Crossing Design Boundaries Paul Rodgers,Libby Brodhurst,Duncan Hepburn,2006-02-01 This book presents over 100 papers from the 3rd Engineering & Product Design Education International Conference dedicated to the subject of exploring novel approaches in product design education. The theme of the book is Crossing Design Boundaries which reflects the editors' wish to incorporate many of the disciplines associated with, and integral to, modern product design and development pursuits. Crossing Design Boundaries covers, for example, the conjunction of anthropology and design, the psychology of design products, the application of soft computing in wearable products, and the utilisation of new media and design and how these can be best exploited within the current product design arena. The book includes discussions concerning product design education and the cross-over into other well established design disciplines such as interaction design, jewellery design, furniture design, and exhibition design which have been somewhat under represented in recent years. The book comprises a number of sections containing papers which cover highly topical and relevant issues including Design Curriculum Development, Interdisciplinarity, Design Collaboration and Team Working, Philosophies of Design Education, Design Knowledge, New Materials and New Technologies in Design, Design Communication, Industrial Collaborations and Working with Industry, Teaching and Learning Tools, and Design Theory.

*Computation and Human Experience* Philip Agre,1997-07-28 By paying close attention to the metaphors of artificial intelligence and their consequences for the field's patterns of success and failure, this text argues for a reorientation of the field away from thought and toward activity. It offers a critical reconstruction of AI research.

The Art of Critical Making Rosanne Somerson,Mara Hermanson,2013-09-11 Describes the world's leading approach to art and design taught at Rhode Island School of Design At Rhode Island School of Design students are immersed in a culture where making questions, ideas, and objects, using and inventing materials, and activating experience all serve to define a form of critical thinking—albeit with one's hands—i.e. critical making. The Art of Critical Making, by RISD faculty and staff, describes fundamental aspects of RISD's approach to critical making and how this can lead to innovation. The process of making taught at RISD is deeply introspective, passionate, and often provocative. This book illuminates how RISD nurtures the creative process, from brief or prompt to outcome, along with guidance on the critical questions and research that enable making great works of art and design. Explores the conceptual process, idea research, critical questions, and iteration that RISD faculty employ to educate students to generate thoughtful work Authors are from the faculty and staff of the Rhode Island School of Design, which consistently ranks as the number one fine arts and design college in the United States The Art of Critical Making shows you how context, materials, thought processes, and self-evaluation are applied in this educational environment to prepare creative individuals to produce dynamic, memorable, and meaningful works.

Icons Unmasked Alex Solis,2016-02-14 Ever wonder if the characters you see on TV, in movies and in comic books are hiding something behind their masks? That perhaps they're really someone -- or something -- else? When pop culture is such a huge part of our lives, we're bombarded with these characters everywhere we turn. Each time we see a new character in a movie, video game or commercial, we feel a sudden sense déjà vu. There's something about their goofy grin, that creepy laugh, or those boogly eyes that feels eerily familiar...This got me thinking. Is anything we see ever 100% original? Or is everything we experience really just our minds piecing together past experiences to create something that feels unique and new?In Icons Unmasked, I'm trying to bring a new sense of discovery to characters everyone has seen hundreds of times. I wanted to recreate the experience of what it might be like to see one iconic character from your childhood for the first time

as an adult. Proceed at your own caution and keep in mind the following illustrations cannot be unseen. Your childhood might possibly be destroyed forever

**C'lick Me** Katrien Jacobs, 2007 C'Lick Me: A Netporn Studies Reader is an anthology that collects the best material from two years of debate from The Art and Politics of Netporn 2005 conference to the 2007 C'Lick Me festival. The C'Lick Me reader opens the field of 'Internet pornography'. Based on non-conventional approaches and mixing academics, artists and activists, it reclaims a critical post-enthusiastic, post-censorship perspective on netporn, a dark field that has been dominated thus far by dodgy commerce and filtering. The C'Lick Me reader covers the rise of the netporn society from the Usenet underground to the blogosphere, analyses economic data and search engine traffic, compares sex work with the work of fantasy, disability and accessibility. The reader also expands the notion of digital desire beyond the predictable boundaries of the porn debate and depicts a broader libidinal spectrum ranging from fetish subcultures to digital alienation, from code pornography to war pornography. C'Lick Me concludes by re-contextualising queer discourse into a post-porn scenario.

