Chimney Swift Towers Paul D. Kyle, 2005-02-22 Chimney Swifts, birds that nest and roost in chimneys, have been historically abundant in North America. But by the late 1980s, the number of swifts migrating to North America from the Amazon River Basin had declined. A growing number of people across North America are now constructing nesting towers and conducting Chimney Swift conservation projects in their own communities. With Chimney Swift Towers, concerned bird conservationists have a step-by-step guide to help them create more habitat for these beneficial, insect-eating birds. Chimney Swift experts Paul and Georgean Kyle give directions for building freestanding wooden towers, wooden kiosk towers, masonry towers, and other structures. Included are - design basics, - lists of materials needed, - useful diagrams and photographs, - and detailed instructions on site preparation, tower construction, installation, and maintenance. Anyone with basic woodworking or masonry skills and an interest in wildlife conservation will find this publication helpful. That includes do-it-yourselfers, homeowners involved in creating backyard habitat for wildlife, landscape and structural architects, park and wildscape managers, wildlife management area professionals, nature centers, garden centers, scout troops, and other civic organizations in search of community service projects.

The Parthenon Enigma Joan Breton Connelly, 2014-01-28 Built in the fifth century b.c., the Parthenon has been venerated for more than two millennia as the West's ultimate paragon of beauty and proportion. Since the Enlightenment, it has also come to represent our political ideals, the lavish temple to the goddess Athena serving as the model for our most hallowed civic architecture. But how much do the values of those who built the Parthenon truly correspond with our own? And apart from the significance with which we have invested it, what exactly did this marvel of human hands mean to those who made it? In this revolutionary book, Joan Breton Connelly challenges our most basic assumptions about the Parthenon and the ancient Athenians. Beginning with the natural environment and its rich mythic associations, she re-creates the development of the Acropolis—the Sacred Rock at the heart of the city-state—from its prehistoric origins to its Periklean glory days as a constellation of temples among which the Parthenon stood supreme. In particular, she probes the Parthenon's legendary frieze: the 525-foot-long relief sculpture that originally encircled the upper reaches before it was partially destroyed by Venetian cannon fire (in the seventeenth century) and most of what remained was shipped off to Britain (in the nineteenth century) among the Elgin marbles. The frieze's vast enigmatic procession—a dazzling pageant of cavalymen and elders, musicians and maidens—has for more than two hundred years been thought to represent a scene of annual civic celebration in the birthplace of democracy. But thanks to a once-lost play by Euripides (the discovery of which, in the wrappings of a Hellenistic Egyptian mummy, is only one of this book's intriguing adventures), Connelly has uncovered a long-buried meaning, a story of human sacrifice set during the city's mythic founding. In a society startlingly preoccupied with cult ritual, this story was at the core of what it meant to be Athenian. Connelly reveals a world that beggars our popular notions of Athens as a city of staid philosophers, rationalists, and rhetoricians, a world in which our modern secular conception of democracy would have been simply incomprehensible. The Parthenon's full significance has been obscured until now owing in no small part, Connelly argues, to the frieze's dismemberment. And so her investigation concludes with a call to reunite the pieces, in order that what is perhaps the greatest single work of art surviving from antiquity may be viewed more nearly as its makers intended. Marshalling a breathtaking range of textual and visual evidence, full of fresh insights woven into a thrilling narrative that brings the distant past to life, *The Parthenon Enigma* is sure to become a landmark in our understanding of the civilization from which we claim cultural descent.

about the animals in our world and the better we care for them, the better our lives will be. Through hundreds of charming illustrations, a few homemade projects, and her humorous, knowledgeable voice, Stewart provides insight into the secret lives of animals and the kindest ways to live with and alongside them. At home, she shows readers how to speak “dog-ese” and “cat-ese” and how to “virtually adopt” an animal. In the backyard, we learn about building bee houses, dealing nicely with pesky moles, and creative ways to bird-watch. And on the farm, Stewart teaches us what we can do to help all farm animals lead a better life (and reveals pigs’ superpowers!). Part practical guide, part memoir of her life with animals, and part testament to the power of giving back, *Do Unto Animals* is a gift for animal lovers of all stripes.

