflected by more than two dozen seminal images that use such mediums as paint, sculpture, architecture, performance art, and digital art.

Open Studio Sharon Coplan Hurowitz, Amanda Benchley, 2020 The book invites you into the private studios of seventeen of the most celebrated contemporary artists as they draw, paint, sculpt, or design an original project for readers to recreate at home. It demystifies the studio practice through the fun, accessible format of D.I.Y., leading you step-by-step through each artist's project. Eight inserts specially designed by the artists for completing their projects - from stencils to cut-outs - are included. The result can inspire people everywhere to blaze their own creative trails.

Archaeology from Space Sarah Parcak, 2019-07-09 National Geographic Explorer and TED Prize-winner Dr. Sarah Parcak welcomes you to the exciting new world of space archaeology, a growing field that is sparking extraordinary discoveries from ancient civilizations across the globe. In *Archaeology from Space*, Sarah Parcak shows the evolution, major discoveries, and future potential of the young field of satellite archaeology. From surprise advancements after the declassification of spy photography, to a new map of the mythical Egyptian city of Tanis, she shares her field's biggest discoveries, revealing why space archaeology is not only exciting, but urgently essential to the preservation of the world's ancient treasures. Parcak has worked in twelve countries and four continents, using multispectral and high-resolution satellite imagery to identify thousands of previously unknown settlements, roads, fortresses, palaces, tombs, and even potential pyramids. From there, her stories take us back in time and across borders, into the day-to-day lives of ancient humans whose traits and genes we share. And she shows us that if we heed the lessons of the past, we can shape a vibrant future. Includes Illustrations.

The Giza Template Laird Scranton, Edward Nightingale, 2014-09-21 *The Giza Template*, Temple Graal, Earth Measure is the first book in a series documenting the research of Master Woodworker

Edward G. Nightingale in terms for the layperson as well as the adept. It is written from the point of view of ancient architects, astronomers and mathematicians faced with the daunting task of constructing a repository of scientific data encoded within an architectural design. The design would be required to withstand natural and manmade cataclysmic events over 600 generations into the future. Based on this hypothesis the author presents a compelling case with a precise geometric, mathematical model that re-creates the architect's original design of the Giza Plateau. He began his research by using a reverse engineering technique, re-drawing and measuring what is actually constructed while comparing the Template model with multiple accurate satellite images and official survey data of the Giza plateau. Follow along step by step as the Giza Complex is re-created from scratch using only a simple template model that defines the precise dimensions and placement of eleven pyramids as well as the Sphinx and its temples. Learn what the ancient architects were encoding within the complex and the message they were conveying to their remote descendants. This book, *Temple Graal, Earth Measure* is the first of the series and reveals in detail the system of measure of the Earth including base units of measure beginning with the musical scale, the mile, yard, feet, and inches as well as five separate cubit measurements. What is presented is not theoretical; it is reproducible using the scientific method and is the foundation for the book series. This is a must read for anyone who is truly interested in understanding why Giza's pyramids and Sphinx were created. The second book in the series, *Measuring the Heavens* connects the Earth measure with the Great Sphinx acting as the witness to the movements of the heavens indexing with its counterpart the constellation of Leo within the 13 Zodiac constellations. The book also confirms the Orion Correlation Theory as presented by Robert Bauval in his book, *The Orion Mystery*. As one would suspect, once the Giza plan was decoded there would be a deluge of information to examine. This is the case, and author Edward Nightingale invites the skeptics, the layperson as well as the adept and academic to reproduce The Giza Template and learn the profound knowledge our ancient ancestors encoded at Giza to survive the great cycle of the ages when it would be of the utmost importance for the survival of humanity. The Giza Template re-writes the view of our ancient past. The Giza Template is The Architectural Rosetta Stone John Anthony West Edward Nightingale is an accomplished architect with a deep sense of mission. He has devoted many years in a solitary attempt to extract the lost knowledge encoded in the mathematical and astronomical design of the Giza Necropolis. These ancient giant structures that have stood in brooding silence for a score of millennia may at long last discharge a message for the planet thanks to his brilliant work and dedication. A must-have book for all questing for that mysterious lost knowledge which allowed humans to raise unbelievably massive stone monuments with such baffling precision and ease. Robert Bauval