**Adversarial Design** Carl DiSalvo, 2015-08-21 An exploration of the political qualities of technology design, as seen in projects that span art, computer science, and consumer products. In Adversarial Design, Carl DiSalvo examines the ways that technology design can provoke and engage the political. He describes a practice, which he terms "adversarial design," that uses the means and forms of design to challenge beliefs, values, and what is taken to be fact. It is not simply applying design to politics—attempting to improve governance for example, by redesigning ballots and polling places; it is implicitly contestational and strives to question conventional approaches to political issues. DiSalvo explores the political qualities and potentials of design by examining a series of projects that span design and art, engineering and computer science, agitprop and consumer products. He views these projects—which include computational visualizations of networks of power and influence, therapy robots that shape sociability, and everyday objects embedded with microchips that enable users to circumvent surveillance—through the lens of agonism, a political theory that emphasizes contention as foundational to democracy. DiSalvo's illuminating analysis aims to provide design criticism with a new approach for thinking about the relationship between forms of political expression, computation as a medium, and the processes and products of design.

**Cold War Modern** David Crowley, Jane Pavitt, 2008 Modern life after 1945 seemed to promise both utopia and catastrophe. Both could, it seemed, be achieved at the 'push of a button'. Published to accompany a major V & A exhibition, 'Cold War Modern: Design 1945-1970', this book explores how the politics of the Cold War shaped architecture and design. Reassessing 'classic' designs and introducing many little-known objects.

**Social Science, Technical Systems, and Cooperative Work** Geoffrey Bowker, Susan Leigh Star, Les Gasser, William Turner, 2014-05-12 This book is the first to directly address the question of how to bridge what has been termed the great divide between the approaches of systems developers and those of social scientists to computer supported cooperative work—a question that has been vigorously debated in the systems development literature. Traditionally, developers have been trained in formal methods and oriented to engineering and formal theoretical problems; many social scientists in the CSCW field come from humanistic traditions in which results are reported in a narrative mode. In spite of their differences in style, the two groups have been cooperating more and more in the last decade, as the people problems associated with computing become increasingly evident to everyone. The authors have been encouraged to examine, rigorously and in depth, the theoretical basis of CSCW. With contributions from field leaders in the United Kingdom, France, Scandinavia, Mexico, and the United States, this volume offers an exciting overview of the cutting edge of research and theory. It constitutes a solid foundation for the rapidly coalescing field of social informatics. Divided into three parts, this volume covers social theory, design theory, and the sociotechnical system with respect to CSCW. The first set of chapters looks at ways of rethinking

basic social categories with the development of distributed collaborative computing technology--concepts of the group, technology, information, user, and text. The next section concentrates more on the lessons that can be learned at the design stage given that one wants to build a CSCW system incorporating these insights--what kind of work does one need to do and how is understanding of design affected? The final part looks at the integration of social and technical in the operation of working sociotechnical systems. Collectively the contributors make the argument that the social and technical are irremediably linked in practice and so the great divide not only should be a thing of the past, it should never have existed in the first place.

**Lies & Omens** Lyn Benedict,2012-04-24 Sylvie Lightner is a P.I. specializing in the unusual—in a world where magic is real, and Hell is just around the corner. After escaping secret government cells and destroying a Miami landmark, Sylvie's trying to lay low—something that gets easier when a magical force starts taking out her enemies. But these magical attacks are a risk to bystanders, and Sylvie can't let that slide. When the war between the government and the magical world threatens the three people closest to her—her assistant, her sister, and her lover—Sylvie has no choice but to get involved with hidden powers bent on shaping the world to their liking. Now, with death and disaster on the horizon, even if Sylvie wins, things will never be the same...

Encased in a cardboard box, the project comprises 16 unbound posters and a map page which draws attention to the epicentre and its rippling impact on the population of the island. The unique format allows the viewer to absorb each page individually or to hang the entire project. **Critical Point of View** Geert Lovink,Nathaniel Tkacz,2011 For millions of internet users around the globe, the search for new knowledge begins with Wikipedia. The encyclopedia's rapid rise, novel organization, and freely offered content have been marveled at and denounced by a host of commentators. This book moves beyond unflagging praise, well-worn facts, and questions about its reliability and accuracy, to unveil the complex, messy, and controversial realities of a distributed knowledge platform. The essays, interviews and artworks brought together in this reader form part of the overarching 'Critical Point of View' research initiative, which began with a conference in Bangalore (January 2010), followed by events in Amsterdam (March 2010) and Leipzig (September 2010). With an emphasis on theoretical reflection, cultural difference and indeed, critique, contributions to this collection ask: What values are embedded in Wikipedia's software? On what basis are Wikipedia's claims to neutrality made?
