**Cut and Assemble Frank Lloyd Wright's Robie House** Edmund V. Gillon, Jr.,1987-01-01 Designed in 1908 as a suburban residence for a Chicago businessman, the Robie House embodied the full spirit of Frank Lloyd Wright's pioneering prairie school of design. Today, this masterpiece of modern architecture remains a classic example of the builder's ideas and ideals. Long, low, streamlined and exemplary of the prairie's spaciousness, the Robie House profoundly influenced the course of American architecture — so much so that a model of Wright's innovative structure has long been on display at the Museum of Modern Art in Manhattan. Now model builders as well as lovers of fine architecture can construct an accurate three-dimensional model of the Robie House, and thereby discover for themselves the harmonious interrelationships of parts and numerous other design details that make this home a world-famous architectural masterpiece. Printed in full color on sturdy card stock, the model comes complete with step-by-step instructions and exploded diagrams. A series of multi-level horizontal planes includes balconies, platforms, a porch and entrance court, while easy-to-follow directions clearly explain how to cut, fold and glue walls, doorways, windows, roof and other features. Students of architecture, miniaturists and paper engineers will delight in recreating an outstanding example of American residential architecture, which, in Wright's own words, has become a source of worldwide inspiration.

*Constructing Buildings for Model Railways* David Ashwood,2023-09-30 At some time during ownership a train set crosses an arbitrary threshold and becomes a model railway. The aspiring modeler then has the challenge of filling in all the gaps. Whether the line runs through the countryside, a village or town, some type of infrastructure is needed to represent the station, home, or factory. This can be a challenge to the modeler as there are a wide variety of offerings at differing price points and detail levels. This book progresses through planning and thought processes aiming to demonstrate pictorially several different build types. From the simple paper kit to mighty scratch-built edifices, each is broken down to show how the build is undertaken. This book also follows some of the rebuilding process undertaken by the Market Deeping Model Railway Club as layouts were repaired, enhanced, or replaced following their annual show being vandalized on the night before public opening in May 2019. As the news of this sad event broke, it went worldwide through the modeling community and public in general. The images of layouts broken to matchwood showed many years of skilled building and devoted operation which were lost. This gave the opportunity for experienced club members to build a mini movie set, construct a major London terminus and patch repair what could be saved from damaged originals. The photographic capture of these projects has been used within this book alongside the detailed work of other modelers, clubs, and societies.