I Can Write the World Joshunda Sanders, 2020-06-15 Lovely and timely. When her mother explains that the power of stories lies in the hands of those who write them, Ava decides to become a journalist. *I Can Write the World* follows Ava as she explores her vibrant South Bronx neighborhood - buildings whose walls boast gorgeous murals of historical figures as well as intricate, colorful street art, the dozens of different languages and dialects coming from the mouths of passersby, the many types of music coming out of neighbors’ windows and passing cars. In reporting how the music and art and culture of her neighborhood reflect the diversity of the people of New York City, Ava shows the world as she sees it, revealing to children the power of their own voice.

How We Show Up Mia Birdsong, 2020-06-02 An Invitation to Community and Models for Connection After almost every presentation activist and writer Mia Birdsong gives to executives, think tanks, and policy makers, one of those leaders quietly confesses how much they long for the profound community she describes. They have family, friends, and colleagues, yet they still feel like they're standing alone. They're winning at the American Dream, but they're lonely, disconnected, and unsatisfied. It seems counterintuitive that living the good life--the well-paying job, the nuclear family, the upward mobility--can make us feel isolated and unhappy. But in a divided America, where only a quarter of us know our neighbors and everyone is either a winner or a loser, we've forgotten the key element that helped us make progress in the first place: community. In this provocative, groundbreaking work, Mia Birdsong shows that what separates us isn't only the ever-present injustices built around race, class, gender, values, and beliefs, but also our denial of our interdependence and need for belonging. In response to the fear and discomfort we feel, we've built walls, and instead of leaning on each other, we find ourselves leaning on concrete. Through research, interviews, and stories of lived experience, *How We Show Up* returns us to our inherent connectedness where we find strength, safety, and support in vulnerability and generosity, in asking for help, and in being accountable. Showing up--literally and figuratively--points us toward the promise of our collective vitality and leads us to the liberated well-being we all want.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

In the challenging context of accelerating climate dynamics, the core discipline of architectural design is evolving and embracing new forms of action. New York-based nonprofit Terreform ONE has established a distinctive design tactic that investigates projects through the regenerative use of natural materials, science, and the emergent field of socio-ecological design. Discovering Craft Villages in Vietnam Sylvie Fanchette, Nicholas Stedman, 2018-11-19 With their festivals and traditional industries, their commun halls, pagodas, temples, and vernacular buildings, the villages around Hà Nội possess a rich body of cultural, architectural and craft heritage. Less than one hour from the capital are over 500 specialist craft villages, producing an array of religious or artistic objects, as well as food products, industrial goods, textiles, basketware and much more. Despite the trials and tribulations Vietnam has endured, these traditions have remained alive; today they constitute the basis of material, social and spiritual culture among the village communities of the Red River delta. The artisans themselves, and their local institutions, see cultural tourism as a way of further improving the fortunes of the craft village communities and bringing their heritage to wider attention. Until recently, few guides or tourists had forayed into these settlements, some of which are lost in the maze of routes and tracks that criss-cross the rice paddies of the Hà Nội hinterland. The history and skills they harbour have been inaccessible to all but a few specialists. Few of the villages are signposted, yet between them they are home to three quarters of the architectural, religious and craft heritage of the upper delta. This book, the fruit of several years' research by specialists working in northern Vietnam, comprises ten itineraries, blending potted histories, legends, descriptions of craft techniques, signposted walks and maps, designed to introduce travellers and lovers of Vietnamese culture to forty or so villages around Hà Nội. Many of us have seen their wares on sale in shops in and around the 36 streets of Hà Nội Old Quarter or in other cities in West. This book is about the true lives and enduring skills of the nameless artisans who made them.
