Attached Amir Levine,Rachel Heller,2010-12-30 “Over a decade after its publication, one book on dating has people firmly in its grip.” —The New York Times We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways: • Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back. • Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness. • Secure people feel comfortable with intimacy and are usually warm and loving. Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love.

The Hejaz Railway and the Ottoman Empire Murat Özyüksel,2014-10-22 Railway expansion was symbolic of modernization in the late 19th century, and Britain, Germany and France built railways at enormous speed and reaped great commercial benefits. In the Middle East, railways were no less important and the Ottoman Empire's Hejaz Railway was the first great industrial project of the 20th century. A route running from Damascus to Mecca, it was longer than the line from Berlin to Baghdad and was designed to function as the artery of the Arab world - linking Constantinople to Arabia. Built by German engineers, and instituted by Sultan Abdul Hamid II, the railway was financially crippling for the Ottoman state and the its eventual stoppage 250 miles short of Mecca (the railway ended in Medina) was symbolic of the Ottoman Empire's crumbling economic and diplomatic fortunes. This is the first book in English on the subject, and is essential reading for those interested in Industrial History, Ottoman Studies and the geopolitics of the Middle East before World War I.
