Islamic Microfinance Malcolm Harper, Ajaz Ahmed Khan, 2017 Islamic Microfinance critically examines the performance of fifteen institutions and demonstrate how Islamic methods can efficiently satisfy the needs of some types of client but not all. It asks which types of products are affordable and beneficial, for which purposes and for whom.

The Strategic Logic of Women in Jihadi Organizations Hamoon Khelghat-Doost, 2021-01-06 This book discusses the role of women in jihadi organizations. It explores the critical puzzle of why, despite the traditional restrictive views of Islamic jurisprudence on women's social activities, the level of women's incorporation into some jihadi organizations is growing rapidly both in numbers and roles around the world. The author argues that the increasing incorporation of women and their diversity of roles reflect a strategic logic –jihadi groups integrate women to enhance organizational success. To explain the structural metamorphosis of jihadi organizations and to provide insight into the strategic logic of women in jihadi groups, the book develops a new continuum typology, dividing jihadi groups into operation-based and state-building jihadi organizations. The book uses multiple methods, including empirical fieldwork and the conceptual framework of fragile states to explain the expanding role of women within organizations such as ISIS. Addressing a much-overlooked gap in contemporary studies of women's association with militant jihadi organizations, this book will be of interest to scholars in the field of gender and international security, think tanks working on the Middle East security affairs, activists, policy-makers, as well as undergraduate and postgraduate students undertaking study or research associated with gender and militant non-state actors.

Beyond the Homeland Claudia Sagona, 2008 Despite the flurry of research on aspects of Phoenician culture, encompassing their socio-economic developments and the mechanics of their settlement of Mediterranean coastal lands, the fundamental issue of dating Phoenician achievements remains quite fluid. A range of criteria - textual sources, artefact analysis, stratigraphic data, and, increasingly, radiocarbon readings - provide a bewildering and sometimes conflicting picture of Phoenician chronology, which, in many respects, remains tenuous and free-floating. Owing to the nature of Phoenician colonisation, its chronology is often compartmentalised into discrete regional units. This volume brings together a number of essays focusing squarely on the chronology of the Phoenician-Punic world, ranging from the homeland to the western settlements. The essays are written by specialists in their field, who have encapsulated the chronological framework, and the problems therein, for regions touched by Phoenicians interests. A benchmark study, *Beyond the Homeland* will be of value not only to Phoenician-Punic scholars, but also to those in related fields who need an accessible study (in English) to navigate the chronological complexities of the field.

The Islamic Invasion Ph. D. Robert A. Morey, 2011-08 The Islamic Turks were poised to overrun Europe at The Battle of Vienna on September 11/12 of 1683, but were defeated. The Islamic Invasion As Mosques appear across the country people are asking-What do I need to know about Islam? Islam-once an obscure Middle Eastern religion-has rapidly grown into the second largest religion in the world. There are now more Muslims than Episcopalians in the United States! What attraction does Islam hold for its followers? What part does it play in shaping the outlook and attitudes of nearly one billion people? Noted author Dr. Robert A. Morey, internationally recognized authority on the origins of the teachings and rituals of Islam- - explores the pre-Islamic history of Allah, and the doctrines and customs of Islam - reveals Islam's teaching about current issues such as religious freedom and the role of women The Islamic Invasion will give you the insight you need to understand Islam and the challenge it poses today. Dr. Morey warned the United States and Europe about Islam during the early 1980's long before 9/11. Most books on Islam since 9/11 have used his analysis of the Qur'an or Hadith. Special thanks to Professor Colin Akridge-who is a Vietnam Veteran and black scholar in the field of comparative religions-for his valuable and insightful contributions and working with him for researching and writing the section entitled The Black Muslim Movement in America. Islam in Indonesia Jajat Burhanudin, Kees van Dijk, 2013-01-31 While Muslims in Indonesia have begun to turn towards a strict adherence to Islam, the reality of the socio-religious environment is much more complicated than a simple shift towards fundamentalism. In this volume, contributors explore the multifaceted role of Islam in Indonesia from a variety of different perspectives, drawing on carefully compiled case studies. Topics covered include religious education, the increasing number of Muslim feminists in Indonesia, the role of Indonesia in the greater Muslim world, social activism and the middle class, and the interaction between Muslim radio and religious identity.

