Sacred Mathematics Fukagawa Hidetoshi, Tony Rothman, 2021-08-10 Between the seventeenth and nineteenth centuries Japan was totally isolated from the West by imperial decree. During that time, a unique brand of homegrown mathematics flourished, one that was completely uninfluenced by developments in Western mathematics. People from all walks of life--samurai, farmers, and merchants--inscribed a wide variety of geometry problems on wooden tablets called sangaku and hung them in Buddhist temples and Shinto shrines throughout Japan. Sacred Mathematics is the first book published in the West to fully examine this tantalizing--and incredibly beautiful--mathematical tradition. Fukagawa Hidetoshi and Tony Rothman present for the first time in English excerpts from the travel diary of a nineteenth-century Japanese mathematician, Yamaguchi Kanzan, who journeyed on foot throughout Japan to collect temple geometry problems. The authors set this fascinating travel narrative--and almost everything else that is known about temple geometry--within the broader cultural and historical context of the period. They explain the sacred and devotional aspects of sangaku, and reveal how Japanese folk mathematicians discovered many well-known theorems independently of mathematicians in the West--and in some cases much earlier. The book is generously illustrated with photographs of the tablets and stunning artwork of the period. Then there are the geometry problems themselves, nearly two hundred of them, fully illustrated and ranging from the utterly simple to the virtually impossible. Solutions for most are provided. A unique book in every respect, Sacred Mathematics demonstrates how mathematical thinking can vary by culture yet transcend cultural and geographic boundaries.

Upheaval Jared Diamond, 2019-05-07 A riveting and illuminating Bill Gates Summer Reading pick about how and why some nations recover from trauma and others don't (Yuval Noah Harari), by the Pulitzer Prize-winning author of the landmark bestseller Guns, Germs, and Steel. In his international bestsellers Guns, Germs and Steel and Collapse, Jared Diamond transformed our understanding of what makes civilizations rise and fall. Now, in his third book in this monumental trilogy, he reveals how successful nations recover from crises while adopting selective changes -- a coping mechanism more commonly associated with individuals recovering from personal crises. Diamond compares how six countries have survived recent upheavals -- ranging from the forced opening of Japan by U.S. Commodore Perry's fleet, to the Soviet Union's attack on Finland, to a murderous coup or countercoup in Chile and Indonesia, to the transformations of Germany and Austria after World War Two. Because Diamond has lived and spoken the language in five of these six countries, he can present gut-wrenching histories experienced firsthand. These nations coped, to varying degrees, through mechanisms such as acknowledgment of responsibility, painfully honest self-appraisal, and learning from models of other nations. Looking to the future, Diamond examines whether the United States, Japan, and the whole world are successfully coping with the grave crises they currently face. Can we learn from lessons of the past? Adding a psychological dimension to the in-depth history, geography, biology, and anthropology that mark all of Diamond's books, Upheaval reveals factors influencing how both whole nations and individual people can respond to big challenges. The result is a book epic in scope, but also his most personal yet.

The Final Frontiersman James Campbell, 2007-11-01 The inspiration for The Last Alaskans—the hit documentary series now on the Discovery+—James Campbell's inimitable insider account of a family's nomadic life in the unshaped Arctic wilderness “is an icily gripping, intimate profile that stands up well beside Krakauer's classic [Into the Wild], and it stands too, as a kind of testament to the rough beauty of improbably wild dreams” (Men's Journal). Hundreds of hardy people have tried to carve a living in the Alaskan bush, but few have succeeded as consistently as Heimo Korth. Originally from Wisconsin, Heimo traveled to the Arctic wilderness in his twenties. Now, more than three decades later, Heimo lives with his wife and two daughters approximately 200 miles from civilization—a sustainable, nomadic life bounded by the migrating caribou, the dangers of

swollen rivers, and by the very exigencies of daily existence. In *The Final Frontiersman*, Heimo's cousin James Campbell chronicles the Korth family's amazing experience, their adventures, and the tragedy that continues to shape their lives. With a deft voice and in spectacular, at times unimaginable detail, Campbell invites us into Heimo's heartland and home. The Korths wait patiently for a small plane to deliver their provisions, listen to distant chatter on the radio, and go sledding at 44 degrees below zero—all the while cultivating the hard-learned survival skills that stand between them and a terrible fate. Awe-inspiring and memorable, *The Final Frontiersman* reads like a rustic version of the American Dream and reveals for the first time a life undreamed by most of us: amid encroaching environmental pressures, apart from the herd, and alone in a stunning wilderness that for now, at least, remains the final frontier.

