Museums of Language and the Display of Intangible Cultural Heritage Margaret J.-M. Sönmez, Maia Wellington Gahtan, Nadia Cannata, 2019-12-09 Museums of Language and the Display of Intangible Cultural Heritage presents essays by practitioners based in language museums around the world. Describing their history, mission, and modes of display, contributors demonstrate the important role intangible heritage can and should play in the museum. Arguing that languages are among our most precious forms of cultural heritage, the book also demonstrates that they are at risk of neglect, and of endangerment from globalisation and linguistic imperialism. Including case studies from across Europe, North America, Africa, and Asia, this book documents the vital work being done by museums to help preserve languages and make them objects of broad public interest. Divided into three sections, contributions to the book focus on one of three types of museums: museums of individual languages, museums of language groups – both geographic and structural – and museums of writing. The volume presents practical information alongside theoretical discussions and state-of-the-art commentaries concerning the representation of languages and their cultural nature. Museums of Language and the Display of Intangible Cultural Heritage is the first volume to address the subject of language museums and, as such, should be of interest to academics, researchers, and postgraduate students in the fields of museum and cultural heritage studies, applied linguistics, anthropology, tourism, and public education.

**Photogrammetric Applications for Cultural Heritage** JON. BEDFORD, 2017-10-31 This guidance covers the practical application of photogrammetry in recording cultural heritage, with particular reference to structure from motion (SfM) techniques. Our audience for this document includes survey contractors, archaeological contractors, voluntary organisations and specialists. Photogrammetric image acquisition and processing, until recently requiring a considerable investment in hardware and software, are now possible at a fraction of their former cost. This has led to a huge increase in the use of photogrammetry in cultural heritage recording. The skills required to apply the techniques successfully and accurately are discussed, and background information on how various parts of the process work is provided so that better results can be achieved through better understanding. Photogrammetry is characterised by its versatility, and is applicable over a wide range of scales, from landscapes to small objects. The particular requirements needed at these different scales are outlined, and both imaging techniques and useful ancillary equipment are described. The different types of outputs are discussed, including their suitability for further interrogation using a range of established analytical techniques and the presentation options available. A range of case studies illustrates the application of photogrammetry across a variety of projects that broadly reflect the areas discussed in the text. This document is one of a number of Historic England technical advice documents on how to survey historic places.

Science Cultures in a Diverse World: Knowing, Sharing, Caring Bernard Schiele, Xuan Liu, Martin W. Bauer, 2021-09-13 Science and technology culture is now more than ever at the very heart of the social project, and all countries, to varying degrees, participate in it: raising scientific literacy, improving the image of the sciences, involving the public in debates and encouraging the young to pursue careers in the sciences. Thus, the very destiny of any society is now entwined with its ability to develop a genuine science and technology culture, accessible for participation not only to the few who, by virtue of their training or trade, work in the science and technology fields, but to all, thereby creating occasions for society to debate and to foster a positive dialogue about the directions of change and future choices. This book organized on the theme of 'knowing, sharing, caring: new insights for a diverse world', which was derived from the observation that globalization rests upon diversity—diversity of contexts, publics, research, strategies and new innovating practices—and aims to stimulate exchanges, discussions and debates, to initiate a reflection conducive to decentring and to be an opportunity for enrichment by providing the reader with means to achieve the potentialities of that diversity through a comparison of the visions that underpin the attitudes of social actors, the challenges they perceive and the potential solutions they consider. Thus, this book aims first and foremost to raise questions in such a manner that readers so stimulated will feel compelled to contribute and will do so. In this spirit, however significant, the results presented and shared are less important than the questions they seek to answer: How are we to rethink the diffusion, the propagation and the sharing of scientific thought and knowledge in an ever more complex and diverse world? What to know? What to share? How do we do it when science is broken down across the whole spectrum of the world's diversity? The book is recommended for those who are interested in science communication and science cultures in the new media era, in contemporary social dynamics, and in the evolution of the role of the state and of institutions. It is also an excellent reference for researchers engaging in science communication, public understanding of science, cultural studies, science and technology museum, science-society relationship and other fields of humanities and social sciences.