iMuslims Gary R. Bunt, 2009-04-30 Exploring the increasing impact of the Internet on Muslims around the world, this book sheds new light on the nature of contemporary Islamic discourse, identity, and community. The Internet has profoundly shaped how both Muslims and non-Muslims perceive Islam and how Islamic societies and networks are evolving and shifting in the twenty-first century, says Gary Bunt. While Islamic society has deep historical patterns of global exchange, the Internet has transformed how many Muslims practice the duties and rituals of Islam. A place of religious instruction may exist solely in the virtual world, for example, or a community may gather only online. Drawing on more than a decade of online research, Bunt shows how social-networking sites, blogs, and other cyber-Islamic environments have exposed Muslims to new influences outside the traditional spheres of Islamic knowledge and authority. Furthermore, the Internet has dramatically influenced forms of Islamic activism and radicalization, including jihad-oriented campaigns by networks such as al-Qaeda. By surveying the broad spectrum of approaches used to present dimensions of Islamic social, spiritual, and political life on the Internet, *iMuslims* encourages diverse understandings of online Islam and of Islam generally.

Essential Competencies for English-medium University Teaching Ruth Breeze, Carmen Sancho Guinda, 2016-10-06 As English gains prominence as the language of higher education across the world, many institutions and lecturers are becoming increasingly concerned with the implications of this trend for the quality of university teaching and learning. With an innovative approach in both theme and scope, this book addresses four major competencies that are essential to ensure the effectiveness of English-medium higher education: creativity, critical thinking, autonomy and motivation. It offers an integrated perspective, both theoretical and practical, which defines these competences from different angles within ELT and Applied Linguistics, while also exploring their points of contact and applications to classroom routines. This approach is intended to provide practical guidance and inspiration, in the form of pedagogical proposals, examples of teaching practice and cutting-edge research by scholars and

university teachers from all over the world. To that end, a leading specialist in the field introduces each of the four competencies, explaining concepts accessibly and synthetically, exposing false myths, presenting an updated state of the art, and opening windows for future studies. These introductions are followed by practitioner chapters written by teachers and scholars from different cultures and university contexts, who reflect on their experience and/or research and share effective procedures and suggestions for the university class with English as a vehicle for instruction.

Religion Online Lorne L. Dawson, Douglas E. Cowan, 2013-05-13 Religion Online provides an accessible and comprehensive introduction to this burgeoning new religious reality, from cyberpilgrimages to neo-pagan chatroom communities. A substantial introduction by the editors presenting the main themes and issues is followed by sixteen chapters addressing core issues of concern such as youth, religion and the internet, new religious movements and recruitment, propaganda and the countercult, and religious tradition and innovation.

Professional Development for Language Teachers Jack C. Richards, Thomas S. C. Farrell, 2005-04-04 This much-needed text provides a coherent and strategic approach to teacher development. Teacher Development for Language Teachers examines ten different approaches for facilitating professional development in language teaching: self-monitoring, support groups, journal writing, classroom observation, teaching portfolios, analysis of critical incidents, case analysis, peer coaching, team teaching, and action research. The introductory chapter provides a conceptual framework. All chapters contain practical examples and reflection questions to help readers apply the approach in their own teaching context.

Applied Linguistics and Language Teacher Education Nat Bartels, 2006-07-02 Applied Linguistics and Language Teacher Education is aimed at applied linguists who are interested in understanding more about the learning of novice teachers in their classes. The 21 studies in this volume provide information on the complexity of novice teachers learning and use of knowledge in a variety of applied linguistics classes such as SLA, Syntax, Pragmatics, Sociolinguistics, Phonetics and Phonology, L2 Reading and Writing, Testing, and Content Based Instruction. These studies were conducted in a variety of contexts, from North and South America to Europe, Asia and Australia, and look at the preparation of teachers of English, Spanish and Chinese. The book also includes a state-of-the-art summary of research on knowledge acquisition and use which provides applied linguists with a solid basis for developing their ideas about their students learning and use of the knowledge presented in their classes.

Teaching Skills with Virtual Humans Marissa Bond, David M.W. Powers, Parimala Raghavendra, 2021-06-10 This book highlights current research into virtual tutoring software and presents a case study of the design and application of a social tutor for children with autism. Best practice guidelines for developing software-based educational interventions are discussed, with a major emphasis on facilitating the generalisation of skills to contexts outside of the software itself, and on maintaining these skills over time. Further, the book presents the software solution Thinking Head Whiteboard, which provides a framework for families and educators to create unique educational activities utilising virtual character technology and customised to match learners' needs and interests. In turn, the book describes the development and evaluation of a social tutor incorporating multiple life-like virtual humans, leading to an exploration of the lessons learned and recommendations for the future development of related technologies.

