The Mystery of the Hanging Garden of Babylon Stephanie Dalley, 2013-05-23 The Mystery of the Hanging Garden of Babylon is an exciting story of detection involving legends, expert decipherment of ancient texts, and a vivid description of a little-known civilization. Recognised in ancient times as one of the Seven Wonders of the World, the legendary Hanging Garden of Babylon and its location still remains a mystery steeped in shadow and puzzling myths. In this remarkable volume Stephanie Dalley, a world expert on ancient Babylonian language, gathers for the first time all the material on this enigmatic World Wonder. Tracing the history of the Garden, Dalley describes how the decipherment of an original text and its link to sculpture in the British Museum has enabled her to pin down where the Garden was positioned and to describe in detail what it may have looked like. Through this dramatic and fascinating reconstruction of the Garden, Dalley is also able to follow its influence on later garden design. Like a palimpsest, Dalley unscrambles the many legends that have built up around the Garden, including the parts played by Semiramis and Nebuchadnezzar, and following the evolution of its design, she shows why this Garden deserves its place alongside the Pyramids and the Colossus of Rhodes as one of the most astonishing technical achievements of the ancient world.

Legends of the Ancient World: the Hanging Gardens of Babylon Charles River Editors, 2013-09-04 *Includes pictures of historic art depicting important people and places. *Includes ancient descriptions of the Hanging Gardens and discusses their authenticity. *Explains the historical debate over the origins of the Hanging Gardens and where they were actually located. *Includes a bibliography for further reading. There was also, beside the acropolis, the Hanging Garden, as it is called, which was built, not by Semiramis, but by a later Syrian king to please one of his concubines; for she, they say, being a Persian by race and longing for the meadows of her mountains, asked the king to imitate, through the artifice of a planted garden, the distinctive landscape of Persia. Diodorus Siculus In antiquity, the Hanging Gardens, like the Great Pyramid of Giza, were considered both a technological marvel and an aesthetic masterpiece. Ancient historians believed that the Hanging Gardens were constructed around the 7th century B.C. after the second rise of Babylon, which would make them the second-oldest of the Seven Wonders of the Ancient World. Reputedly, they were created by the biblical Nebuchadnezzar II (the king who conquered Judea) to please his homesick wife, after the model of Egyptian pleasure gardens, but in 1993, British Assyriologist, Stephanie Dalley, proposed a theory that they were ordered built by the Assyrian King Sennacherib a century earlier for his giant palace at Nineveh, instead. She believed that the two sites were easily confused by ancient sources, resulting in the Gardens being incorrectly located in Babylon a century later. Many ancient writers discussed the Hanging Gardens, including including Strabo, Diodorus Siculus, and Quintus Curtius Rufus. In fact, Diodorus Siculus and Philo of Byzantium both described the mechanisms of the Gardens at length. According to their accounts, the Hanging Gardens were terraced and cultivated orchards that were built over a series of buildings made of glazed ceramic and perhaps watered by some kind of pulley or pump system of irrigation. Water was drawn from a reservoir through a network of reeds and bricks, held together by asphalt and cement, with lead used as a sealant. The Gardens were built on a citadel 80 feet high with walls 22 feet thick. Despite the detailed descriptions, historians still question whether the Hanging Gardens ever actually existed. The sheer amount of water that would've been required, and the fact that they would've relied on technology that was supposedly invented 400 years down the line cast doubt upon their existence. Officially, the reason why it is not known whether the Hanging Gardens ever existed is because they were reported to have been destroyed by several earthquakes, the last of which left the Hanging Gardens completely ruined by the 2nd century B.C., around the time the Greek tourists were writing their pamphlets. Therefore, it is not known if any of the writers who described them ever truly saw the Hanging Gardens, and even as ancient Greeks and Romans of different centuries wrote about the Hanging Gardens and relied on previous ancient texts, Babylonian sources do not mention them. Neither do near-contemporaneous Greek sources like Herodotus. Legends of the Ancient World: The Hanging Gardens of Babylon comprehensively covers the history and mystery of the famous wonder of the ancient world, looking at ancient descriptions of the Hanging Gardens and the questions modern academics are still trying to answer. Along with pictures, a bibliography and a Table of Contents, you will learn about the Hanging Gardens like you never have before, in no time at all.

