Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the

change in Kingsnorth's thinking. In them he articulates a new vision that he calls "dark ecology," which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed "Uncivilization" manifesto, asks hard questions about how we've lived and how we should live.

Cowed: The Hidden Impact of 93 Million Cows on America's Health, Economy, Politics, Culture, and Environment Denis Hayes,Gail Boyer Hayes,2015-03-09 From leading ecology advocates, a revealing look at our dependence on cows and a passionate appeal for sustainable living. In *Cowed*, globally recognized environmentalists Denis and Gail Boyer Hayes offer a revealing analysis of how our beneficial, centuries-old relationship with bovines has evolved into one that now endangers us. Long ago, cows provided food and labor to settlers taming the wild frontier and helped the loggers, ranchers, and farmers who shaped the country's landscape. Our society is built on the backs of bovines who indelibly stamped our culture, politics, and economics. But our national herd has doubled in size over the past hundred years to 93 million, with devastating consequences for the country's soil and water. Our love affair with dairy and hamburgers doesn't help either: eating one pound of beef produces a greater carbon footprint than burning a gallon of gasoline. Denis and Gail Hayes begin their story by tracing the co-evolution of cows and humans, starting with majestic horned aurochs, before taking us through the birth of today's feedlot farms and the threat of mad cow disease. The authors show how cattle farming today has depleted America's largest aquifer, created festering lagoons of animal waste, and drastically increased methane production. In their quest to find fresh solutions

to our bovine problem, the authors take us to farms across the country from Vermont to Washington. They visit worm ranchers who compost cow waste, learn that feeding cows oregano yields surprising benefits, talk to sustainable farmers who care for their cows while contributing to their communities, and point toward a future in which we eat less, but better, beef. In a deeply researched, engagingly personal narrative, Denis and Gail Hayes provide a glimpse into what we can do now to provide a better future for cows, humans, and the world we inhabit. They show how our relationship with cows is part of the story of America itself.

Portrait of a Burger as a Young Calf Peter Lovenheim, 2010-04-14 Four years ago, journalist Peter Lovenheim was standing in a long line at McDonald's to buy a Happy Meal for his little daughter, which would come with a much-desired Teenie Beanie Baby—either a black-and-white cow named “Daisy” or an adorable red bull named “Snort.” Finding it rather strange that young children were being offered cuddly toy cows one minute and eating the grilled remains of real ones the next, Lovenheim suddenly saw clearly the great disconnect between what we eat and our knowledge of where it comes from. Determined to understand the process by which living animals become food, Lovenheim did the only thing he could think of: He bought a calf—make that twin calves, number 7 and number 8—from the dairy farm where they were born and asked for permission to spend as much time as necessary hanging around and observing everything that happened in the lives of these farm animals. Portrait of a Burger as a Young Calf is the provocative true story of Peter Lovenheim's hands-on journey into the dairy and beef industries as he follows his calves from conception to possible consumption. In the process, he gets to know the good, hard-working people who raise our cattle and make milk products, beef, and veal available to consumers like you and me. He supplies us with a “fly on the wall” view of how these animals are used to put food on America's very abundant tables. Constantly vigilant about

wanting to be an observer who never interferes, Lovenheim allows the reader to see every aspect of a cow's life, without passing judgment. Reading this book will forever change the way you think about food and the people and animals who provide it for us. From the Hardcover edition.

Trickster Makes This World Lewis Hyde,2010-08-17 In Trickster Makes This World, Lewis Hyde brings to life the playful and disruptive side of human imagination as it is embodied in trickster mythology. He first visits the old stories—Hermes in Greece, Eshu in West Africa, Krishna in India, Coyote in North America, among others—and then holds them up against the lives and work of more recent creators: Picasso, Duchamp, Ginsberg, John Cage, and Frederick Douglass. Twelve years after its first publication, Trickster Makes This World—authoritative in its scholarship, loose-limbed in its style—has taken its place among the great works of modern cultural criticism. This new edition includes an introduction by Michael Chabon.

The Road Cormac McCarthy, 2007-03-20 WINNER OF THE PULITZER PRIZE • NATIONAL BESTSELLER • A searing, post-apocalyptic novel about a father and son's fight to survive, this tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful (San Francisco Chronicle). • From the bestselling author of *The Passenger* A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey. It boldly imagines a future in which no hope

remains, but in which the father and his son, each the other's world entire, are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. Look for Cormac McCarthy's latest bestselling novels, *The Passenger* and *Stella Maris*.

Milk! Mark Kurlansky, 2018-05-08 Mark Kurlansky's first global food history since the bestselling *Cod and Salt*; the fascinating cultural, economic, and culinary story of milk and all things dairy--with recipes throughout. According to the Greek creation myth, we are so much spilt milk; a splatter of the goddess Hera's breast milk became our galaxy, the Milky

Way. But while mother's milk may be the essence of nourishment, it is the milk of other mammals that humans have cultivated ever since the domestication of animals more than 10,000 years ago, originally as a source of cheese, yogurt, kefir, and all manner of edible innovations that rendered lactose digestible, and then, when genetic mutation made some of us lactose-tolerant, milk itself. Before the industrial revolution, it was common for families to keep dairy cows and produce their own milk. But during the nineteenth century mass production and urbanization made milk safety a leading issue of the day, with milk-borne illnesses a common cause of death. Pasteurization slowly became a legislative matter. And today milk is a test case in the most pressing issues in food politics, from industrial farming and animal rights to GMOs, the locavore movement, and advocates for raw milk, who controversially reject pasteurization. Profoundly intertwined with human civilization, milk has a compelling and a surprisingly global story to tell, and historian Mark Kurlansky is the perfect person to tell it. Tracing the liquid's diverse history from antiquity to the present, he details its curious and crucial role in cultural evolution, religion, nutrition, politics, and economics.
