*Papertoy Monsters* Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and

curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

*Daily STEM* Chris Woods, 2020-09-07 From The Author: Has your school added a STEM class, or are you hoping to build more STEM into your school community? Buying a bunch of 3D printers and robot kits is a good start, but what does a sustainable STEM learning culture look like? This book will challenge you to think past the Daily STEM acronym and think about what it means to build a culture of STEM thinking in your school. You'll find plenty of practical tips and examples to make STEM relevant for every kid and infuse it into every classroom and every home in your community. Editorial Reviews: STEM can seem like such a big challenge for teachers and school leaders alike. We all want students engaged in meaningful, hands-on learning. But where do we begin?

Start with Daily STEM. This awesome gift to educators by author Chris Woods is packed full of practical, logical, and easy steps teachers can and should take to bring STEM to life. It's like having Chris right there coaching you, helping you find STEM in everyday life. Daily STEM will have you building a culture of STEM in your school or classroom and bringing relevant learning to life. Darrin M Peppard, Ed.D. - Superintendent - Author of Road To Awesome - Renaissance Hall of Fame Chris' book Daily STEM is exactly what every teacher needs to promote curiosity and hands-on learning in the classroom. He prompts critical thinking and offers experiences that are fun and engaging for students. It is packed full of cool ideas and STEM inspiration-a must read!!! Jacie Maslyk - Educator - Author - STEM Enthusiast I absolutely love Daily STEM!! You will never be able to look at the world the same way after you read this gem! Hundreds of ideas will swirl through your head after each page. If you are searching for your teaching style, here it is: curiosity and connections. This is a book you will read more than once. Chris's personal stories will put a smile on your face as you reflect on your own stories. WOW Factor!! Epic! Dr. Frank Rudnesky - Educator - Author - Speaker - Consultant Daily STEM is a book I would normally have an aversion to! Teachers either love the idea of STEM, or they run as fast as they can when they hear the term. I used to run! Daily Stem offered me significant insight into so many ways educators can continue to provide STEM instruction/ideas and exploration across content areas and beyond the classroom walls. The Q and A style made Daily Stem an easy read. It also provided opportunity to revisit a question - and the answer- quite readily. A noisy classroom is a collaborative classroom. A messy classroom is an inventing classroom, sums up best practice and is a powerful reminder as we plan for the new school year! Dr. Lori

A Man and His Ship Steven Ujifusa, 2013-06-04 "A fascinating historical account...A snapshot of the American Dream culminating with this country's mid-century greatness" (The Wall Street Journal) as a man endeavors to build the finest, fastest, most beautiful ocean liner in history. The story of a great American Builder at the peak of his power, in the 1940s and 1950s, William Francis Gibbs was considered America's best naval architect. His quest to build the finest, fastest, most beautiful ocean liner of his time, the SS United States, was a topic of national fascination. When completed in 1952, the ship was hailed as a technological masterpiece at a time when "made in America" meant the best. Gibbs was an American original, on par with John Roebling of the Brooklyn Bridge and Frank Lloyd Wright of Fallingwater. Forced to drop out of Harvard following his family's sudden financial ruin, he overcame debilitating shyness and lack of formal training to become the visionary creator of some of the finest ships in history. He spent forty years dreaming of the ship that became the SS United States. William Francis Gibbs was driven, relentless, and committed to excellence. He loved his ship, the idea of it, and the realization of it, and he devoted himself to making it the epitome of luxury travel during the triumphant post-World War II era. Biographer Steven Ujifusa brilliantly describes the way Gibbs worked and how his vision transformed an industry. A Man and His Ship is a tale of ingenuity and enterprise, a truly remarkable journey on land and sea.

**The Paper Architect** María Victoria Garrido Bianchini, Ingrid Siliakus, Joyce Aysta, 2009 An introduction to cutting and folding paper structures with templates and plans for creating models of structures such as the Golden Gate

Ali Cavanaugh Ali Cavanaugh, 2019 Modern Fresco Paintings is the first collection of Ali Cavanaugh's paintings, and it follows her entire career using watercolor on kaolin clay to create her modern fresco technique and the lovely work that flows from it. Beginning with her hyper-realistic portraits and ending with her latest, more free-flowing pictures, her use of light, color, and the human form captures the essence of her models and their forms and feelings in a particular moment. Cavanaugh's artistic sensibility was developed by two important events in her childhood. Her dependence on the visual world began when she lost much of her hearing through spinal meningitis when she was two, and her creative spirit developed out of her being raised in a rural environment where she had to create her own ways of expressing herself and making her own fun. She developed her stunning modern fresco medium almost by accident as she was learning to apply the outer layer of plaster to her home in Santa Fe, New Mexico. Since that time this volume illustrates her growth as an artist and her mastery of the technique. These are lovely works, painted masterfully. Both long-time followers of Cavanaugh's work---from the earliest SockArms paintings to those who found her through more recent work like the Chroma series---and those who are discovering her and her art for the first time, will be delighted by this collection.