The Vertical City K. Al-Kodmany, 2018-06-25 Each century has its own unique approach toward addressing the problem of high density and the 21st century is no exception. As cities try to cope with rapid population growth - adding 2.5 billion dwellers by 2050 - and grapple with destructive sprawl, politicians, planners and architects have become increasingly interested in the vertical city paradigm. Unfortunately, cities all over the world are grossly unprepared for integrating tall buildings, as these buildings may aggravate multidimensional sustainability challenges resulting in a "vertical sprawl" that could have worse consequences than "horizontal" sprawl. By using extensive data and numerous illustrations this book provides a comprehensive guide to the successful and sustainable integration of tall buildings into cities. A new crop of skyscrapers that employ passive design strategies, green technologies, energy-saving systems and innovative renewable energy offers significant architectural improvements. At the urban scale, the book argues that planners must integrate tall buildings with efficient mass transit, walkable neighbourhoods, cycling networks, vibrant mixed-use activities, iconic transit stations, attractive plazas, well-landscaped streets, spacious parks and engaging public art. Particularly, it proposes the Tall Building and Transit Oriented Development (TB-TOD) model as one of the sustainable options for large cities going forward. Building on the work of leaders in the fields of ecological and sustainable design, this book will open readers' eyes to a wider range of possibilities for utilizing green, resilient, smart, and sustainable features in architecture and urban planning projects. The 20 chapters offer comprehensive reading for all those interested in the planning, design, and construction of sustainable cities.

Green Walls in High-Rise Buildings Antony Wood, Payam Bahrami & Daniel Safarik, The Images Publishing Group, 2014-08-29 The Council on Tall Buildings and Urban Habitat has produced four Technical Guides to date, since the series launched in late 2012. Each of these guides is the product of a CTBUH Working Group—committees formed specifically to address focused topical subjects in the industry. The intention of each guide is the same—to provide working knowledge to the typical building owner or professional who wants a better understanding of available options for improving tall buildings, and what affects their design. The object of the series is to provide a tool-kit for the creation of better-performing tall buildings, and to spread the understanding of the considerations that need to be made in designing tall. This technical guide offers an extensive overview of the use of vertical vegetation in high-rise buildings, an in-depth analysis of green walls, definitions and typology, including standards, policies and incentives. It features comprehensive case studies, along with architectural theories of the public and private benefits of green walls. The book delves into architect-design considerations and limitations, the effects of green walls on energy efficiencies and includes recommendations and future research.

The Vertical Farm Dickson D. Despommier, 2010-10-12 Imagine a world where every town has its own local food source, grown in the safest way possible, where no drop of water or particle of light is wasted, and where a simple elevator ride can transport you to nature's grocery store - imagine the world of the vertical farm. When Columbia professor Dickson Despommier set out to solve America's food, water, and energy crises, he didn't just think big - he thought up. Despommier's stroke of genius, the vertical farm, has excited scientists, architects, and politicians around the globe. These farms, grown inside skyscrapers, would provide solutions to many of the serious problems we currently face, including: -Allowing year-round crop production -Providing food to areas currently lacking arable land -Immunity to weather-related crop failure -Re-use of water collected by de-humidification of the indoor environment -New employment opportunities -No use of pesticides, fertilizers, or herbicides -Drastically reduced dependence on fossil fuels -No crop loss due to shipping or storage -No agricultural runoff

The Activist Drawing M. Catherine de Zegher, Mark Wigley, 2001 A reconsideration of Constant Nieuwenhuys's visionary architectural project, New Babylon, and of the role of drawing in and electronic age.

Alas, Babylon Pat Frank, 2013-06-04 "An extraordinary real picture of human beings numbed by catastrophe but still driven by the unconquerable determination of living creatures to keep on being alive." —The New Yorker "Alas, Babylon." Those fateful words heralded the end. When the unthinkable nightmare of nuclear holocaust ravaged the United States, it was instant death for tens of millions of people; for survivors, it was a nightmare of hunger, sickness, and brutality. Overnight, a thousand years of civilization were stripped away. But for one small Florida town, miraculously spared against all the odds, the struggle was only just beginning, as the isolated survivors—men and women of all ages and races—found the courage to come together and confront the harrowing darkness. This classic apocalyptic novel by Pat Frank, first published in 1959 at the height of the Cold War, includes an introduction by award-winning science fiction writer and scientist David Brin.

Bento's Sketchbook John Berger, 2015-03-01 The seventeenth-century philosopher Baruch Spinoza—also known as Benedict or Bento de Spinoza—spent the most intense years of his short life writing. He also carried with him a sketchbook. After his sudden death, his friends rescued letters, manuscripts, notes—but no drawings. For years, without knowing what its pages might hold, John Berger has imagined finding Bento's sketchbook, wanting to see the drawings alongside his surviving words. When one day a friend gave him a beautiful virgin sketchbook, Berger said, This is Bento's! and he began to draw, taking his inspiration from the philosopher's vision. In this illustrated color book John Berger uses the imaginative space he creates to explore the process of drawing, politics, storytelling and Spinoza's life and times.

