Liore-et-Olivier LeO 45 Jose Fernandez, Patrick Laureau, 2015-07-09 This is the fourth title in the French Wings series, describing the history of the LeO 45 from initial specifications to retirement after WWII. The Leo 45 was a modern (by 1940 standards) bomber in the Armée de l'Air (French Air Force), probably the best known of such aircraft. Used during the Phoney War but more importantly employed to try to stop the German onslaught during the Bataille de France. After French armistice, the Vichy Air Force built some planes, most of them captured during invasion of 'Free Zone' in November 1942. The Germans used this plane in the transport role, as well as French troops in North Africa when they fought alongside the Allies after Operation Torch. Specifications, construction and operations of these aircraft are described in detail, illustrated with many previously unpublished photos. Color schemes and markings are described and illustrated (Armée de l'Air, Vichy Air Force, Luftwaffe, Armée de l'Air after Torch).

State Capitalism and Working-class Radicalism in the French Aircraft Industry Herrick Chapman, 1991-01-01 Using the example of the aircraft industry, which takes him like an arrow to the heart of many of the key conflicts in French life between 1936 and 1948, Herrick Chapman has written a penetrating and exceptionally well documented account of the way that France developed her present style of industrial relations, in which the state plays such a central role. No book I know so successfully integrates the history of aviation . . . with the political and social history of France. Both thorough and thoughtful, it is an impressive achievement.--Robert Wohl, University of California, Los Angeles An unusual, innovative book based on impressive research that throws new light in a major way on twentieth-century French politics and society . . . one of the most interesting and original monographs in modern French history in a long time.--Robert O. Paxton, Columbia University This is a breakthrough of considerable importance. [Chapman] will become the leading North American, perhaps even English-speaking, historian of contemporary France.--George Ross, Brandeis University

French Aeroplanes Before the Great War Leonard E. Opdycke, 1999 French Aeroplanes Before the Great War is a catalog of the aeroplanes of the nearly 700 French builders who worked before the onset of World War I. Most of these aeroplanes flew some did not some were never even finished but all of them reflect the extraordinary vitality and sense of optimism that powered the aeronautical world before the future of the aeroplane began to become clearer in wartime. If the Wrights had not flown in 1903, one of the early French builders would very quickly have won the laurels for the first flight. Some of the machines appear in these pages probably for the first time in print; others are rarely seen. This collection serves as a kind of super Exposition Internationale de Locomotion Aérienne; readers are invited to enter the Grand Palais, as they might have in 1908 or 1909, to enjoy these marvelous aircraft.

Paris to the Moon Adam Gopnik, 2001-12-18 Paris. The name alone conjures images of chestnut-

lined boulevards, sidewalk cafés, breathtaking façades around every corner--in short, an exquisite romanticism that has captured the American imagination for as long as there have been Americans. In 1995, Adam Gopnik, his wife, and their infant son left the familiar comforts and hassles of New York City for the urbane glamour of the City of Light. Gopnik is a longtime New Yorker writer, and the magazine has sent its writers to Paris for decades--but his was above all a personal pilgrimage to the place that had for so long been the undisputed capital of everything cultural and beautiful. It was also the opportunity to raise a child who would know what it was to romp in the Luxembourg Gardens, to enjoy a croque monsieur in a Left Bank café--a child (and perhaps a father, too) who would have a grasp of that Parisian sense of style we Americans find so elusive. So, in the grand tradition of the American abroad, Gopnik walked the paths of the Tuileries, enjoyed philosophical discussions at his local bistro, wrote as violet twilight fell on the arrondissements. Of course, as readers of Gopnik's beloved and award-winning Paris Journals in The New Yorker know, there was also the matter of raising a child and carrying on with day-to-day, not-so-fabled life. Evenings with French intellectuals preceded middle-of-the-night baby feedings; afternoons were filled with trips to the Musée d'Orsay and pinball games; weekday leftovers were eaten while three-star chefs debated a culinary crisis. As Gopnik describes in this funny and tender book, the dual processes of navigating a foreign city and becoming a parent are not completely dissimilar journeys--both hold new routines, new languages, a new set of rules by which everyday life is lived. With singular wit and insight, Gopnik weaves the magical with the mundane in a wholly delightful, often hilarious look at what it was to be an American family man in Paris at the end of the twentieth century. We went to Paris for a sentimental reeducation--I did anyway--even though the sentiments we were instructed in were not the ones we were expecting to learn, which I believe is why they call it an education.

The History and Future of Technology Robert U. Ayres, 2021 Eminent physicist and economist, Robert Ayres, examines the history of technology as a change agent in society, focusing on societal roots rather than technology as an autonomous, self-perpetuating phenomenon. With rare exceptions, technology is developed in response to societal needs that have evolutionary roots and causes. In our genus Homo, language evolved in response to a need for our ancestors to communicate, both in the moment, and to posterity. A band of hunters had no chance in competition with predators that were larger and faster without this type of organization, which eventually gave birth to writing and music. The steam engine did not leap fully formed from the brain of James Watt. It evolved from a need to pump water out of coal mines, driven by a need to burn coal instead of firewood, in turn due to deforestation. Later, the steam engine made machines and mechanization possible. Even quite simple machines increased human productivity by a factor of hundreds, if not thousands. That was the Industrial Revolution. If we count electricity and the automobile as a second industrial revolution, and the digital computer as the beginning of a third, the world is now on the cusp of a fourth revolution led by microbiology. These industrial revolutions have benefited many in the short term, but devastated the Earth's ecosystems. Can technology save the human race from the catastrophic consequences of its past success? That is the question this book will try to answer.