Before Our Very Eyes, Fake Wars and Big Lies Thierry Meyssan, 2019-02-22 This inside story of the 21st century regime change wars lays bare the Arab Spring, the revolutions against Gaddafi and Assad, and the rise of ISIS as creations of the US empire, leading from behind. The US and Israel use their stranglehold on the world's money and media to justify aggression with a fake narrative of human rights violations.

Political Islam and Violence in Indonesia Zachary Abuza, 2006-09-25 Political Islam and Violence in Indonesia presents a penetrating new investigation of religious radicalism in the largest Muslim country in the world. Indonesia is a country long known for its diversity and tolerant brand of Islam. However, since the fall of Suharto, a more intolerant form of Islam has been growing, one whose adherents have carried out terrorist attacks, waged sectarian war, and voiced strident anti-Western rhetoric. Zachary Abuza's unique analysis of radical Islam draws upon primary documents such as Jemaah Islamiyah's operations manual, interviews, and recorded testimonies of politicians, religious figures, and known militants, as well as personal interviews with numerous security and intelligence experts in Indonesia and elsewhere, to paint a picture at once guardedly optimistic about the future of Indonesian democracy and concerned about the increasing role of conservative and radical Islam in Indonesian society. This book will be of great interest to students of Indonesian politics, Asian studies, political violence and security studies in general.

Violence in Nigeria Toyin Falola, 1998 A comprehensive study of religious violence and aggression in Nigeria, notably its causes, consequences, and the options for conflict resolution. Violence in Nigeria is the most comprehensive study of religious violence and aggression in Nigeria, notably its causes, consequences, and the options for conflict resolution. After an analysis of the links between religion and politics, the book elaborates on all the major cases of violence in the 1980s and 90s, including the Maitatsine, Kano, Bauchi, Kaduna, and Katsina riots. Zones of religious tensions are identified, as well as general characteristics of violence in Nigeria; and issues in inter and intra-religious relations, religious organizations, and the states, and the main actors in the conflicts are explored in great detail. A product of extensive primary research, Violence in Nigeria makes a contribution to contemporary social and political history that no previous study has attempted, and it is written to appeal to specialists and non-specialists alike. Toyin Falola is the Jacob and Frances Sanger Mossiker Chair in the Humanities and University Distinguished Teaching Professor at the University of Texas at Austin. He is the author or editor of over a dozen books dealing with the history of Nigeria, its people, their religion and politics.

Media on the Move Daya Kishan Thussu, 2006-10-31 Media on the Move provides a critical analysis of the dynamics of the international flow of images and ideas. This comes at a time when the political, economic and technological contexts within which media organisations operate are becoming increasingly global. The surge in transnational traffic in media products has primarily benefited the major corporations such as Disney, AOL, Time Warner and News Corporation. However, as this book argues, new networks have emerged which buck this trend: Brazilian TV is watched in China, Indian films have a huge following in the Arab world and Al Jazeera has become a household name in the West. Combining a theoretical perspective on contra-flow of media with grounded case studies into one up-to-date and accessible volume, Media on the Move provides a much-needed guide to the globalization of media, going beyond the standard Anglo-American view of this evolving phenomenon.

Innovation and research strategy for growth Great Britain: Department for Business, Innovation & Skills,2011-12-08 The UK has the potential to be world leader in innovation. The strength of UK universities and the wider knowledge base is a national asset being the most productive in the G8. But the challenges are great. To succeed in the global innovation economy, the UK must strengthen its ability to accelerate the commercialization of emerging technologies, and to capture the value chains linked to these. We have already made clear our commitment by maintaining the annual £4.6 billion budget for science and research programmes, with £150 million each year support university-business interaction. The UK's universities are increasingly collaborating with each other and with external organization to develop and commercialise knowledge, last year securing over £3 billion from external sources. This paper outlines a series of measures to make it easier for individuals, businesses and the public sector to innovate alone or in partnership. As part of a package of support the Government is relaunching the popular Smart brand and will increase the funding to the Technology Strategy Board. Research Councils UK will establish a principles-based framework for the treatment and submission of multi-institutional funding bids. Also the Government will continue to look for other ways to encourage more relationships between universities and business and will work with NESTA to establish a price centre to run, design and facilitate new inducement prices. The Government has also commissioned independent groups of academics and publishers to review the availability of published research, and to develop action plans for making this freely available. It will also create an Open Data Institute to develop semantic web technologies.
