Midcentury Christmas: Holiday Fads, Fancies, and Fun from 1945 to 1970 Sarah Archer, 2016-10-18 A celebration of Christmas in the 1950s and '60s Midcentury America was a wonderland of department stores, suburban cul-de-sacs, and Tupperware parties. Every kid on the block had to have the latest cool toy, be it an Easy Bake Oven for pretend baking, a rocket ship for pretend space travel, or a Slinky, just because. At Christmastime, postwar America's dreams and desires were on full display, from shopping mall Santas to shiny aluminum Christmas trees, from the Grinch to Charlie Brown's beloved spindly Christmas tree. Now design maven Sarah Archer tells the story of how Christmastime in America rocketed from the Victorian period into Space Age, thanks to the new technologies and unprecedented prosperity that shaped the era. The book will feature iconic favorites of that time, including:

- A visual feast of Christmastime eats and recipes, from

magazines and food and appliance makers • Christmas cards from artists and designers of the era, featuring Henry Dreyfuss, Charles & Ray Eames, and Alexander Girard • Vintage how-to templates and instructions for holiday decor from Good Housekeeping and the 1960's craft craze • Advice from Popular Mechanics on how to glamorize your holiday dining table • Decorating advice for your new Aluminum Christmas Tree from ALCOA (the Aluminum Company of America) • The first American-made glass ornaments from Corning Glassworks Midcentury Christmas is sure to be on everyone's most-wanted lists.

The Day the Lines Changed Kelley Donner, 2021-06-15 An inspiring picture book explains what it means to live, love, and hope during a pandemic in a child-friendly way. Without ever saying Coronavirus or Pandemic, *The Day the Lines Changed* explains what it means to live through a viral outbreak and gives children a much needed, optimistic view of the future. Through the use of ripped paper and basic shapes, Kelley Donner takes a frightening and complicated pandemic and turns it into an uplifting, easily understandable story about the life of a green line. A welcome resource for parents, teachers, and caregivers who are trying their best to explain the pandemic to worried children. Carefree and happy, the green line lives together with her family, goes to school during the week, and on weekends visits the town square. Then one day some of the orange and purple lines begin to turn crooked and suddenly, everything is different for the green line and her family. Just as green begins to worry, if her own family might turn crooked, one line makes a fantastic discovery which changes the lives of the lines forever.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Who Will Help Santa this Year? Jerry Pallotta,2007 This year, the job is just too big. Santa Claus needs help in his workshop! He posts a sign in his yard, and soon the applicants start arriving. But the mermaids get the toys wet. The fairies leave glitter everywhere. The gnomes think brussels sprouts make great presents. And the wizards have turned Santa into a frog! Just when

things are looking desperate, the elves arrive to save the day! A companion book to *Who Will Guide My Sleigh Tonight?*, this humorous peek behind the scenes at the North Pole is told in Jerry Pallotta's kid-friendly style and beautifully illustrated by David Biedrzycki.

Woodcarving Basics Alan Bridgewater, Gill

Bridgewater, 2002-03 Includes how-to information for projects: a rustic country stool, a ball-in-a-cage puzzle, and a wildfowl decoy.

Fan-carving Sally Nye, David Nye, 2003 Fan-carving is the process of slicing wood into thin blades (feathers) and then twisting and interlocking them to create a 3-dimensional design from one piece of wood. Fans and birds are the most popular items made. Legends and customs associated with the fan bird are of a religious and spiritual nature. With the help of European museums, the Nyes have traced the history and migration of this Old World folk art from the ancient Russian region, through Europe, to North America. Preserving this folk art is the purpose of this book. It contains easy to follow step-by-step instructions on how to make fans and birds. Full color photos accompany each step. Also included are six full-scale templates: a fan, plus five birds. This book contains a comprehensive chart of twelve species of wood, each evaluated for its performance. Fan-carving is an entry level project to woodcarving. Within three hours a novice can create a very respectable bird. The story about fan-carving is as interesting as making a bird.

The Democratic Forest William Eggleston, Mark

Holborn, 2015 Following the publication of *Chromes* in 2011 and *Los Alamos Revisited* in 2012, the reassessment of Eggleston's

career continues with the publication of *The Democratic Forest*, his most ambitious project. This ten-volume set containing more than a thousand photographs is drawn from a body of twelve thousand pictures made by Eggleston in the 1980s. Following an opening volume of work in Louisiana, which serves as a visual preface, the remaining books cover Eggleston's travels from his familiar ground in Memphis and Tennessee to Dallas, Pittsburgh, Miami, Boston, the pastures of Kentucky, and as far as the Berlin Wall. The final volume leads the viewer back to the South of small towns, cotton fields, the Civil War battlefield of Shiloh and the home of Andrew Jackson, the President from Tennessee. The democracy of Eggleston's title refers to his democracy of vision, through which he represents the most mundane subjects with the same complexity and significance as the most elevated. The exhaustive editing process of *The Democratic Forest*--a rarely shown body of work of which only a fraction has been published to date--has taken over three years, and was guided by the belief that only on this large scale can the magnitude of Eggleston's achievement be represented. With no precedent in American art, Eggleston's photography seen as a whole has all the grandeur of an epic piece of fiction.--Publisher's Web site.