Chanel Lisa Chaney, 2011-10-06 In Chanel: An Intimate Life, acclaimed biographer Lisa Chaney tells the controversial story of the fashion icon who starred in her tumultuous era Coco Chanel was many things to many people. Raised in emotional and financial poverty, she became one of the defining figures of the twentieth century. She was mistress to aristocrats, artists and spies. She broke rules of style and decorum, seducing both men and women, yet in her work expected the highest standards. She took a 'plaything' and turned it into a global industry which defined the modern

woman. Filled with new insights and thrilling discoveries, Lisa Chaney's Chanel provides the most defining and provocative portrait yet. 'Chaney's research is laudable, uncovering fresh details of Chanel's well-trodden rag trade to riches story' Evening Standard 'An unflinching examination of the historically inscrutable designer' Vogue Lisa Chaney has lectured and tutored in the history of art and literature, made TV and radio broadcasts on the history of culture, and reviewed and written for journals and newspapers, including The SundayTimes, the Spectator and the Guardian. Airline Maps Mark Ovenden, Maxwell Roberts, 2019-10-29 A nostalgic and celebratory look back at one hundred years of passenger flight, featuring full-color reproductions of route maps and posters from the world's most iconic airlines, from the author of bestselling cult classic Transit Maps of the World. In this gorgeously illustrated collection of airline route maps, Mark Ovenden and Maxwell Roberts look to the skies and transport readers to another time. Hundreds of images span a century of passenger flight, from the rudimentary trajectory of routes to the most intricately detailed birds-eye views of the land to be flown over. Advertisements for the first scheduled commercial passenger flights featured only a few destinations, with stunning views of the countryside and graphics of biplanes. As aviation took off, speed and mileage were trumpeted on bold posters featuring busy routes. Major airlines produced highly stylized illustrations of their global presence, establishing now-classic brands. With trendy and forward-looking designs, cartographers celebrated the coming together of different cultures and made the earth look ever smaller. Eventually, fleets got bigger and routes multiplied, and graphic designers have found creative new ways to display huge amounts of information. Airline hubs bring their own cultural mark and advertise their plentiful destination options. Innovative maps depict our busy world with webs of overlapping routes and networks of low-cost city-to-city hopping. But though flying has become more commonplace, Ovenden and Roberts remind us that early air travel was a glamorous affair for good reason. Airline Maps is a celebration of graphic design, cartographic skills and clever marketing, and a visual feast that reminds us to enjoy the journey as much as the destination.

Post-Pop Cinema Jesse Fox Mayshark, 2007-05-30 Starting in the early 1990s, artists such as Quentin Tarantino, David Foster Wallace, and Kurt Cobain contributed to a swelling cultural tide of pop postmodernism that swept through music, film, literature, and fashion. In cinema in particular, some of the arts most fundamental aspects—stories, characters, and genres, for instance—assumed such a trite and trivialized appearance that only rarely could they take their places on the screen without provoking an inward smirk or a wink from the audience. Out of this highly self-conscious and world-weary environment, however, a new group of filmmakers began to develop as the decade wore

on, with a new set of styles and sensibilities to match. In Post-Pop Cinema author Jesse Fox Mayshark takes us on a film-by-film tour of the works of these filmmakers-including Wes and P. T. Anderson, Sofia Coppola, Richard Linklater, Alexander Payne, and David O. Russell-and seeks to reveal how a common pool of styles, collaborators, and personal connections helps them to confront the unifying problem of meaning in American film. Wes Anderson's *Bottle Rocket* (1996) and Paul Thomas Anderson's *Boogie Nights* (1997) were ultimately about their characters' lives-even though their characters often dealt with highly contrived environments and situations. And soon after Wes Anderson scored his first success, others like David O. Russell (*Flirting With Disaster*, *Three Kings*), the screenwriter Charlie Kaufman (who collaborated with Spike Jonze on such projects as *Being John Malkovich* and *Adaptation*), Alexander Payne (*Election*, *Sideways*), Richard Kelly (*Donnie Darko*), and Sofia Coppola (*Lost in Translation*) began to tread their own paths over this same ground. Although these men and women represent a wide range of styles and subject matter, all their films revolve in different ways around the difficulty of establishing and maintaining connections. This theme of connection also runs deeper than the films made: the directors share actors (Mark Wahlberg, Bill Murray, Ben Stiller, Jason Schwartzman), collaborators (the musician Jon Brion) and sometimes even personal connections (Spike Jonze starred in Russell's *Three Kings*, and was married to Coppola). Together these filmmakers form a loose and distinctly American school of filmmaking, one informed by postmodernism but not in thrall to it, and one that every year becomes more important to the world of cinema both within and beyond the United States.

Non-stop Jack El-Hai, 2013 *Non-Stop: A Turbulent History of Northwest Airlines* captures the broad context and the intriguing details as it weaves together the accounts of individuals who gave the airline its unique character. The story it tells, touching on everything from airline food and advertising to smoking regulations and labor relations, encapsulates the profound changes to business, travel, and culture that marked the twentieth century.