*Museums in a Digital Age* Ross Parry, 2013-01-11 The influence of digital media on the cultural heritage sector has been pervasive and profound. Today museums are reliant on new technology to manage their collections. They collect digital as well as material things. New media is embedded within their exhibition spaces. And their activity online is as important as their physical presence on site. However, 'digital heritage' (as an area of practice and as a subject of study) does not exist in one single place. Its evidence base is complex, diverse and distributed, and its content is available through multiple channels, on varied media, in myriad locations, and different genres of writing. It is this diaspora of material and practice that this Reader is intended to address. With over forty chapters (by some fifty authors and co-authors), from around the world, spanning over twenty years of museum practice and research, this volume acts as an aggregator drawing selectively from a notoriously distributed network of content. Divided into seven parts (on information, space, access, interpretation, objects, production and futures), the book presents a series of cross-sections through the body of digital heritage literature, each revealing how a different aspect of curatorship and museum provision has been informed, shaped or challenged by computing. Museums in a Digital Age is a provocative and inspiring guide for any student or practitioner of digital heritage.

*Protection of Historical Constructions* Ioannis Vayas, Federico M. Mazzolani, 2021-12-03 This book gathers the peer-reviewed papers presented at the 4th International Conference on Protection of Historical Constructions (PROHITECH), held in Athens, Greece, on October 25-27, 2021. The conference topics encompass structural and earthquake engineering, intervention strategies, materials and technologies, digital documentation, architecture and urban planning, cultural heritage, all of which represented by a showcase of case studies covering different construction materials, as well as sustainability, energy efficiency, and adaptation to climate changes. As such the book represents an invaluable, up-to-the-minute tool, providing an essential overview of protection of historical constructions, and offers an important platform to researchers, engineers and architects.

**Digital Curation: Breakthroughs in Research and Practice** Management Association, Information Resources, 2018-08-03 The effective use of technology offers numerous benefits in protecting cultural heritage. With the proper implementation of these tools, the management and

conservation of artifacts and knowledge are better attained. *Digital Curation: Breakthroughs in Research and Practice* is a critical source of academic knowledge on the preservation, selection, collection, maintenance, and archiving of digital materials. Highlighting a range of pertinent topics such as electronic resource management, digital preservation, and virtual restoration, this publication is an ideal reference source for digital curators, technology developers, IT professionals, academicians, researchers, and graduate-level students interested in the curation and preservation of digital resources.

**New Business Opportunities in the Growing E-Tourism Industry** Eto, Hajime, 2015-07-07 Responding to the dual pressures of globalization and economic downturn, communities across the world formerly driven by agriculture and industry are increasingly turning toward tourism as an economic mainstay. In order for industry leaders to compete with the efforts of competitors and savvy marketers, new business models must be defined which allow for the incorporation of e-tourism tools and expansion into the global marketplace. *New Business Opportunities in the Growing E-Tourism Industry* offers case studies and research that highlights the impact of globalization on travel and tourism and offers solutions to potential problems. Targeting an audience of researchers and business professionals, this volume brings together a diverse international body of scholars and researchers to provide a holistic perspective of future developments in the e-tourism industry. This volume compiles the research and perspectives of researchers and industry professionals, uniting a variety of topics including medical tourism, traffic-management, route-planning, virtual museums, digital spot-hunting via film-mosaic, and tourism for the elderly and disabled.

**Natural Stone and Architectural Heritage** Giovanna Antonella Dino, Lola Pereira, Lidia Catarino, 2019-09-23 This book is made up of contributions dealing with heritage stones from different countries around the world. The stones are described, as well as their use in vernacular and contemporaneous architecture. Heritage stones are those stones that have special significance in human culture. Examples include some very important stones that have been either neglected because they are no longer extracted, or stones that have great significance in commercial terms but knowledge of their national and/or international heritage has not been well documented. In this collection of articles, we have tried to spread awareness of architectural heritage around the world, the natural stones that have been used in its construction, and the need to preserve historical quarries that once provided the source of such stones. Historical quarries are linked to regional culture and tradition. Because of the specific technical and aesthetical characteristics of heritage stones, which have lasted for centuries, these historical quarries should be preserved to be able to use the stones for the proper restoration of monuments and historical buildings to avoid negative actions that can be observed in many places in the restoration of buildings, which are some times part of World Heritage sites. The final intention of this book is to continuously grow the interest on this fascinating subject of heritage stones.