Babylon Irving L. Finkel, Michael J. Seymour, 2008 This is a strikingly-illustrated short introduction to Babylon, a sophisticated ancient city and the home of the fabled Hanging Gardens of Nebuchadnezzar, one of the 7 Wonders of the World. Over the centuries Babylon was lost to view, and survived only in a rich and bizarre set of half-

fantastical stories and traditions, until painstaking archaeological work uncovered the real city once more... The glory of Babylon was expressed not only in physical buildings but also in the learning and scholarship of the city. Babylonian achievements in mathematics, astronomy and medicine had far-reaching effects on the Classical world and even on our own times as we get our sixty-minute hours from Babylonia.

Myths & Legends of Babylonia & Assyria Lewis Spence, 1920 A collection of Babylonian and Assyrian myths and legends, including various analogues of the biblical flood story and discussions of the history of Babylon and Assyria, and descriptions of various forms of Babylonian worship, Assyrian cults, and archaeological excavation of Babylonian and Assyrian sites.

Moonshot Brian Floca, 2019-04-09 "An extraordinary delight for a reader of any age." –The New York Times Book Review Brian Floca explores Apollo 11's famed moon landing with this newly expanded edition of Moonshot! Simply told, grandly shown, and now with eight additional pages of brand-new art and more in-depth information about the historic moon landing, here is the flight of Apollo 11. Here for a new generation of readers and explorers are the steady astronauts clicking themselves into gloves and helmets, strapping themselves into sideways seats. Here are their great machines in all their detail and monumentality, the ROAR of rockets, and the silence of the Moon. Here is a story of adventure and discovery—a story of leaving and returning during the summer of 1969, and a story of home, seen whole, from far away.

Drawing Futures Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Code of Hammurabi Hammurabi, 2019-12-03 The Code of Hammurabi is a well-preserved Babylonian law code of ancient Mesopotamia, dating back to about 1754 BC. It is one of the oldest deciphered writings of significant length in the world. The sixth Babylonian king, Hammurabi, enacted the code, and partial copies exist on a man-sized stone stele and various clay tablets. The Code consists of 282 laws, with scaled punishments, adjusting an eye for an eye, a tooth for a tooth (lex talionis) as graded depending on social status, of slave versus free man. Nearly one-half of the Code deals with matters of contract, establishing, for example, the wages to be paid to an ox driver or a surgeon. Other provisions set the terms of a transaction, establishing the liability of a builder for a house that collapses, for example, or property that is damaged while left in the care of another. A third of the code addresses issues concerning household and family relationships such as inheritance, divorce, paternity, and sexual behavior. Only one provision appears to impose obligations on an official; this provision establishes that a judge who reaches an incorrect decision is to be fined and removed from the bench permanently. A few provisions address issues related to military service. Hammurabi ruled for nearly 42 years, c. 1792 to 1750 BC according to the Middle chronology. In the preface to the law, he states, Anu and Bel called by name me, Hammurabi, the exalted prince, who feared Marduk, the patron god of Babylon (The Human Record, Andrea & Overfield 2005), to bring about the rule in the land. On the stone slab there are 44 columns and 28 paragraphs that contained 282 laws. The laws follow along the rules of 'an eye for an eye'.

Evangelicallyfish Douglas Wilson, 2012-01-31 BEST FICTION AWARD - Christianity Today 2012 Evangelicallyfish is a ruthless, grimly amused, and above all honest look at one of the darkest corners in the western world. Douglas Wilson, a pastor of more than thirty years, paints a vivid and painful picture of evangelical boomchurch leadership. . . in bed. Chad Lester's kingdom is found in the Midwest. His voice crawls over the airwaves, his books are read by millions (before he reads them), and thousands ride the escalators into the sanctuary every Sunday. And Saturday. And Wednesday, too. He is the head pastor of Camel Creek--a CEO of Soul. And souls come cheap, so he has no overhead. When Lester is (falsely) accused of molesting a young male counselee, his universe begins to crumble. He is a sexual predator, yes. But strictly straight (and deeply offended that anyone would suggest otherwise). Detectives, reporters, assistant pastors, and old lovers and pay-offs all come out to play. John Mitchell is also a pastor, but he has no kingdom to speak of--only smalltime choir feuds. He is thrilled at the great man's fall, but his joy quickly fades when the imploding Lester calls him--and a lover or two--for help. How low can grace go? Whores, thieves, and junkies, sure. But pastors?

One of Ours Willa Cather, 2022-01-04 Claude Wheeler is a young man who was born after the American frontier has vanished. The son of a successful farmer and an intensely pious mother, Wheeler is guaranteed a comfortable livelihood. Nevertheless, Wheeler views himself as a victim of his father's success and his own inexplicable malaise. Thus, devoid of parental and spousal love, Wheeler finds a new purpose to his life in France, a faraway country that only existed for him in maps before the First World War. Will Wheeler ever succeed in his new goal? The novel is inspired from real-life events and also won the Pulitzer Prize in 1923.
