Comprehensive Logistics Timm Gudehus, Herbert Kotzab, 2012-01-10 Modern logistics comprises operative logistics, analytical logistics and management of logistic networks. Central task of operative logistics is the efficient supply of required goods at the right place within the right time. Tasks of analytical logistics are designing optimal networks and systems, developing strategies for planning, scheduling and operation, and organizing efficient order and performance processes. Logistic management plans, implements and operates logistic networks and schedules orders, stocks and resources. This reference-book offers a unique survey of modern logistics. It contains proven strategies, rules and tools for the solution of a multitude of logistic problems. The analytically derived algorithms and formulas can be used for the computer-based planning of logistic systems and for the dynamic scheduling of orders and resources in supply networks. They enable significant improvements of performance, quality and costs. Their application is demonstrated by several examples from industry, trade and service providers. Apart from corrections and modifications the second edition contains a new chapter on maritime logistics. It demonstrates how the methods of this book can be used to solve complex logistic problems of practical relevance for economy, society and environment. The book is written for professionals, scientists, teachers and graduate students. An extensive index makes it a dictionary of modern logistics.

Feeding the City Sara Roncaglia, 2013-07-15 Every day in Mumbai 5,000 dabbawalas (literally translated as those who carry boxes) distribute a staggering 200,000 home-cooked lunchboxes to the city's workers and students. Giving employment and status to thousands of largely illiterate villagers from Mumbai's hinterland, this co-operative has been in operation since the late nineteenth century. It provides one of the most efficient delivery networks in the world: only one lunch in six million goes astray. *Feeding the City* is an ethnographic study of the fascinating inner workings of Mumbai's dabbawalas. Cultural anthropologist Sara Roncaglia explains how they cater to the various dietary requirements of a diverse and increasingly global city, where the preparation and consumption of food is pervaded with religious and cultural significance. Developing the idea of gastrosemantics - a language with which to discuss the broader implications of cooking and eating - Roncaglia's study helps us to rethink our relationship to food at a local and global level.

Explosive Shocks in Air Gilbert F. Kinney, Kenneth J. Graham, 2013-11-11 A purpose of science is to organize diversified factual knowledge into a coherent body of information, and to present this from the simplest possible viewpoint. This is a formidable task where our knowledge is incomplete, as it is with explosions. Here one runs the risk of oversimplification, naivete, and incompleteness. Nevertheless a purpose of this work is to present as simply as possible a general description of the basic nature of explosions.

This treatise should be of interest to all who are working with explosives such as used in construction or in demolition work, in mining operations, or in military applications. It should also be of interest to those concerned with disasters such as explosions or earthquakes, to those involved in civil defense precautions, and to those concerned with defense against terrorists. That is, this material should be of interest to all who wish to utilize, or to avoid, the effects of explosions as well as to those whose interest is primarily scientific in nature.

Semper Mars Ian Douglas,2009-03-17 The Year is 2040. The Marines have landed on Mars to guard the unearthed secrets of an ancient and dangerous alien race: Ourselves. Scientists have discovered something astonishing in the subterranean ruins of a sprawling Martian city: startling evidence of an alternative history that threatens to split humanity into opposing factions and plunge the Earth into chaos and war. The USMC -- a branch of a military considered, until just recently, to be obsolete -- has dispatched the Marine Mars Expeditionary Force, a thirty-man weapons platoon, to the Red Planet to protect American civilians and interest with lethal force if necessary. Because great powers are willing to devastate a world in order to keep an ancient secret buried. Because something that was hidden in the Martian dust for half a million years has just been unearthed . . . something that calls into question every belief that forms the delicate foundation of civilization . . . Something inexplicably human.

Ships of the Star Fleet Calon Riel,Todd Guenther,1991-07

Valor's Choice Tanya Huff,2022-07-29 Tanya Huff--acclaimed author of the Blood Series--begins her celebrated Confederation series that will launch readers into a future where Humans are not the most evolved species... Good thing they can take orders. Brought into the multi-species Confederation, Humans earn their place along the Taykan and the Krai by acting as military guardians of the Elder Races, who have risen above societal aggression and violence. When Staff Sergeant Torin Kerr and her platoon are dragged from some well-deserved R&R to play honor guard for a diplomatic mission to the non-Confederation planet of the Silsviss, Torin suspects that something is about to go wrong. You don't make staff sergeant in the CMC without a well-developed sense of paranoia. Justified paranoia when word reaches them that the enemy has been spotted in this sector of space. The diplomatic mission becomes a race to recruit the Silsviss into the Confederation before the enemy returns, claims the reptilian warriors as their own, and turns them loose on the Confederation. One battle-weary platoon has to step up to stop the slaughter.