The Widow, The Priest and The Octopus Hunter Amy Chavez, 2022-05-03 Get to know the inhabitants of a tiny Japanese island--and their unusual stories and secrets--through this fascinating,

intimate collection of portraits. This book beautifully describes the residents of tiny Shiraishi Island as well as telling how Amy herself came to be in such a fascinating little corner of Japan...Amy herself, with this book, has shown herself an integral part of this preservation. --Rebecca Otowa, author of *At Home in Japan* When American journalist Amy Chavez moved to the tiny island of Shiraishi (population 430), she rented a house from an elderly woman named Eiko, who left many of her most cherished possessions in the house--including a portrait of Emperor Hirohito and a family altar bearing the spirit tablet of her late husband. Why did she abandon these things? And why did her tombstone later bear the name of a daughter no one knew? These are just some of the mysteries Amy pursues as she explores the lives of Shiraishi's elusive residents. The 31 revealing accounts in this book include: The story of 40-year-old fisherman Hiro, one of two octopus hunters left on the island, who moved back to his home island to fill a void left by his brother who died in a boating accident. A Buddhist priest, eighty-eight, who reflects on his childhood during the war years, witnessing fighter pilots hiding in bunkers on the back side of the island. A pufferfish widow, so named because her husband died after accidentally eating a poisonous pufferfish. The ex-postmaster who talks about hiking over the mountains at night to deliver telegrams at a time when there were only 17 telephone numbers on the island. Interspersed with the author's reflections on her own life on the island, these stories paint an evocative picture of the dramatic changes which have taken place in Japanese society across nearly a century. Fascinating insights into local superstitions and folklore, memories of the war and the bombing of nearby Hiroshima, and of Shiraishi's heyday as a resort in the 1960s and 70s are interspersed with accounts of common modern-day problems like the collapse of the local economy and a rapidly-aging community which has fewer residents each year.

Nurturing Dreams Fumihiko Maki, 2012-09-21 Unavailable as a collection until now, these essays document both the intellectual journey of one of the world's leading architects and a critical period in the evolution of architectural thought. Born in Tokyo, educated in Japan and the United States, and principal of an internationally acclaimed architectural practice, celebrated architect Fumihiko Maki brings to his writings on architecture a perspective that is both global and uniquely Japanese. Influenced by post-Bauhaus internationalism, sympathetic to the radical urban architectural vision of Team X, and a participant in the avant-garde movement Metabolism, Maki has been at the forefront of his profession for decades. This collection of essays documents the evolution of architectural modernism and Maki's own fifty-year intellectual journey during a critical period of architectural and urban history. Maki's treatment of his two overarching themes—the contemporary city and modernist architecture—demonstrates strong (and sometimes unexpected) linkages between urban theory and architectural practice. Images and commentary on three of Maki's own works demonstrate the connection between his writing and his designs. Moving through the successive waves of modernism, postmodernism, neomodernism, and other isms, these essays reflect how several generations of architectural thought and expression have been resolved within one career.

The Samurai's Tale Erik Christian Haugaard, 2005 When the powerful Lord Takeda's soldiers sweep across the countryside, killing and plundering, they spare the boy Taro's life and take him along with them. Taro becomes a servant in the household of the noble Lord Akiyama, where he meets Togan, a cook, who teaches Taro and makes his new life bearable. But when Togan is murdered, Taro's life takes a new direction: He will become a samurai, and redeem the family legacy that has been stolen from him.

