**Paper and Fire** Rachel Caine,2016-07-05 The New York Times Bestseller In Ink and Bone, bestselling author Rachel Caine introduced a world where knowledge is power, and power corrupts absolutely. Now she continues the story of those who dare to defy the Great Library—and rewrite history... Jess Brightwell has survived his introduction to the sinister, seductive world of the Library, but serving in its army is nothing like he envisioned. His life and the lives of those he cares for have been altered forever. Embarking on a mission to save one of their own, Jess and his band of allies make one wrong move and suddenly find themselves hunted by the Library’s deadly automata and forced to flee Alexandria, all the way to London. But Jess’s home isn’t safe anymore. The Welsh army is coming, London is burning, and soon Jess must choose between his friends, his family, and the Library, which is willing to sacrifice anything and anyone in the search for ultimate control...

*Building for Eternity* C.J. Brandon,R.L. Hohlfelder,M.D. Jackson,J.P. Oleson,2014-08-29 One marker of the majesty of ancient Rome is its surviving architectural legacy, the stunning remains of which are scattered throughout the circum-Mediterranean landscape. Surprisingly, one truly remarkable aspect of this heritage remains relatively unknown. There exists beneath the waters of the Mediterranean the physical remnants of a vast maritime infrastructure that sustained and connected the western world’s first global empire and economy. The key to this incredible accomplishment and to the survival of structures in the hostile environment of the sea for two thousand years was maritime concrete, a building material invented and then employed by Roman builders on a grand scale to construct harbor installations anywhere they were needed, rather than only in locations with advantageous geography or topography. This book explains how the Romans built so successfully in the sea with their new invention. The story is a stimulating mix of archaeological, geological, historical and chemical research, with relevance to both ancient and modern technology. It also breaks new ground in bridging the gap between science and the humanities by integrating analytical materials science, history, and archaeology, along with underwater exploration. The book will be of interest to anyone interested in Roman architecture and engineering, and it will hold special interest for geologists and mineralogists studying the material characteristics of pyroclastic volcanic rocks and their alteration in seawater brines. The demonstrable durability and longevity of Roman maritime concrete structures may be of special interest to engineers working on cementing materials appropriate for the long-term storage of hazardous substances such as radioactive waste. A pioneering methodology was used to bore into maritime structures both on land and in the sea to collect concrete cores for testing in the research laboratories of the CTG Italcementi Group, a leading cement producer in Italy, the University of Berkeley, and elsewhere. The resulting mechanical, chemical and physical analysis of 36 concrete samples taken from 11 sites in Italy and the eastern Mediterranean have helped fill many gaps in our knowledge of how the Romans built in the sea. To gain even more knowledge of the ancient maritime technology, the directors of the Roman Maritime Concrete Study (ROMACONS) engaged in an ambitious and unique experimental archaeological project Ð the construction underwater of a reproduction of a Roman concrete pier or pila. The same raw materials and tools available to the ancient builders were employed to produce a reproduction concrete structure that appears to be remarkably similar to the ancient one studied during ROMACONS’s fieldwork between 2002-2009. This volume reveals a remarkable and unique archaeological project that highlights the synergy that now exists between the humanities and science in our continuing efforts to understand the past. It will quickly become a standard research tool for all interested in Roman building both in the sea and on land, and in the history and chemistry of marine concrete. The authors also hope that the data and observations it presents will stimulate further research by scholars and students into related topics, since we have so much more to learn in the years ahead.

**Underwater Archaeology and Coastal Management** Mostafa Hassan Mostafa,Nicolas-Christophe Grimal,Douglas Nakashima,2000 Like many coastal cities, Alexandria must deal with the problems arising from competition and conflict over limited resources. However, that which sets Alexandria apart is a conflict between Alexandria today and the city that Alexandria has been, i.e. the archaeological remains of its past. Must antiquities conservation give way to urban renewal? 27 contributions from relevant disciplines open the way to a solution allowing Alexandria to harmonize its past and its present and thus weave a unified vision of its future.

**The Role of the Physical Environment in Ancient Greek Seafaring** Jamie Morton,2001 This study in environmental anthropology explores the physical geography and sailing conditions of ancient Greece and the Mediterranean region, the seafaring practices of the ancient Greeks, and, more generally, the interrelationships between human activity, technology and the physical environment.

*Hypatia of Alexandria* Maria Dzielska,1996-10-01 Hypatia—brilliant mathematician, eloquent Neoplatonist, and a woman renowned for her beauty—was brutally murdered by a mob of Christians in Alexandria in 415. She has been a legend ever since. In this engrossing book, Maria Dzielska searches behind the legend to bring us the real story of Hypatia’s life and death, and new insight into her colorful world. Historians and poets, Victorian novelists and contemporary feminists have seen Hypatia as a symbol—of the waning of classical culture and freedom of inquiry, of the rise of fanatical Christianity, or of sexual freedom. Dzielska shows us why versions of Hypatia’s legend have served her champions’ purposes, and how they have distorted the true story. She takes us back to the Alexandria of Hypatia’s day, with its Library and Museion, pagan cults and the pontificate of Saint Cyril, thriving Jewish community and vibrant Greek culture, and circles of philosophers, mathematicians, astronomers, and militant Christians. Drawing on the letters of Hypatia’s most prominent pupil, Synesius of Cyrene, Dzielska constructs a compelling picture of the young philosopher’s disciples and her teaching. Finally she plumbs her sources for the facts surrounding Hypatia’s cruel death, clarifying what the murder tells us about the tensions of this tumultuous era.

**The Cambridge History of Egypt** Carl F. Petry,2008-07-10 Egypt.

*Confessions of a Recovering Environmentalist and Other Essays* Paul Kingsnorth,2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.