The Pyramid Principle Barbara Minto, 2021 This book reveals that the mind automatically sorts information into distinctive pyramidal groupings. However, if any group of ideas are arranged into a pyramid structure in the first place, not only will it save valuable time and effort to write, it will take even less effort to read and comprehend it

Archaeology of the Night Nancy Gonlin, April Nowell, 2017-12-15 How did ancient peoples experience, view, and portray the night? What was it like to live in the past when total nocturnal darkness was the norm? *Archaeology of the Night* explores the archaeology, anthropology, mythology, iconography, and epigraphy of nocturnal practices and questions the dominant models of daily ancient life. A diverse team of experienced scholars uses a variety of methods and resources to reconstruct how ancient peoples navigated the night and what their associated daily—and nightly—practices were. This collection challenges modern ideas and misconceptions regarding the night and what darkness and night symbolized in the ancient world, and it highlights the inherent research bias in favor of “daytime” archaeology. Numerous case studies from around the world (including Oman, Mesoamerica, Scandinavia, Rome, Great Zimbabwe, Indus Valley, Peru, and Cahokia) illuminate subversive, social, ritual, domestic, and work activities, such as witchcraft, ceremonies, feasting, sleeping, nocturnal agriculture, and much more. Were there artifacts particularly associated with the night? Authors investigate individuals and groups (both real and mythological) who share a special connection to nighttime life. Reconsidering the archaeological

record, Archaeology of the Night views sites, artifacts, features, and cultures from a unique perspective. This book is relevant to anthropologists and archaeologists and also to scholars of human geography, history, astronomy, sensory studies, human biology, folklore, and mythology.

Egyptian Tomb Architecture David I. Lightbody, 2008 This thesis, sure to prove controversial, examines the geometry of Old Kingdom Royal tomb architecture, arguing for far greater levels of mathematical sophistication than hitherto admitted. Adding his own contribution to the Black Athena debate, Lightbody also claims that the debts in measurement, geometry and mathematics which the Greeks owe to the Egyptians has also not been fully recognised, not least due to an overfocusing on philological evidence.

Fingerprints of the Gods Graham Hancock, 2012-09-19 Could the story of mankind be far older than we have previously believed? Using tools as varied as archaeo-astronomy, geology, and computer analysis of ancient myths, Graham Hancock presents a compelling case to suggest that it is. Graham Hancock is featured in *Ancient Apocalypse*, a Netflix original docuseries. "A fancy piece of historical sleuthing . . . intriguing and entertaining and sturdy enough to give a long pause for thought."—Kirkus Reviews In *Fingerprints of the Gods*, Hancock embarks on a worldwide quest to put together all the pieces of the vast and fascinating jigsaw of mankind's hidden past. In ancient monuments as far apart as Egypt's Great Sphinx, the strange Andean ruins of Tihuanaco, and Mexico's awe-inspiring Temples of the Sun and Moon, he reveals not only the clear fingerprints of an as-yet-unidentified civilization of remote antiquity, but also startling evidence of its vast sophistication, technological advancement, and evolved scientific knowledge. A record-breaking number one bestseller in Britain, *Fingerprints of the Gods* contains the makings of an intellectual revolution, a dramatic and irreversible change in the way that we understand our past—and so our future. And *Fingerprints of God* tells us something more. As we recover the truth about prehistory, and discover the real meaning of ancient myths and monuments, it becomes apparent that a warning has been handed down to us, a warning of terrible cataclysm that afflicts the Earth in great cycles at irregular intervals of time—a cataclysm that may be about to recur. "Readers will hugely enjoy their quest in these pages of inspired storytelling."—The Times (UK)