Metabolism in Architecture Kishō Kurokawa, 1977 Even in a country where outstanding achievements have become almost a commonplace, the Japanese architect, Kisho Kurokawa, appears as both a remarkable and a remarkably successful man. With buildings in the United States and Eastern and Western Europe as well as in Japan, he has established an international reputation as a leading figure amongst the younger generation of architects. At the age of forty he already had thirty-five major buildings and seventeen books to his credit; four new towns are being built to his designs; he heads a company of over a hundred employees, he runs a think-tank and an urban design bureau and for variety he has his own television programme with a regular audience of some 30 million. Behind these statistics lies a prodigious vitality expressed in original and stimulating

The History of Korea (Vol.1&2) Homer B. Hulbert,2023-12-13 The History of Korea presents a chronological account of Korea from ancient days, over 2000 B. C, to modern 20th century Korea. Hulbert said that Korea and Japan have the same two racial types, but Japan is mostly Malay and Korea is mostly Manchu-Korean. He claimed that Korea is physically mostly of the northern type, but also said that the nation, being physically mostly of the northern type, did not disprove Hulbert's claim that the Malay element developed Korea's first civilization, although not necessarily originating Korea's first civilization, and the Malay element imposed its language in its main features in the entire peninsula.

Cyberspace Evon Abu-Taieh,Issam H. Al Hadid,Abdelkrim El Mouatasim,2020-06-17 Parallel to the physical space in our world, there exists cyberspace. In the physical space, there are human and nature interactions that produce products and services. On the other hand, in cyberspace there are interactions between humans and computer that also produce products and services. Yet, the products and services in cyberspace don't materialize—they are electronic, they are millions of bits and bytes that are being transferred over cyberspace infrastructure.

Imperial Biologists Hideo Mohri,2019-03-26 This book sheds light on a little-known aspect of the Imperial family of Japan: For three generations, members of the family have devoted themselves to biological research. Emperor Showa (Hirohito) was an expert on hydrozoans and slime molds. His son, Emperor Akihito, is an ichthyologist specializing in gobioid fishes, and his research is highly respected in the field. Prince Akishino, Emperor Akihito's son, is known for his research on giant catfish and the domestication of fowl, while Prince Hitachi, Emperor Akihito's brother, has conducted research on cancer in animals. The book shows how they became interested in biology, how seriously they were committed to their research, what their main scientific contributions are, and how their achievements are valued by experts at home and abroad. To commemorate the 60-year reign of Emperor Showa and his longtime devotion to biology, the International Prize for Biology was founded in 1985. The prize seeks to recognize and encourage researches in basic biology. A list of winners and a summary of their research are presented in the last part of the book. The author, an eminent biologist who has given lectures to the Imperial Family, explains their research and tells the fascinating story of biology and the Imperial Family of Japan. The book is a valuable resource, not only for biology students and researchers, but also for historians and anyone interested in science and the Royal and Imperial families.

The Dissertation Iain Borden,2006-08-14 The Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course. Properly done, it can be a valuable contribution not only to the students own learning development but also to the field of architecture as a whole. This book provides a complete guide to what to do, how to do it, when to do it, and the major pitfalls involved. This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation, including new material on CD-ROM and online sources, web based research techniques, digital images, alternative imaging strategies, key architecture links, referencing and new dissertation extracts. It clearly navigates the student through the whole process of writing, preparing and submitting a dissertation, as well as suggesting what to do after the dissertation has been completed. Subjects covered include how to write a proposal, which research methodologies and techniques to adopt, which libraries and archives to utilize (including special architectural resources on the net), as well as how to structure, reference and illustrate the final submission. The authors also take architecture students into new terrain, suggesting alternative methods of undertaking dissertations, whether as video, prose writing, multimedia or other forms of expression. Furthermore, this guide includes new examples of exemplary dissertations of all kinds, as completed by students in Europe and North America so that the reader can clearly see the kinds of work which they themselves might choose to pursue.