The Prehistoric Exploration and Colonisation of the Pacific Geoffrey Irwin,1994-06-24 The exploration and colonisation of the Pacific is a remarkable episode of human prehistory. Early sea-going explorers had no prior knowledge of Pacific geography, no documents to record their route, no metal, no instruments for

measuring time and none for exploration. Forty years of modern archaeology, experimental voyages in rafts, and computer simulations of voyages have produced an enormous range of literature on this controversial and mysterious subject. This book represents a major advance in knowledge of the settlement of the Pacific by suggesting that exploration was rapid and purposeful, undertaken systematically, and that navigation methods progressively improved. Using an innovative model to establish a detailed theory of navigation, Geoffrey Irwin claims that rather than sailing randomly downwind in search of the unknown, Pacific Islanders expanded settlement by the cautious strategy of exploring upwind, so as to ease their safe return. The author has tested this hypothesis against the chronological data from archaeological investigation, with a computer simulation of demographic and exploration patterns and by sailing throughout the region himself.

**Fahrenheit 451** Ray Bradbury, 2003-09-23 Set in the future when firemen burn books forbidden by the totalitarian brave new world regime.

**Circumference** Nicholas Nicastro, 2008 How do you measure the size of the planet you're standing on? Circumference is the story of what happened when one man asked himself that very question. Nicholas Nicastro brings to life one of history's greatest experiments when an ancient Greek named Eratosthenes first accurately determined the distance around the spherical earth. In this fascinating narrative history, Nicastro takes a look at a deceptively simple but stunning achievement made by one man, millennia ago, with only the simplest of materials at his disposal. How was he able to measure the land at a time when distance was more a matter of a shrug and a guess at the time spent on a donkey's back? How could he be so confident in the assumptions that underlay his calculations: that the earth was round and the sun so far away that its rays struck the ground in parallel lines? Was it luck or pure scientific genius? Nicastro brings readers on a trip into a long-vanished world that prefigured modernity in many ways, where neither Eratosthenes' reputation, nor the validity of his method, nor his leadership of the Great Library of Alexandria were enough to convince all his contemporaries about the dimensions of the earth. Eratosthenes' results were debated for centuries until he was ultimately vindicated almost 2000 years later, during the great voyages of exploration. Circumference is a compelling scientific detective story that transports readers back to a time when humans had no idea how big their world was--and the fate of a man who dared to measure the incomprehensible.

**Brilliant Beacons: A History of the American Lighthouse** Eric Jay Dolin, 2016-04-18 What Moby-Dick is to whales, Brilliant Beacons is to lighthouses—a transformative account of a familiar yet mystical subject. —Laurence Bergreen, author of Columbus: The Four Voyages In this magnificent compendium (New Republic), best-selling author Eric Jay Dolin presents the definitive history of American lighthouses, and in so doing illuminate[s] the history of America itself (Entertainment Weekly). Treating readers to a memorable cast of characters and fascinating anecdotes (New York Review of Books), Dolin shows how the story of the nation, from a regional backwater colony to global industrial power, can be illustrated through its lighthouses—from New England to the Gulf of Mexico, the Great Lakes, the Pacific Coast, and all the way to Alaska and Hawaii. **Corcoran Gallery of Art** Corcoran Gallery of Art, Sarah Cash, Emily Dana Shapiro, Jennifer Carson, 2011 This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

**Roman Egypt** Roger S. Bagnall, 2021-09-09 Egypt played a crucial role in the Roman Empire for seven centuries. It was wealthy and occupied a strategic position between the Mediterranean and Indian Ocean worlds, while its uniquely fertile lands helped to feed the imperial capitals at Rome and then Constantinople. The cultural and religious landscape of Egypt today owes much to developments during the Roman period, including in particular the forms taken by Egyptian Christianity. Moreover, we have an abundance of sources for its history during this time, especially because of the recovery of vast numbers of written texts giving an almost uniquely detailed picture of its society, economy, government, and culture. This book, the work of six historians and archaeologists from Egypt, the US, and the UK, provides students and a general audience with a readable new history of the period and includes many illustrations of art, archaeological sites, and documents, and quotations from primary sources.

**Book of felicity**, 2007 Facsimile of ms. written and illuminated in c. 1582. Produced for Fatima, the daughter of Sultan Murad III. Translated from the Arabic original into Turkish by Suudi Mehmed Efendi (Muḥammad ibn Amīr Ḥasan al-Su'ūdī). Illuminations are believed to be created by Nakkaş Osman, and his workshop in Istanbul. The miniatures are painted in opaque watercolor and gold on paper. This manuscript is now part of the collection of the Bibliothèque nationale de France, Paris, Ms. Supplement turc 242.

**The Lighthouse and the Observatory** Daniel A. Stolz, 2018-01-11 This history of astronomy in Egypt reveals how modern science came to play an authoritative role in Islamic religious practice.

**Apocalypse. An Alexandrian World Chronicle** Pseudo-Methodius, 2012-06-04 The Apocalypse informed medieval expectations of the end of the world, responses to strange and exotic invaders, and the legend of Alexander the Great. An Alexandrian World Chronicle represented the early Christian chronicle tradition that would dominate medieval historiography. Both crossed the Mediterranean in Late Antiquity.

**Ink and Bone** Rachel Caine, 2016-04-05 Originally published in hardcover in 2015 by New American Library.

**The Martian** Andy Weir, 2014-02-11 Nominated as one of America's best-loved novels by PBS's The Great American Read Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive—and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old human error are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills—and a relentless, dogged refusal to quit—he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?