The Deltoid Pumpkin Seed John McPhee,2011-04-01 This is the fascinating story of the dream of a completely new aircraft, a hybrid of the plane and the rigid airship - huge, wingless, moving slowly through the lower sky. John

McPhee chronicles the perhaps unfathomable perseverance of the aircraft's successive progenitors

Space Marine Ajax Sean-Michael Argo,2023-08-17 Ajax answers the call of duty and becomes an Einherjar space marine, charged with defending humanity against hideous alien monsters in furious combat across the galaxy. The Garm, as they came to be called, emerged from the deepest parts of uncharted space, devouring all that lay before them, a great swarm that scoured entire star systems of all organic life. This space-borne hive, this extinction fleet, made no attempts to communicate and offered no mercy. Humanity has always been a deadly organism, and we would not so easily be made the prey. Unified against a common enemy, we fought back, meeting the swarm with soldiers upon every front. We were resplendent in our fury, and yet, despite the terrible slaughter we visited upon the enemy, world after world still fell beneath ravenous tooth and wicked claw. For every beast slain in the field, another was swiftly hatched to take its place and humanity was faced with a grim war of attrition. After a decade of bitter galactic conflict, it was all humanity could do to slow the advance of the swarm and with each passing year we came closer to extinction. The grinding cost of war mounted. The realization set in that without a radical shift in tactics and technology the forces of humanity would run out of soldiers before it ran out of bullets. In desperate response to the real threat of total annihilation, humanity created the Einherjar. Fearless new warriors with frightening new weapons who were sent to fight the wolves at the gate.

Space Marine Loki Sean-Michael Argo,2023-08-17 Live. Fight. Die. Live Again. This is the fate of all Einherjar space marines, tasked to battle for humanity against ravenous alien swarms in an endless war of survival or extinction. The garm on Heorot have been exterminated, and the extinction fleet's suicidal assaults turned back upon every front across the universe. However, the Hive Mind still pulses with psychic menace, and marine Ajax can hear its hideous siren call. Task Force Grendel has been assembled to hunt down other alpha garm that have appeared deep within human space, and a growing number of marines believe that Ajax is the great hero Beowulf, come now to re-conquer the stars. Ajax himself has doubts, though, as he and his band of brothers are hurled into the slaving jaws of danger again and again, his only choice is to raise his rifle and fight. As the Einherjar hunt monsters, a legendary warrior rises from the body forge, his mind overwhelmed with equal parts myth and madness. His betrayal unleashes a host of abominations, and threatens to shake the very pillars of human civilization to dust as the traitor reveals that evolution is a weapon of mass destruction.

The Female Soldier; Or, The Surprising Life and Adventures of Hannah Snell Anonymous,2021-04-25 This little adventure book presents a fascinating account of an Englishwoman who disguised as a man to serve in the Royal Marines during the early 1700s. The Future Battlefield Malik J. Mohan,1997

Supply Chain Analysis Christopher S. Tang, Chung-Piaw Teo, Kwok-Kee Wei, 2007-11-28 This is a carefully developed work focused on the analysis of supply chain interaction issues in emerging markets and industry sectors. It is a leading-edge handbook that will emphasize areas of study where, thus far, little work has been done and where the rubber meets the road – the supply chain process, information, and systems integration. These are pertinent issues facing practitioners and researchers in today's business environment. This is a gap-bridging handbook that analyzes interaction issues from both the research and practitioner sides. The result is a volume that examines and provides practical solutions on interaction issues while being firmly grounded in research principles.

Managing Supply Chains Werner Delfmann, 2007 Supply chain management (SCM) is growing both as a research subject and as a crucial field of importance in companies. In order to obtain sustainable supply chain success, well managed long-term relationships among the supply chain partners turn out to be indispensable. Therefore, the book is divided into two parts: Part I (supply chain relations) focuses on topics such as supply chain design and partner selection, while Part II (supply chain processes) deals with shorter term decisions in executing supply chain processes beyond firm boundaries.