**Edible Identities: Food as Cultural Heritage** Ronda L. Brulotte, Michael A. Di Giovine, 2016-04-29 Food - its cultivation, preparation and communal consumption - has long been considered a form of cultural heritage. A dynamic, living product, food creates social bonds as it simultaneously marks off and maintains cultural difference. In bringing together anthropologists, historians and other scholars of food and heritage, this volume closely examines the ways in which the cultivation, preparation, and consumption of food is used to create identity claims of 'cultural heritage' on local, regional, national and international scales. Contributors explore a range of themes, including how food is used to mark insiders and outsiders within an ethnic group; how the same food's meanings change within a particular society based on class, gender or taste; and how traditions are 'invented' for the revitalization of a community during periods of cultural pressure. Featuring case studies from Europe, Asia and the Americas, this timely volume also addresses the complex processes of classifying, designating, and valorizing food as 'terroir,' 'slow food,' or as intangible cultural heritage through UNESCO. By effectively analyzing food and foodways through the perspectives of critical heritage studies, this collection productively brings two overlapping but frequently separate theoretical frameworks into conversation.

**Destination Culture** Barbara Kirshenblatt-Gimblett, 1998-09-05 With the question, What does it mean to show?, the author explores the agency of display in museums and tourist attractions. She looks at how objects are made to perform their meaning by being collected and how techniques of display, not just the things shown, convey a powerful message.

**Photogrammetric Computer Vision** Wolfgang Förstner, Bernhard P. Wrobel, 2016-10-04 This textbook offers a statistical view on the geometry of multiple view analysis, required for camera calibration and orientation and for geometric scene reconstruction based on geometric image features. The authors have backgrounds in geodesy and also long experience with development and research in computer vision, and this is the first book to present a joint approach from the converging fields of photogrammetry and computer vision. Part I of the book provides an introduction to estimation theory, covering aspects such as Bayesian estimation, variance components, and sequential estimation, with a focus on the statistically sound diagnostics of estimation results essential in vision metrology. Part II provides tools for 2D and 3D geometric reasoning using projective geometry. This includes oriented projective geometry and tools for statistically optimal estimation and test of geometric entities and transformations and their relations, tools that are useful also in the context of uncertain reasoning in point clouds. Part III is devoted to modelling the geometry of single and multiple cameras, addressing calibration and orientation, including statistical evaluation and reconstruction of corresponding scene features and surfaces based on geometric image features. The authors provide algorithms for various geometric computation problems in vision metrology, together with mathematical justifications and statistical analysis, thus enabling thorough evaluations. The chapters are self-contained with numerous figures and exercises, and they are supported by an appendix that explains the basic mathematical notation and a detailed index. The book can serve as the basis for undergraduate and graduate courses in photogrammetry, computer vision, and computer graphics. It is also appropriate for researchers, engineers, and software developers in the photogrammetry and GIS industries, particularly those engaged with statistically based geometric computer vision methods.

**Virtual Heritage** Erik Malcolm Champion, 2021-07-22 Virtual heritage has been explained as virtual reality applied to cultural heritage, but this definition only scratches the surface of the fascinating applications, tools and challenges of this fast-changing interdisciplinary field. This book provides an accessible but concise edited coverage of the main topics, tools and issues in virtual heritage. Leading international scholars have provided chapters to explain current issues in accuracy and precision; challenges in adopting advanced animation techniques; shows how archaeological learning can be developed in Minecraft; they propose mixed reality is conceptual rather than just technical; they explore how useful

Linked Open Data can be for art history; explain how accessible photogrammetry can be but also ethical and practical issues for applying at scale; provide insight into how to provide interaction in museums involving the wider public; and describe issues in evaluating virtual heritage projects not often addressed even in scholarly papers. The book will be of particular interest to students and scholars in museum studies, digital archaeology, heritage studies, architectural history and modelling, virtual environments.

*The First Rule of Punk* Celia C. Pérez,2018-07-17 A 2018 Pura Belpré Author Honor Book The First Rule of Punk is a wry and heartfelt exploration of friendship, finding your place, and learning to rock out like no one’s watching. There are no shortcuts to surviving your first day at a new school—you can’t fix it with duct tape like you would your Chuck Taylors. On Day One, twelve-year-old Malú (María Luisa, if you want to annoy her) inadvertently upsets Posada Middle School’s queen bee, violates the school’s dress code with her punk rock look, and disappoints her college-professor mom in the process. Her dad, who now lives a thousand miles away, says things will get better as long as she remembers the first rule of punk: be yourself. The real Malú loves rock music, skateboarding, zines, and Soyrito (hold the cilantro, please). And when she assembles a group of like-minded misfits at school and starts a band, Malú finally begins to feel at home. She’ll do anything to preserve this, which includes standing up to an anti-punk school administration to fight for her right to express herself! Black and white illustrations and collage art by award-winning author Celia C. Pérez are featured throughout. Malú rocks! —Victoria Jamieson, author and illustrator of the New York Times bestselling and Newbery Honor-winning *Roller Girl*
